## **Population In The Global Arena:**

**Population in the Global Arena** Parker G. Marden, 1982      *Population in the Global Arena* Parker G. Marden, 1981-06-01      **Population in the Global Arena** Parker G. Marden, 1982      *A World of Populations* Heinrich Hartmann, Corinna R. Unger, 2014-09-01

Demographic study and the idea of a population was developed and modified over the course of the twentieth century mirroring the political social and cultural situations and aspirations of different societies. This growing field adapted itself to specific policy concerns and was therefore never apolitical despite the protestations of practitioners that demography was natural. Demographics were transformed into public policies that shaped family planning, population growth, medical practice and environmental conservation. While covering a variety of regions and time periods, the essays in this book share an interest in the transnational dynamics of emerging demographic discourses and practices. Together they present a global picture of the history of demographic knowledge.      Participation, Representation and Global Civil Society Jane W. Muthumbi, 2010-03-18

This book focuses on religious fundamentalists' mobilization efforts against abortion in three United Nations Conferences: Using U.S. Christian and Egyptian Islamic fundamentalist groups as empirical cases, this account highlights these groups' efforts against the adoption of abortion in the 1984 Mexico Conference on Population, the 1994 Cairo conference on Population, and the 1995 Beijing Conference on Women. The account, which examines Northern U.S. Christian and Southern Egyptian Islamists' anti-abortion networks, participation and representation within these forums, provides a unique glimpse into their engagement within international institutions. It also explores whether Northern and Southern groups' growing involvement in decision-making processes has lessened the inequality that historically characterized North-South relations in the international arena and compares the strategies and tactics used by these groups as they attempted to influence the debate on reproductive rights within the conferences, PrepComs regional forums, NGO Forums, and the state-dominated plenary sessions. It also assesses the extent to which these entities were effective in influencing outcomes in these arenas and comments on North-South relations in a contemporary context. Information on these groups was obtained from interviews with leaders of the U.S. Christian and Egyptian Islamic fundamentalist groups as well as secondary sources and official U.N. documents.      **International Political Economy in Context** Andrew C. Sobel, 2013

Although many international political economy texts offer good descriptions of what events have occurred in global economic and political relations, they make little attempt to develop explicit theoretical frameworks explaining why. Andrew Sobel's *International Political Economy in Context: Individual Choices, Global Effects* takes a micro approach to international political economy that considers the fact that individuals, not nations, make choices. Grounding policy choices in the competitive environs of domestic politics and decision-making processes, Sobel illustrates how policymakers choose among alternatives, settling on those that are most in sync with their self-interest. The book is structured to build students' skills for a sophisticated understanding of how and why events unfold in the international political economy. Students become

versed in the primary assumptions and structural macro conditions of economic and political geography in the global arena. An examination of micro level conditions and mechanisms introduces the factors that influence political and economic outcomes. Students are then able to use those primary assumptions and micro level arrangements to make sense of past and present changes in the global political economy. Those familiar with Sobel's first volume *Political Economy and Global Affairs* will easily find their way through this new book. Anyone looking for a compelling accessible and fully integrated rational choice perspective on international political economy will find it here.

**Environmental Change and its Implications for Population Migration** Jon D. Unruh, Maarten Krol, N. Kliot, 2008-01-18 This volume provides an ample overview of state of the art understanding of the multi dimensional phenomenon of migration in the characterisation of migration drivers in environmental and agro economic case studies and modelling issues as well as socio political analyses. The analysis is geared to the consequences of climatic change and the effects on soil water and extreme weather that will drive populations to migrate.

**Growth and Its Implications for the Future** United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment, 1973

**Global Studies** Tuo Cai, Zhenye Liu, 2020-06-07 Since the 1950s globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political economic military environmental and social fortunes of mankind and yet the existing theories in humanities and social sciences have been fundamentally built upon the traditional nation state model. These two volumes a pioneering work on global studies to be published out of China aims at creating a new theoretical framework against the backdrop of globalization. This volume introduces core concepts and critical issues deploying globalization as a theoretical framework and redefining the interrelationship between politics economics law and globality. The two volumes are an essential reference for scholars and students in politics economics international relations and law.

European Populations Van der Kaa, 2012-12-06 The changing demographic landscape which Europe is facing today and in the next decades reflects the past These changes constitute important challenges to European populations and societies Shifts in fertility and family formation in health morbidity and mortality in internal and international migration as well as changes in age structures in households in labour forces and in population growth and decline will influence the living conditions and well being of Europe s population directly or indirectly The demographic challenge also concerns the environment local regional and national developments education production and consumption patterns economic competitiveness social security housing employment and transport and health and social care provisions These issues their mechanisms determinants and consequences also challenge the scientific study of population As a major forum and market place for scientific demographic debate the 1999 European Population Conference EPC99 was organized to take up this challenge On the threshold of the third millennium European populations are united in diversity and face major demographic issues

*International Migration and the Future of Populations and Labour in Europe* Marek Kupiszewski, 2013-02-11 The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of

theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends. These theoretical and empirical considerations lead to defining scenarios of future mortality, fertility, economic activity and international migration which have been fed into a projection model producing various future population dynamics and labour force trajectories. In addition, simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe. The results presented in this book allow researchers, governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures. The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view.

*Challenged Earth: An Overview Of Humanity's Stewardship Of Earth*  
Stephen F Lincoln, 2006-01-11. This timely book provides a comprehensive insight into the challenges facing humanity and Earth in the 21st century. It opens with a discussion of the domination of all the continents and oceans by a growing human population. This is followed by an appraisal of the extent to which water and food supplies will be able to accommodate this population which may reach eleven billion by 2100. The rapidly increasing ability to change biology and evolution through genomics is considered next and complements a discussion of disease which is viewed largely as an evolutionary struggle between humanity and pathogens. A seemingly insatiable demand for energy, future energy supplies and the impact of their use on climate and attempts to ameliorate these effects are next examined. The book concludes with a discussion of the partial destruction of the ozone layer and the international effort to repair the damage.

*Alleviating World Suffering*  
Ronald E. Anderson, 2017-03-01. This is the first volume on the subject of the alleviation of world suffering. At the same time it is also the first book framing the fields of global socio-economic development, world health, human rights, peace studies, sustainability and poverty within the challenge of alleviating suffering and improving quality of life. Both international studies and global development have become specialized and fragmented whereas this work assembles all of these development fragments together in order to determine whether common ground exists to make headway in reducing global suffering. Leading experts in these various fields of development and suffering have been recruited worldwide to give scholarly assessments of the major human problems and how they can be successfully tackled.
