Wounded Cities Jane Schneider, Ida Susser, 2020-06-29 Although the seemingly apocalyptic scale of the World Trade Center disaster continues to haunt people across the globe it is only the most recent example of a city tragically wounded Cities are in fact perpetually caught up in cycles of degeneration and renewal As with the WTC from time to time these cycles are severely ruptured by a sudden unpredictable event In the wake of recent terrorist activities this timely book explores how urban populations are affected by wounds inflicted through violence civil wars overbuilding drug trafficking and the collapse of infrastructures as well as natural disasters such as earthquakes Mexico City New York Beirut Belfast Bangkok and Baghdad are just a few examples of cities riddled with problems that undermine on a daily basis the quality of urban life What does it mean for urban dwellers when the infrastructure of a city collapses transport communication grids heat light roads water and sanitation What are the effects of foreign investment and huge construction projects on urban populations and how does this change the look and character of a city How does drug trafficking intersect with class race and gender and what impact does it have on vulnerable urban communities How do political corruption and mafia networks distort the built environment Drawing on in depth case studies from across the globe this book answers these intriguing questions through its rigorous consideration of changing global and national contexts social movements and corrosive urban events Adopting a grass roots up approach it places emphasis on peoples experiences of uneven development and inequality their engagement with memory in the face of continual change and the relevance of political activism to bettering their lives It is especially attentive to the historical interaction of particular cities with wider political and economic forces as these interactions have shaped local governance over time
