## **Population Explosion:**

*The Population Explosion* Paul R. Ehrlich, Anne H. Ehrlich, 1990 Food resources Agriculture Global ecosystem greenhouse effect acid rain desertification Health epidemics and disease Economic management Solutions **Challenge of World Population Explosion** United States. General Accounting Office, 1976 Population Explosion Ewan McLeish, 2009-08-15 Examines some of the negative impacts of the earth's population explosion this concept is tempered with the potentially sustainable solutions that may be available to offset this impact *The Population Explosion and the Green Revolution* United States. Congress. House. Committee on Appropriations. Subcommittee on Departments of Labor, and Health, Education, and Welfare, and Related Agencies, 1971 The great errors of humanity; the population explosion Luis Arturo Acevedo Acevedo, 2019-08-05 Every time I get up in the last 25 years or so I have been noticing the great changes that Medellin Colombia has suffered the city where I was born it is impressive the amount of forest that has been lost by the number of people who have been invading the land to build a house of tin and wood and thus demand of the government services of water electricity and improvements The arrival of so many people who come from villages at war or from remote areas looking for better opportunities or simply opportunists looking for more land to invade With the arrival of this number of people it has also changed the means of transport which were not so full were faster without so much traffic and where the metro system was more comfortable quiet agile and without congestion and where the avenues regional and motorways did not have as much traffic or as much car truck and motorcycle **The Population Explosion and the Green Revolution** United States. Congress. House. Appropriations, 1971 *The Population Explosion* Karl Sax, 1956 POPULATION EXPLOSION: A Root Cause of All Problems K. P. Agrawal, Population is a big hurdle and a drag on growth India's Population is projected to touch 1.5 billion by 2030 It may surpass China's in 2024 and accounts for 18% of the World's total population Every nook and corner of India is a clear display of increasing population Whether you are in a metro station airport railway station road highway bus stop hospital shopping mall market temple or even in a social and religious gathering we see all these places are over crowded at any time of the day Due to steep rise in population there is extreme poverty unemployment shortage of land and food pollution poor quality of life migration of population etc More than 20% of the population don't have even two square meals of the day what to speak of other facilities Overpopulation will also place great demands on resources and land leading to widespread environmental issues in addition to impacting socio economic conditions and standards of living Overpopulation issue is further compounded by the difficulty in providing solutions for the problems The book covers issues such as Population Trend Causes Impacts and Way Forward to Combat Population Explosion The book will be of immense value to policy makers programme planners public and private sectors NGOs social and environmental workers demographers developmental practitioners and the people in general who dream to see A Paradise On Earth The views expressed by the author are personal and derived after a long study of valued documents The End of World

Population Growth in the 21st Century Warren C. Sanderson, 2013-12-19 The 20th century was the century of explosive population growth resulting in unprecedented impacts in contrast the 21st century is likely to see the end of world population growth and become the century of population aging We are currently at the crossroads of these demographic regimes This book presents fresh evidence about our demographic future and provides a new framework for understanding the underlying unity in this diversity It is an invaluable resource for those concerned with the implications of population change in the 21st century The End of World Population Growth in the 21st Century is the first volume in a new series on Population and Sustainable Development The series provides fresh ways of thinking about population trends and impacts *The Population Explosion*, 1971 Population: Explosion Or Control? Albert Nevett, 1964 **Population Growth** Ronald

Freedman, 2017-07-05 The population of the modern world continues to grow at a rate unprecedented in human history How are we to explain this massive increase in the number of living people What is its consequence now and for the future How have populations changed in size and structure since the advent of industrial technology Can we predict the population trends in developing countries These and many other significant questions are dealt with in a persuasive yet accessible manner in Ronald Freedman's pivotal Population Growth Modern population trends are unique in historical perspective describing them as part of a vital revolution is not an exaggeration The more popular term population explosion is less accurate because it refers to only one aspect of the current situation the unprecedented growth rates In the last two centuries other important trends have developed also without precedent in all of the previous millennia of human history While the size of population growth is very important in itself the essays in this volume demonstrate that many other aspects of structure and change in populations are equally important In readable non technical language these collected essays analyze the most important modern trends in world population The essays include comprehensive discussions of population theory analyses of population trends and prospects in the United States and surveys of population trends in other major areas of the world As a survey of current population problems this book will be a library staple for those involved in international development programs sociologists family planning workers and everyone concerned with the contemporary vital revolution in population **Dramatic Global Population Growth Embraces the Growing Older Population** Edward A

McKinney, 2018-11-16 The world is witnessing a dramatic demographic population growth explosion across all age groups that had its beginning around the early 1800s when the first billion people in population was recorded Most importantly has been an increasing growth in the older population Does population aging matter in the twenty first century Yes it matters because as research has pointed out the increasing older population globally will have a significant impact on all essential societal systems the family pensions and retirement and financial institutions as well as medical health and social systems This growth explosion or phenomenon will affect all continents countries and regions regardless of economic political and military power Causative factors for this global growth in population have come about primarily as a result of medical

advances innovations agricultural development and the industrial revolution especially the development of railways seaways and highways A major emphasis of the book focuses on several very important factors the growing older population as aforementioned especially its impact on all of essential societal systems and the subject of ageism Ageism becomes extremely important considering that the growing older population the silver tsunami represents the new majority This new majority will no longer be ignored Gerontologists for years have attempted to call attention to the fact Expectations for old people are based on negative age stereotypes Members of American society generally expect and even encourage the aged to be asexual intellectually rigid unproductive ineffective and disengaged Seniors are supposed to stay out of the way sit in their rocking chairs and enjoy the golden years They are expected to be inactive invisible but happy Levin J and Levin W Ageism Prejudice and Discrimination Against the Elderly California Wadsworth Publishing 1941 pp 97 98 Speaking of being ignored why aren't more members of the older population involved at the decision making tables in shaping a society for all ages After all they would bring years of experiences skills knowledge and values for creating a society for all ages in the twenty first century with justice and human rights for all Currently there is a global movement with a goal of the eradication of ageism in all of its forms Some will recall from several decades ago the Grey Panther Movement in America with a similar mission of the eradication of all injustices at the time being experienced by the older population The current movement says The time is now not later One major social injustice being experienced by the growing old population globally is the lack of income security in old age including the lack of access to other essential services such as medical health and social including long term care More than 50 percent 51 percent of older persons globally do not have basic income security or a social pension in retirement A more alarming statistic is that in Sub Saharan Africa forty seven countries eight two percent 82.5 of retirees do not have a social pension Yes for the older population the new majority the time is now for correcting the aforementioned injustices Maybe what is needed is a human seismic force comprising the new majority to initiate a social movement with a goal of the eradication of all forms of ageism and ensuring that the growing older population will live in dignity and respect in later life including social protection pensions
