

HYPOTHESIS

Out of the five different popcorn brands I tested locally, I think Auntie Maids produce more popcorn and have less "old Maids" (unpopped popcorn kernels).

RESEARCH

Popcorn is a type of corn that has been specially bred to pop when heated. It is a popular snack that is often eaten at movies, parties, and picnics. There are many different brands of popcorn, each with its own unique flavor and texture. Some brands are known for being particularly fluffy or crunchy, while others are known for having fewer unpopped kernels. Researching different brands can help you find the one that best suits your preferences.

MATERIALS

For this experiment, the following materials were used:

- Five different brands of microwave popcorn (Auntie Maids, On the Border, Popcornopolis, Mission, and Newmans).
- A microwave oven.
- A large bowl for catching the popcorn.
- A measuring cup for counting unpopped kernels.
