**Reproductive Health and Gender Equality** Guang-zhen Wang,2016-04-08 Since the late 1990s approaches to women's reproductive health has shifted

from a service based model to a human rights approach This approach associates reproductive health with freedom from discrimination and enjoyment of a satisfying and safe sex life and full access to information and services related to reproduction In spite of this shift and the global effort to promote women s reproductive health through the enhancement of human rights and gender equality progress has been very slow In this book the author fills a much needed empirical study of women s reproductive health The author assesses data from 137 developing countries or areas and challenges the prevailing bioscience and public health models by linking women s reproductive health to gender equality measures and development policies Discussion on abortion rights regional variations and reproductive health needs among refugees and internally displaced persons are also discussed This is a timely study which provides a theoretical and social policy basis for monitoring and improving women s reproductive health in developing countries This is particularly important in the light of insufficient research in the field and a lack of analysis on the empirical and theoretical linkages between reproductive health and gender equality The book will be of interest to researchers professionals and students interested in women s health issues gender women s studies and human rights

**Demography in the Age of the Postmodern** Nancy E. Riley,James

McCarthy,2003-07-24 Demography has developed into a remarkably coherent field and now stands as a firmly established discipline with strong ties to policy making agencies However in recent years there has been increasing recognition within demography of the limits of existing theories and methods particularly its absence of a strong critical tradition and its isolation from recent theoretical developments in other social sciences In this study Nancy Riley and James McCarthy use the lens of postmodernism to structure a critical analysis of the field of demography Paying particular attention to the fundamental epistemologies and methodologies that currently underlie the field they explore how postmodern perspectives might serve to energize the field and how demography could be enhanced by the introduction of insights from other social sciences Drawing on examples of new kinds of research in demography and related fields this is an important new book that seeks to reinvigorate the field of demography

*The Future of Ethics* Willis Jenkins,2013-10-28 The Future of Ethics interprets the big questions of sustainability and social justice through the practical problems arising from humanity s increasing power over basic systems of life What does climate change mean for our obligations to future generations How can the sciences work with pluralist cultures in ways that will help societies learn from

ecological change Traditional religious ethics examines texts and traditions and highlights principles and virtuous behaviors that can apply to particular issues Willis Jenkins develops lines of practical inquiry through prophetic pragmatism an approach to ethics that begins with concrete problems and adapts to changing circumstances This brand of pragmatism takes its cues from liberationist theology with its emphasis on how individuals and communities actually cope with overwhelming problems Can religious communities make a difference when dealing with these issues By integrating environmental sciences and theological ethics into problem based engagements with philosophy economics and other disciplines Jenkins illustrates the wide understanding and moral creativity needed to live well in the new conditions of human power He shows the significance of religious thought to the development of interdisciplinary responses to sustainability issues and how this calls for a new style of religious ethics     Encyclopedia of Women & Islamic Cultures Suad Joseph,Afsāna Nağmābādī,2003 Family Body Sexuality and Health is Volume III of the Encyclopedia of Women Islamic Cultures In almost 200 well written entries it covers the broad field of family body sexuality and health and Islamic cultures
