Portrait Of Barbara:

Women and Portraits in Early Modern Europe Andrea Pearson, 2016-12-05 As one of the first books to treat portraits of early modern women as a discrete subject this volume considers the possibilities and limits of agency and identity for women in history and with particular attention to gender as categories of analysis for women's images Its nine original essays on Italy the Low Countries Germany France and England deepen the usefulness of these analytical tools for portraiture Among the book's broad contributions it dispels false assumptions about agency's possibilities and limits showing how agency can be located outside of conventional understanding and conversely how it can be stretched too far It demonstrates that agency is compatible with relational gender analysis especially when alternative agencies such as spectatorship are taken into account It also makes evident the importance of aesthetics for the study of identity and agency The individual essays reveal among other things how portraits broadened the traditional parameters of portraiture explored transvestism and same sex eroticism appropriated aspects of male portraiture to claim those values for their sitters and as sites for gender negotiation resistance and debate invoked considerable relational anxiety Richly layered in method the book offers an array of provocative insights into its subject

looking in particular at Italian painting of the 16th century For understandable reasons art historians sometimes neglect the role of music and especially that of musical notation when studying works of art These studies not only identify musical compositions wholly or partially inscribed in paintings and tapestries ceramics prints as well but also seek reasons why these particular musical compositions were included and analyse their relevance to the scene depicted Furthermore as many of these studies show identifying a musical composition especially if it has a text leads to the formation of ideas about iconographical functions and thus augments interpretations of the visual art
