Population and the Environment in China Ko-p'ing Ch'ü, 1994 Population and the Environment in China Geping Qu, Jinchang Li, 1994 The authors incorporate the results of historical research current analysis and forecasting to discuss the relationship between human population and the environment in China China's Environment and the Challenge of Sustainable Development Kristen A. Day, 2016-07-22 China has been experiencing extraordinary economic growth for over two decades Behind the remarkable statistics however it is facing a pressing issue balancing its economic development needs with protecting its environmental resources The environmental issue in China has a profound impact on the rest of the world as well in such concerns as global warming and ethical and legal considerations about environmental enforcement This book covers a broad range of topics from specific environmental assessments in key sectors i.e. desertification to the policy implications of China's entry into the WTO The contributors include scholars government officials business consultants environmental science and technology experts and others based in China and the United States Sharing perspectives that reflect their diverse backgrounds these experts offer valuable insights for handling the emerging opportunities and challenges of doing business in China International Aid and China's Environment Katherine Morton, 2006-05-17 Rapid economic growth in the world's most populous nation is leading to widespread soil erosion desertification deforestation and the depletion of vital natural resources The scale and severity of environmental problems in China now threaten the economic and social foundations of its modernization Using case studies Morton analyzes the relationship between international and local responses to environmental problems in China challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China It advances two interrelated discussions

first it constructs a conceptual framework for understanding the key dimensions of environmental capacity This is broadly defined to encompass the financial institutional technological and social aspects of environmental management Second the book presents the results of an empirical inquiry into the implementation of donor funded environmental projects in both China s poorer and relatively developed regions By drawing upon extensive fieldwork it seeks to explain how and under what conditions international donors can strengthen China s environmental capacity especially at the local level It will be of interest to those studying Chinese politics environmental studies and international relations

An Essay on China's Development After the Demographic Golden Age Xueyuan Tian,2023-03-17 This book mainly addresses China s current demographic situation and social people related policies It aims to solve the issues of demographic transition population aging population flow urbanization population quality etc China is the first large population country with the vast territory and the huge economic system It has many issues such as productivity and production relations superstructure and economic base and domestic and international relations in various fields and at all levels Hence China needs to come up with a set of overall strategies The author sorts out all of his works in recent years and performs his new academic achievements on demographic issues and social governing strategies This timely book offers new methods that impact advanced social development with real data

The Expanding Roles of Chinese Americans in U.S.-China Relations Peter Koehn,Xiao-Huang Yin,Xiao-huang Yin,2015-02-12 This book addresses the historical and contemporary involvement of Chinese Americans from diverse walks of life in U S China relations The contributors present new evidence and fresh perspectives on familiar and unfamiliar national and transnational networks including families businesspersons community newspapers students lobbyists philanthropists and scientists and consider the likely future impact of such contacts on the most important bilateral relationship at the start of the new millennium The volume makes a multidisciplinary contribution to understanding the extensive and vital roles and promise of Chinese Americans at this critical juncture in U S China relations and to revealing the importance of migrants as actors in contemporary global politics The assessments shared by the contributors suggest that the nature and scope of the Chinese American involvement particularly in global civil society networks increasingly will determine the outcome of state to state relations between the United States and the PRC

Environmental Issues Surrounding Human Overpopulation Singh, Rajeev Pratap,Singh, Anita,Srivastava, Vaibhav,2016-12-12 There are many factors to be considered when examining the current state of environmental problems in the modern world By addressing these causes the preservation of ecosystems and environmental resources can be maintained Environmental Issues Surrounding Human Overpopulation is an authoritative reference source for the latest scholarly research on the depletion of natural resources due to overpopulation and presents insights on how these environmental threats can be addressed Highlighting technological economic and social perspectives this book is ideally designed for policymakers researchers academics students and practitioners interested in better understanding the current

state of the global environment Consuming Cities Ingemar Elander, Brendan Gleeson, Rolf Lidskog, Nicholas Low, 2005-08-12 This book is about cities as engines of consumption of the world's environment and the spread of policies to reduce their impact. It looks at these issues by examining the impact of the Rio Declaration and assesses the extent to which it has made a difference. Consuming Cities examines this impact using case studies from around the world including the USA, Japan, Germany, the UK, China, India, Sweden, Poland, Australia, and Indonesia. The contributors all have direct experience of the urban environment and urban policies in the countries on which they write and offer an authoritative commentary which brings the urban consumption dimension of sustainable development into focus **China Confronts Climate Change** Peter Koehn, 2015-12-14 China is an integral actor in any movement that will stabilize the global climate at conditions suited to sustainable development for its own population and for people living around the world. Assessments of China's climatic system, consequences, impact, and responsibilities need to take into account the strengths, weaknesses, and potential of subnational governments, non-governmental organizations, transnational non-state connections, and the urban populace in reducing greenhouse gas emissions. A multitude of recent local initiatives that have engaged subnational China in actions that mitigate emissions can be enhanced by powerful framings that appeal to citizen concerns about air pollution and health conditions. China Confronts Climate Change offers the first fully comprehensive account of China's response to climate change based on engagement with the global climate governance literature and current debates over responsibility along with specific insights into the Chinese context. Responsible implementation of any overarching climate agreement depends on expanding China's subnational contributions. To remain fully informed about GHG emissions mitigation, China watchers and climate change monitors need to pay close attention to bottom-up developments. The book provides a valuable contemporary resource for students, scholars, and policy leaders at all levels of governance who are concerned with climate change, environmental politics, and sustainable urban development The America Syndrome Betsy Hartmann, 2017-05-23 Has apocalyptic thinking contributed to some of our nation's biggest problems: inequality, permanent war, and the despoiling of our natural resources? From the Puritans to the present, historian and public policy advocate Betsy Hartmann sheds light on a pervasive but until now invisible theme shaping the American mindset: apocalyptic thinking, or the belief that the end of the world is nigh. Hartmann makes a compelling case that apocalyptic fears are deeply intertwined with the American ethos to our detriment. In The America Syndrome, she seeks to reclaim human agency and, in so doing, revise the national narrative. By changing the way we think, we just might change the world **Global Warming and China's Environmental Diplomacy** Hongyuan Yu, 2008 Since the early 1990s, there are two increasingly hot topics attracting numerous scholarly attentions in Chinese politics: first, it is the transformation of China's political system; second, it is China's increasingly involvement in international regimes. Nevertheless, until now, there are only a few scholars to work out the distinctive relations between them, and even less people work on the bureaucratic politics level. By explaining and evaluating the development of policymaking

coordination in the United Nations Framework Convention on Climate Change UNFCCC the author demonstrates the argument that international regimes have contributed to the development of coordination in Chinese Policymaking taking the UNFCCC as a departure
