Porque Chiapas:

Cuestion entre México y Guatemala Francisco Miguel Martínez Martín, 1882 *The Zapatista "Social Netwar" in Mexico* David Ronfeldt, John Arquilla, Graham Fuller, Melissa Fuller, 1999-02-03 The information revolution is leading to the rise of network forms of organization in which small previously isolated groups can communicate link up and conduct coordinated joint actions as never before This in turn is leading to a new mode of conflict netwar in which the protagonists depend on using network forms of organization doctrine strategy and technology Many actors across the spectrum of conflict from terrorists guerrillas and criminals who pose security threats to social activists who may not are developing netwar designs and capabilities The Zapatista movement in Mexico is a seminal case of this In January 1994 a guerrilla like insurgency in Chiapas by the Zapatista National Liberation Army EZLN and the Mexican government's response to it aroused a multitude of civil society activists associated with human rights indigenous rights and other types of nongovernmental organizations NGOs to swarm electronically as well as physically from the United States Canada and elsewhere into Mexico City and Chiapas There they linked with Mexican NGOs to voice solidarity with the EZLN's demands and to press for nonviolent change Thus what began as a violent insurgency in an isolated region mutated into a nonviolent though no less disruptive social netwar that engaged the attention of activists from far and wide and had nationwide and foreign repercussions for Mexico This study examines the rise of this social netwar the information age behaviors that characterize it e g extensive use of the Internet its effects on the Mexican military its implications for Mexico's stability and its implications for the future occurrence of social netwars elsewhere around the world

N. Sangmpam,2012-02-01 Two competing approaches currently dominate the debate about the state and institutions in developing countries The first projects a picture of transnational vertical uniformity descending from the West to developing countries and views liberal democracy as the only game in town In this view the state and institutions resemble or ought to resemble those in the West The second by contrast explains political outcomes by local idiosyncrasies and regional variations in institutions In his original approach to third world politics S N Sangmpam challenges both views by uncovering important similarities in the political features of developing countries He shows that they share political behaviors and features unaccounted for in either local idiosyncratic or liberal democratic theories These behaviors converge toward a common property overpoliticization that defies political compromise leading to an overpoliticized state Sangmpam provides a wealth of empirical historical and quantitative evidence from Latin America Asia Africa and the West and demonstrates the overpoliticized state constitutes the cornerstone of an integrated theory of politics in developing countries
