multidisciplinary perspective The main target audience of the book includes scholars and graduate students in urban studies spatial planning urban and regional economics logistics geography and transport geography with an interest in studying port geography and the port city interface port infrastructure development and port hinterland dynamics it will also benefit policymakers and urban planners whose work involves these topics Port Management Stephen Pettit,Anthony Beresford,2017-12-03 Port Management looks at the numerous types of business interactions that occur at active ports These include cooperating with other ports coordinating deliveries with ships overseeing port development advertising and promotion and enforcing security and environmental protection initiatives Including research practical insights and case studies this book looks at quantitative methods and market analysis maritime logistics port planning and pricing and commercial law Port Management covers all the main aspects of management administration and policy and fills existing gaps in the literature in this area Edited by two leading academics who have conducted research for the Department of Transport and the United Nations this text is international in scope and includes research based findings from a global team of contributors It provides fascinating insights into the geography economics politics and trade involved in port management Online supporting resources include lecture notes lesson plans and PowerPoints *Port Economics* Kevin Cullinane,Wayne K Talley,2006-06-22 A port or seaport is a place that provides for the vessel transfer of cargo and passengers to and from waterways and shores Port economics is concerned with the study of the economics of port services Users of port services are those that utilize the port as part of the transportation process of moving cargo and passengers to and from origin and destination locations Users include transportation carriers such as shipping lines railroads and trucking firms that perform these movements and shippers and individuals that provide the cargo and themselves as passengers to be transported Port users demand port services whereas port service providers such as the port terminal operator supply port services to port users Port economics and shipping economics comprise the branch of economics known as maritime economics This volume provides original contributions to the study of port economics 1 the evolution of port economics 2 economic theories of the port port cost functions and port investment and 3 empirical evidence on the relative efficiency of ports the impact of ports on international maritime transport costs the competitiveness of ports and the impact of deregulation on dockworker wages Provides original contributions to the study of port economics Examines the evolution of port economics economic theories of the port and empirical evidence on the relative efficiency of ports the impact of ports on transport costs and the competitiveness of ports Globalisation and the Changing Face of Port Infrastructure Prabir De,2009 Inefficient ports can stall a country's trade growth and also increase the costs of transportation Rising inefficiencies in ports have therefore forced the governments all over the world to deregulate the port system The port sector in several developing countries has been undergoing revolutionary transformation from a subsistence infrastructure resource into a more capital intensive commercially oriented facility during the last two decades In India awareness towards the impact of port infrastructure on

economic development in general and international trade in particular has increased in recent years partly as a result of rising trade transportation costs One of the objectives of this book is therefore to understand the role the port plays in India s economic development The book tries to quantitatively evaluate the structural metamorphosis in Indian port sector The main emphasis of the book is on performance evaluation technological change total factor productivity growth market concentration and competitiveness of Indian ports for the last two and a half decades This book deals with these vital issues and questions through a detailed analytical framework Above all one protracted objective of this book is to create a ground for discussion on various aspects of port development and the resultant policy action

Devolution, Port Governance and Port Performance Mary R Brooks, Kevin Cullinane, 2006-11-13 The relationship between ports and governments has changed profoundly over the past quarter of a century Many governments have sought to extract themselves from the business of port operations and in many cases the provision of port services has devolved to local governments communities or private management and administration As such devolution implies a change in governance model this trend raises questions about consequent performance This issue examines the changed port management environment focusing particularly on government policies such as devolution regulatory reform and newly imposed governance models all of which have exerted a significant influence over the nature of that changed environment The issue is structured so as to first explore the devolution and port reform approaches for 14 countries or regions before examining how ports are governed and what the choice of governance might mean for their performance Part I introduces the issue and provides a framework for defining the basic concepts involved in devolution it paints a picture of the current port environment its likely future evolution and the expected impact this will have on the functioning of ports Part II examines the port industry in 14 countries or administrations and presents the thinking behind any devolution programs that have been implemented Part III focuses on port governance and devolution generally and examines governance from both strategic management and economics perspectives including topics such as governance models supranational governance and stakeholder conflict Part IV examines the measurement of port performance and closes by providing conclusions and a future research agenda This issue will be of interest to port managers government officials and academics alike Examines the relationship between ports and governments with a focus on devolution Divided into sections that provide an overview evaluate the port industry discuss port governance and suggest new measures of port performance 14 countries or regions are addressed

Technical Landfills and Waste Management Abdelkader Anouzla, Salah Souabi, 2024-03-16 A zero waste society and the circular economy trend are urgently needed Even if achieving 100% trash recycling and a fully circular economy may not always be attainable aiming toward this goal might result in a sustainable future Municipal solid wastes pose a hazard to the environment because of open burning landfills reckless disposal and many other factors Waste is being thrown away in more significant quantities and is made up of several different materials Municipal solid waste MSW characteristics must be

carefully considered when developing implementing or modifying solid waste management systems Local waste variables that vary with cultural climatic socioeconomic and institutional capacities are crucial for developing efficient waste management techniques This book provides a comprehensive overview of landfills situation their categories and the types of garbage they receive The final section of the study provides an overview of prospective waste management techniques their restrictions and the potential areas for further research on landfill sites This book has the advantage that world class experts in their respective fields have written each chapter As a result this book presents a balanced picture across the whole spectrum of chapters on municipal solid wastes
