Portraying the Guru Atsushi Ikeda, 2024-09-24 Brings to light the evolution of Sikh art from the eighteenth to the twentieth century Breaking fresh ground in the study of Sikh art after the pioneering contributions of W. H. McLeod and B. N. Goswamy this book on Sikh art evolution is centred on portraits of Sikh Gurus from the eighteenth to the twentieth century It examines around two hundred and fifty texts of art of various mediums scattered across museums and private collections the world over Ikeda artfully proves how Guru Nanak's portraiture catered to the spiritual and cultural needs not only of ordinary Sikhs but also satisfied the expectations of the newly formed urban middle class Including critical review of Harjot Oberoi's study and emphasizing the significant role of Sikh art in the formation of a distinct Sikh community's identity

the author takes note of how the Singh Sabha Movement 1873-1909 and the Akali Movement of 1920 onwards popularized devotional portraits of Guru Nanak even though idolatry is forbidden in the sacred text Guru Granth Sahib. It underlines how there was a paradigm shift in the mentality of Sikh society under the colonial impact of the British Raj. This highly illustrated volume will not only be appreciated by students of visual arts, researchers and academics but also by the universities across the world in which Sikh Studies are taught. Atsushi Ikeda, a historian of South Asian art specialising in Sikh art and visual culture, holds an MFA from Kyoto City University of Arts, an M Res from Kyoto University and a doctorate from SOAS University of London. Having worked as an art director in a Japanese company, he currently serves as the Chief Director of the Japanese Organisation for the Promotion of Indian Art and Culture (JOPIAC).

Aesthetic Hybridity in Mughal Painting, 1526-1658 Valerie Gonzalez, 2016-03-03

The first specialized critical aesthetic study to be published on the concept of hybridity in early Mughal painting, this book investigates the workings of the diverse creative forces that led to the formation of a unique Mughal pictorial language. Mughal pictoriality distinguishes itself from the Persianate models through the rationalization of the picture's conceptual structure and other visual modes of expression involving the aesthetic concept of mimesis. If the stylistic and iconographic results of this transformational process have been well identified and evidenced, their hermeneutic interpretation greatly suffers from the neglect of a methodologically updated investigation of the images' conceptual underpinning. Valerie Gonzalez addresses this lacuna by exploring the operations of cross-fertilization at the level of imagistic conceptualization resulting from the multifaceted encounter between the local legacy of Indo-Persianate book art, the freshly imported Persian models to Mughal India after 1555, and the influx of European art at the Mughal court in the sixteenth and seventeenth centuries. The author's close examination of the visuality, metaphysical order and aesthetic language of Mughal imagery and portraiture sheds new light on this particular aspect of its aesthetic hybridity, which is usually approached monolithically as a historical phenomenon of cross-cultural interaction. That approach fails to consider specific parameters and features inherent to the artistic practice, such as the differences between *doxis* and *praxis*, conceptualization and realization, intentionality and what lies beyond it. By studying the distinct phases and principles of hybridization between the variegated pictorial sources at work in the Mughal creative process at the successive levels of the project, intention, the practice, realization and the result-product, the author deciphers the modalities of appropriation and manipulation of the heterogeneous elements.

A Corpus of Rembrandt Paintings VI Ernst van de Wetering, 2014-11-11

A revised survey of Rembrandt's complete painted oeuvre. The question of which 17th-century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime. It is an issue that is still hotly disputed among art historians today. The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter. He also left pieces unfinished to be completed by others. The question is how to determine

which works were from Rembrandt's own hand. Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers? Do we yet have methods of investigation that would deliver objective evidence of authenticity? To what extent do research techniques used in the physical sciences help? Or are we after all still dependent on the subjective expert eye of the connoisseur? The book provides answers to these questions. Prof. Ernst van de Wetering, the author of our forthcoming book which deals with these questions, has been closely involved in all aspects of this research since 1968, the year the renowned Rembrandt Research Project (RRP) was founded. In particular, he played an important role in developing new criteria for authentication. Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand. In this book, he reattributes to the master a substantial number of unjustly rejected Rembrandts. He also was closely involved in the re-discovery of a considerable number of lost or completely unknown works by Rembrandt. The verdicts of earlier specialists, including the majority of members of the original RRP up to 1989, were based on connoisseurship, the self-confidence in one's ability to recognise a specific artist's style and hand. Over the years, Van de Wetering has carried out seminal research into 17th-century studio practice and ideas about art current in Rembrandt's time. In this book, he demonstrates the fallibility of traditional connoisseurship, especially in the case of Rembrandt, who was par excellence a searching artist. The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research. Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account. The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings, richly illustrated and annotated. For all the paintings reattributed in this book, extensive commentaries have been included that provide a multi-faceted new insight into Rembrandt's world and the world of art historical research. *Rembrandt's Paintings Revisited* is the concluding sixth volume of *A Corpus of Rembrandt Paintings* (Volumes I-V, 1982, 1986, 1989, 2005, 2010). It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968/69. At the same time, the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings. This work of art history and art research should belong in the library of every serious art historical institute, university, or museum.

Speaking Subjects in Multilingualism Research Judith Purkarthofer, Mi-Cha Flubacher, 2022-07-22. This book discusses salient moments of multilingual encounters and brings together contributions focused on the interplay between language use

by individuals and societies and language related inequalities or opportunities for speakers The chapters demonstrate how biographical and speaker centred approaches can contribute to an understanding of linguistic diversity how researchers can empirically account for lived experiences of languages and how such accounts are embedded in a larger discussion on social inequality Together the chapters make a powerful case for the importance of speaker centred methodologies in multilingual and multilingualism research The book is a rich source of theoretical and methodological reflections and will thus be a valuable resource for both experienced researchers and students beginning to explore biographical research methods
