Handbook of Research on Economic and Social Impacts of Population Aging Bayar, Yilmaz, 2021-06-25 The increases in global wealth and the developments in the field of health have led to decreases in mortality rates increases in life expectancy and decreases in fertility rate leading to a population that is rapidly consisting more and more of older individuals The demographic changes affect nearly all parts of society including economics education health social security systems socio cultural activities and more Thus it is essential to study the impacts that an aging population will have on society The Handbook of Research on Economic and Social Impacts of Population Aging analyzes the economic and social impacts of population aging from a multidisciplinary perspective Covering topics such as life expectancy social welfare health social security and more this book is essential for social scientists sociologists demographers economists medical professionals government officials policymakers professionals researchers managers students and academicians looking to understand the effects of an aging population on modern society *Race, Class, and Nationalism in the Twenty-First-Century Caribbean* Scott Timcke, Shelene Gomes, 2024-11 This collection of more than a dozen essays focuses on the political dynamics of race class and nationalism in the contemporary Caribbean Despite the plethora of studies on nationalism in the Caribbean few have attempted to look at the phenomenon as a political invention that does not and cannot serve the interests of all how essentialist reductive overdetermining nationalism is a political and conceptual confusion that forever stalls the project of universal human emancipation Editors Scott Timcke and Shelene Gomes gather and frame chapters that in their collective expression help trace the process of race class and nationalism through the contours of a broader political economic and social geography These chapters argue that notions of racial identity have changed over time but those reformations are not independent of class rule or nationalism By using several case studies that span the Anglo Dutch French and Spanish Caribbean and focus on the development of political organizations hardships and ideology each of these essays continues the struggle for liberation against elite entrenchment Integrated Policies on Gender Relations, Ageing and Migration in Europe Dragana Avramov, R. L. Cliquet, 2005 *The Demographic Crisis in Europe* Richard R. Verdugo, 2021-05-01 By most accounts Europe has been mired in a demographic crisis since about 1970 By a demographic crisis is meant that Europe's dependency ratio is increasing and the net result has been declining populations and fewer workers to sustain society However there are certain issues that need attention Two topics seem to capture some of these issues The implications of the possible crisis and the crisis assessment The present volume is organized around both topics implications and assessment There are at least three contributions being made by the proposed volume To begin with while there are other issues related to the demographic crisis in Europe the present volume should motivate additional research Secondly the research in the proposed volume does not necessarily assume that there is a demographic crisis in Europe nor that it is consistent across national lines Thus each chapter in essence examines a different issue associated with the proposal that there is a crisis

Finally the present volume makes several methodological contributions For example the chapter by David Swanson uses non Bayesian modeling in studying infant mortality Richard Verdugo examines the dependency ratio and selected factors on economic growth in selected European nations Kposowa and Ezzat conduct an assessment Martins examines variation in the path toward a crisis Johnson examines humanitarian migration and the crisis Edmonston examines the association between geopolitics and the crisis Population Change and Rural Society William A. Kandel, David L. Brown, 2006-10-12 CALVIN L BEALE In considering how to introduce the subject of rural population change in st the 21 Century I nd myself re ecting on my own experience as a demographer for the U S Department of Agriculture When I arrived at the Department the post World War II modernization of farming was well under way Each year my colleague Gladys Bowles and I had the unpopular task of announcing how much the farm population had decreased in the prior year It was hard to say that the phenomenon was someone s fault Dramatic reductions in labor requirements per unit of agricultural output were occurring everywhere and not just in the United States But politically blame had to be assigned and whichever political party was not in the White House was certain to place the blame squarely on the current administration The demographic consequences of this trend were major In a 22 year period from 1941 to 1962 the net loss of farm population from migration and cessation of farming averaged over a million people per year It took eight years after the war before an administration was willing to begin to talk about the need to diversify rural employment By that time farm residents had already become a minority of rural people However well into the 1970s I continued to receive inquiries from people who still equated rural with farm or who could not envision what rural nonfarm people did for a living *Proceedings of the 1st International Conference of Economics, Management, Accounting, and Business Digital (ICEMAB 2024)* Echo Perdana Kusumah, Yanto Yanto, 2024-12-21 This is an open access book The first ICEMAB serving as an international conference aims to foster cross disciplinary dialogue stimulate innovation and offer fresh insights into the convergence of digital business management accounting and economics It would be beneficial for scholars professionals and legislators who wish to stay informed and engaged in our rapidly evolving digital landscape Biennial Report of the National Institutes of Health National Institutes of Health (U.S.), 1989

The Changing Canadian Population Barry Edmonston, Eric Fong, 2011-01-10 Current social and economic changes in Canada raise many questions Will Canada s education system be able to maintain its competitiveness when faced with increasing globalization Will the growing numbers of immigrants and their children be successfully integrated How will Canada s social institutions respond to a rapidly aging population The Changing Canadian Population assembles answers from many of Canada s most distinguished scholars who reassess the current state of society and Canada s preparedness for the challenges of the future **Pensions and Population Ageing** John Creedy, 1998 Investigates pensions and pension finance and using several types of economic models examines ageing and social expenditure pension finance and analyses alternative arrangements for the provision of retirement incomes using a lifetime simulation model Based on trends from
