Population Geography and the Developing Countries John I. Clarke, 1971      *Population Geography and the Developing Countries* John Innes Clarke, 1979      **Population Geography and the Developing Countries** J. I. Clarke, 1974

Population Geography and the Developing Countries John I. Clarke, 1974      **A Geography of Population: World Patterns** Glenn Thomas Trewartha, 1969 Study of the geographical aspects of variations in population patterns and migration movements from pre historical times to the present Bibliography at the end of each chapter maps references and statistical tables      Population Geography John I. Clarke, 2013-10-22 Population Geography Second Edition focuses on the relationships between population distribution and environment This book aims to introduce population study explain the geographical approach and suggest a frame on which to hang regional studies of population This edition begins by defining population geography followed by a discussion on the types and problems of data and world distribution of population The measures of population density and distribution urban and rural populations patterns of fertility and mortality and migrations are elaborated The patterns of population composition that includes age structure sex composition marital status families and households economic composition nationality language religion and ethnic composition are also considered This text concludes with a discussion on population growth and resources This publication is intended as an introduction to population study for geographers      **The More Developed Realm** Glenn T. Trewartha, 2016-06-06 The More Developed Realm

1984, □□□□□□ □□□□□□      **Population Geography and the Development Countries** John I. Clarke, 1971

**Population and Land Use in Developing Countries** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1993-02-01 This valuable book summarizes recent research by experts from both the natural and social sciences on the effects of population growth on land use It is a useful introduction to a field in which little quantitative research has been conducted and in which there is a great deal of public controversy The book includes case studies of African Asian and Latin American countries that demonstrate the varied effects of population growth on land use Several general chapters address the following timely questions What is meant by land use change Why are ecological research and population studies so different What are the implications for sustainable growth in agricultural production Although much work remains to be done in quantifying the causal connections between demographic and land use changes this book provides important insights into those connections and it should stimulate more work in this area      *Population and Development in the Third World* Allan M. Findlay, Anne Findlay, 2008-01-28 Allan and Anne Findlay argue that a nation's human population is a vital resource in the development process Changes in its composition increased life expectancy combined with a falling birth rate for example can have profound effects upon a society Warfare and mass migration of male workers also have long reaching effects on those left behind The rapid growth of Third World populations has often incorrectly been identified as the major force preventing

more rapid economic development Population pressure has been known to generate technological breakthroughs Their final chapter examines family planning programmes and concludes by asking who benefits most from population policies and questioning the right of developed countries to advocate family planning programmes for Third World nations

**Population and Development** W.T.S. Gould, 2008-11-19 Population and Development addresses important issues at the heart of the problems of developing countries How these countries address the common difficulties of population growth including mortality and fertility decline population redistribution including internal migration and urbanization and also international migration for both source countries and for destination countries How and why has population change affected development both positively and negatively How and why has development affected population change both growth and distribution The book opens with an introduction preceding the ten substantive chapters covering some of the broader issues for population studies and development studies and the relationships between them The first three chapters set out the main concepts and theoretical discussions on how population affects development and also how development affects population Detailed chapters then cover each of the three main components of population change fertility mortality and finally migration These are followed by chapters on the impacts of age structures including the potential for a demographic dividend and of the more qualitative aspects of human resource development through formal education and ICTs with further chapters on population policies and population futures The book incorporates illustrative text boxes and case studies on regions in Africa the Middle East and Asia which elaborate the broader theoretical and conceptual substance of the ten major chapters Each chapter has Discussion Questions and Sources and Further Reading sections and there is an extensive integrated References section The arguments of the book bring together a large but fairly loosely integrated literature from population studies development studies and geography in a conceptually coordinated empirically wide ranging and challenging discussion It is targeted at an audience in undergraduate courses in Geography and in Masters courses in Development Studies and Population Studies The book's succinct but erudite structure means it can be used either as a course text book or as a basic reference on a range of current issues and likely concerns at the interface between Geography Development Studies and Population Studies

*Geography and Population* John Innes Clarke, 1984 Arising from the activities of the International Geographical Union's Commission on Population Geography this volume reveals the variety of approaches and applications of population geography over time and space It is unique in that it demonstrates how the subject has evolved and diversified particularly since mid century Containing papers by 27 authors from 15 countries the work is truly international in scope

**Population Redistribution and Development in South Asia** L.A. Kosinski, K.M. Elahi, 2012-12-06 The mutual relationship between change in population distribution and its determinants and consequences on one hand and social and economic development on the other is becoming an increasingly important area of concern for researchers policy makers and planners alike During the last several years the International Geographical Union Commission on Population Geography has

devoted much of its attention to this problem and organized a series of international meetings focusing on population redistribution and its ramifications in different parts of the world During one such meeting held in 1980 in Karachi Pakistan some thirty papers were submitted by participants coming mostly from five countries in South Asia Bangladesh India Nepal Pakistan and Sri Lanka The present volume is an outcome of that symposium but it should not be regarded merely as a report of proceedings these have been published separately by the Commission Furthermore all Pakistani papers were published in their original version in a separate volume edited by M I Siddiqi who coordinated local arrangements for the meeting on behalf of Karachi University This present volume offers only a selection of the original papers all substantially edited and thoroughly revised and brings them together with additionally solicited texts All original figures have been redrawn and tables and references have been updated and standardized as much as possible

*Population and Development* W.T.S. Gould, 2015-05-08 The new edition of *Population and Development* offers an up to date perspective on one of the critical issues at the heart of the problems of development for all countries and especially those that seek to implement major economic and social change the reflexive relationships between a country's population and its development How does population size distribution age structure and skill base affect development patterns and prospects How has global development been affected by regional population change Retaining the structure of the well received first edition the book has been substantially revised and updated The opening chapters of the book establish the theoretical and historical basis for examining the basic reflexive relationship with exploration of the Malthusian perspective and its critics to examine how population change affects development and exploration of the Demographic Transition Model and its critics to examine how why and to what extent development drives population change These are followed by empirically rich chapters on each of the main components of population change mortality fertility internal and international migration age structures and skill base each elaborating key ideas with detailed and contrasting case studies from all regions of the developing world There are concluding and more integrative discussions on population policies and global population futures Bringing together Population Studies Development Studies and Geography the new edition of *Population and Development* is a key resource for undergraduate and postgraduate students across a range of programmes with specialist modules on population change There is a large bibliography with major new sections identifying a wide range of online resources for further study Each chapter contains a reading guide with discussion questions The text is enlivened by a number of case studies from around the world most of which are new or have been substantially revised Written by a leading international scholar in population the book successfully integrates cutting edge academic research with the focus and efforts of international development agencies

The Less Developed Realm Glenn Thomas Trewartha, 1972 Study of the human geography of developing areas in Latin America Africa and Asia and of each individual developing country therein analyses demographic trends with regard to mortality birth rates population growth population density etc and covers the geographic distribution of illiteracy
