Washington and Baltimore Art Deco Richard Striner, Melissa Blair, 2014-04-30 Art Deco buildings still lift their modernist principles and streamlined chrome into the skies of Baltimore and Washington D C Second Place Winner of the Design and Effectiveness Award of the Washington Publishers The bold lines and decorative details of Art Deco have stood the test of time since one of its first appearances in the International Exhibition of Modern Decorative and Industrial Arts in Paris in 1925 Reflecting the confidence of modern mentality streamlined chrome and glossy black along with simple elegance sharp lines and cosmopolitan aspirations Art Deco carried surprises juxtaposing designs growing out of speed racecars and airplanes with ancient Egyptian and Mexican details visual references to Russian ballet and allusions to Asian art While most often associated with such masterworks as New York's Chrysler Building Art Deco is evident in the architecture of many U S cities including Washington and Baltimore By updating the findings of two regional studies from the 1980s with new research Richard Striner and Melissa Blair explore the most significant Art Deco buildings still standing and mourn those that have been lost This comparative study illuminates contrasts between the white collar New Deal capital and the blue collar industrial port city while noting such striking commonalities as the regional patterns of Baltimore's John Jacob Zinc who designed Art Deco cinemas in both cities Uneven preservation efforts have allowed significant losses but surviving examples of Art Deco architecture include the Bank of America building in Baltimore now better known as 10 Light Street and the Uptown Theater on Connecticut Avenue NW in Washington Although possibly less glamorous or flamboyant than exemplars in New York or Miami the authors find these structures along with apartment houses and government buildings typical of the Deco architecture found throughout the United States and well worth preserving Demonstrating how an international design movement found its way into ordinary places this study will appeal to architectural historians as well as regional residents interested in developing a greater appreciation of Art Deco architecture in the mid Atlantic region *Art Deco* Michael Windover, 2012 No detailed description available for Art Deco *Art Deco Architecture* Mike Hope, 2019-07-22 Art Deco burst upon the world for a brief but unforgettable existence during the 1920s and 1930s It embraced new media such as the

photographer Eileen Gray was born in Ireland and remained throughout her life an Irishwoman at heart. An elusive figure, her interior world has never before been observed as closely as in this ground-breaking study of her work, philosophy, and inner circle of fellow artists. Jennifer Goff expertly blends art history and biography to create a stunning ensemble offering a clear beacon of light into truly understanding Gray the woman and the professional. Gray was a self-taught polymath and her work was multi-functional, user-friendly, ready for mass production yet succinctly unique, and her designs show great technical virtuosity. Her expertise in lacquer work and carpet design, often overlooked, is given due attention in this book, as is her fascinating relationship with the architect Le Corbusier and many other compelling and complex relationships. The book also offers rare insights into Gray's early years as an artist. The primary source material for this book is drawn from the Eileen Gray collection at the National Museum of Ireland and its wealth of documentation, correspondence, personal archives, photographs, and oral history.

Asphalt Nation Jane Holtz Kay, 2012-06-20 Asphalt Nation is a major work of urban studies that examines how the automobile has ravaged America's cities and landscape and how we can fight back. The automobile was once seen as a boon to American life, eradicating the pollution caused by horses and granting citizens new levels of personal freedom and mobility. But it was not long before the servant became the master: public spaces were designed to accommodate the automobile at the expense of the pedestrian, mass transportation was neglected, and the poor, unable to afford cars, saw their access to jobs and amenities worsen. Now even drivers themselves suffer as cars choke the highways and pollution and congestion have replaced the fresh air of the open road. Today, our world revolves around the car; as a nation, we spend eight billion hours a year stuck in traffic. In Asphalt Nation, Jane Holtz Kay effectively calls for a revolution to reverse our automobile dependency. Citing successful efforts in places from Portland, Maine, to Portland, Oregon, Kay shows us that radical change is not impossible by any means. She demonstrates that there are economic, political, architectural, and personal solutions that can steer us out of the mess. Asphalt Nation is essential reading for everyone interested in the history of our relationship with the car and in the prospect of returning to a world of human mobility.
