Population Growth Change And Impact An Impact:

The Impact of Population Growth on Well-being in Developing Countries Dennis A. Ahlburg, Allen C. Kelley, Karen Oppenheim Mason, 1996-03-18 This book examines the nature and significance of the impact of population growth on the well being of developing countries in particular the effects on economic growth education health food supply housing poverty and the environment In addition because family planning programmes often significantly affect population growth the study examines the impacts of family planning on fertility and health and the human rights implications of family planning programmes In considering the book s conclusions about the impact of population growth on development four caveats should be noted First the effects of population growth vary from place to place and over time Thus blanket statements about overall effects often cannot be made Where possible the authors note the contexts in which population effects are strongest and weakest Second all of the outcomes examined in this book are influenced by factors other than population growth Moreover the impact of population growth may itself vary according to the presence or absence of other factors This again makes blanket statements about the effects of population growth difficult Throughout the chapters the authors try to identify other relevant factors that influence the outcomes we discuss or that influence the impact of population growth on those outcomes

Impacts of Human Population on Wildlife Trevor J. C. Beebee, 2022-06-30 Wildlife and the countryside are highly valued by people in the UK and for good reason Healthy habitats are invaluable assets and promote human wellbeing However they are under increasing threat from among other things relentless urban expansion and intensive modern agriculture These pressures largely stem from a major underlying cause the high and growing population of humans living in the UK This book provides an overview of wildlife in the UK and its recent status factors contributing to wildlife declines trends in human numbers international deliberations about the impacts of human population growth and the implications for the future of wildlife conservation in the UK The evidence based text includes comparisons of wildlife declines and their causes in other countries providing a global perspective This book is for ecologists naturalists and conservation biologists studying and working in academia or in consultancies as well as all those interested in wildlife conservation

Economic Evaluation of Climate Change Impacts Karl W. Steininger, Martin König, Birgit Bednar-Friedl, Lukas Kranzl, Wolfgang Loibl, Franz Prettenhaler, 2015-02-26 This volume deals with the multifaceted and interdependent impacts of climate change on society from the perspective of a broad set of disciplines The main objective of the book is to assess public and private cost of climate change as far as quantifiable while taking into account the high degree of uncertainty It offers new insights for the economic assessment of a broad range of climate change impact chains at a national scale The framework presented in the book allows consistent evaluation including mutual interdependencies and macroeconomic feedback This book develops a toolbox that can be used across the many areas of climate impact and applies it to one particular country Austria

The impact of UK overseas aid on environmental protection and climate change adaptation and mitigation Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2011-06-29 The Environmental Audit Committee states that the UK should only provide funding for multilateral institutions with strong environmental credentials The current scale of the World Bank's lending to fossil fuel powered energy generation is unacceptable and the Committee urges the Government to be prepared to vote against new World Bank funding for high emissions coal fired power stations The profile of climate change has increased hugely but there is far less awareness of the importance of protecting biodiversity and ecosystems The Committee believes that the Department for International Development DFID needs to publish a clear strategy on its approach to environmental issues to ensure that it gives them sufficient priority in its programmes and expenditure Every effort must be made to help emerging economies leap frog fossil fuels and fuel their growth with clean energy instead High levels of consumption in the UK increases demand on production in poor countries which leads to degradation of their natural resources The report calls on the UK Government to ensure that economic activity in Britain does not cancel out or even reverse the positive impact that UK aid is having overseas
