Development and Women's Reproductive Health in Ghana, 1920-1982 Holly Ashford, 2022-12-09 This book investigates the history of women s reproductive health in Ghana arguing that between the 1920s and 1980s it was largely driven by discourses of development and population control rather than a concern for women s health or rights Between the 1920s and 1980s the choices that Ghanaian women made regarding their reproductive health were defined by development policy and practice Spanning the

colonial and immediate postcolonial periods this book demonstrates that whilst the substance of development discourse shifted over time principles of development continued to be used to impact and legitimise reproductive health policy and practices well after independence The book explores Ghana's pluralist health system the introduction of maternal and child welfare the dominance of the Red Cross in Ghana's maternal and child health landscape nationalist pronatalism and global population activism In order to understand how global iterations of development and health policy impacted ordinary lives in Ghana the author uses evidence from multiple levels including private papers national archives and records of international and transnational organisations Providing balanced archival perspectives the book includes extensive oral history interviews carried out with both rural Ghanaian women and traditional birth attendants as well as with midwives doctors and family planning fieldworkers This book will have an important impact on a number of historical fields including Ghanaian history global health history global histories of population and family planning and histories of development It will be of interest to researchers and students in the history of public health development Africa Ghana and gender *Annual Report United States. very different sort of future A Life against the Grain Julian L. Simon, 2018-12-20 In his long and distinguished career as a writer and scholar Julian Simon came to be known as one of the leading and most controversial authorities on population economics An immensely productive writer his work is unified by a basic core belief that human intellect and ingenuity are ever renewable resources in the use and preservation of natural resources Inevitably Simon's position provoked the hostility of doctrinaire environmentalists both in academia and in the movement at large However Simon's arguments were invariably built from facts and powerful evidence that stood him well in many high profile public debates The first part of Simon's autobiography takes the reader through his childhood his years as a midshipman and then as an officer in the Navy plus a stint in the Marines and his experiences as a copywriter in an advertising firm Simon's plan after receiving his Ph D from the University of Chicago was to be an entrepreneur which would afford him enough money to care for his parents and allow him free time for writing fiction He ran a small mail order business for two years during which time he wrote his first book *How to Start and Operate a Mailorder Business* which has since gone through seven editions Deciding to seek a professional career in 1963 he accepted a position at the University of Illinois Although he spent thirty five years of his life as a faculty member at three universities his autobiography contains almost no discussion of departmental affairs or university politics topics about which Simon had little or no interest Rather after the personal chronology and experiences the book includes substantive chapters on research methods population economics and immigration It also explains how Julian Simon became the economist he was He analyzes crucial periods in his life when he developed his ideas on fundamental issues Written in an engaging and amusing manner Julian Simon's autobiography is a combination of personal memoir and professional contribution to important ideas in economics research methods and demography His observations and personal reflections will interest the general reader on a humanitarian level as well as environmentalists sociologists and economists on a professional level **Welfare Racism** Kenneth J. Neubeck, Noel A. Cazenave, 2002-09-11 *Welfare Racism* analyzes the impact of racism on US welfare policy Through historical and present day analysis the authors show how race based attitudes policy making and administrative policies have long had a negative impact on public assistance programs The book adds an important and controversial voice to the current welfare debates surrounding the recent legislation that abolished the AFDC

Razing Rafah Fred Abrahams, Marc E. Garlasco, Darryl Li, 2004 This report show most of the destruction in Rafah occurred along the Israel controlled border between the Gaza Strip and Egypt During regular nighttime raids and with little or no warning Israel forces used armored caterpillar D9 bulldozers to raze blocks of homes at the edge of the camp incrementally expanding a buffer zone that is currently up to three hundred meters wide The pattern of destruction strongly suggests that Israeli forces demolished homes wholesale regardless of whether they posed a specific threat in violation of international law In most cases Human Rights Watch found the destruction carried out in the absence of military necessity
