Portraits A Face For Every Mask:

Portraiture Richard Brilliant, 2013-05-15 This is the first general and theoretical study devoted entirely to portraiture Drawing on a broad range of images from Antiquity to the twentieth century which includes paintings sculptures prints cartoons postage stamps medals documents and photographs Richard Brilliant investigates the genre as a particular phenomenon in Western art that is especially sensitive to changes in the perceived nature of the individual in society The author s argument on behalf of portraiture and he draws on examples by such artists as Botticelli Rembrandt Matisse Warhol and Hockney does not comprise a mere survey of the genre nor is it a straightforward history of its reception Instead Brilliant presents a thematic and cogent analysis of the connections between the subject matter of portraits and the beholder s response the response he or she makes to the image itself and to the person it represents Portraiture s extraordinary longevity and resilience as a genre is a testament to the power of this imaginative transaction between the subject the artist and the beholder

Face and Mask Hans Belting, 2022-06-14 A cultural history of the face in Western art ranging from portraiture in painting and photography to film theater and mass media This fascinating book presents the first cultural history and anthropology of the face across centuries continents and media Ranging from funerary masks and masks in drama to the figural work of contemporary artists including Cindy Sherman and Nam June Paik renowned art historian Hans Belting emphasizes that while the face plays a critical role in human communication it defies attempts at visual representation Belting divides his book into three parts faces as masks of the self portraiture as a constantly evolving mask in Western culture and the fate of the face in the age of mass media Referencing a vast array of sources Belting s insights draw on art history philosophy theories of visual culture and cognitive science He demonstrates that Western efforts to portray the face have repeatedly failed even with the developments of new media such as photography and film which promise ever greater degrees of verisimilitude In spite of sitting at the heart of human expression the face resists possession and creative endeavors to capture it inevitably result in masks hollow signifiers of the humanity they re meant to embody From creations by Van Eyck

and August Sander to works by Francis Bacon Ingmar Bergman and Chuck Close Face and Mask takes a remarkable look at how through the centuries the physical visage has inspired and evaded artistic interpretation

The Photographic Uncanny Claire Raymond, 2019-11-23 This book argues for a renewed understanding of the fundamentally uncanny quality of the medium of photography It especially makes the case for the capacity of certain photographs precisely through their uncanniness to contest structures of political and social dominance The uncanny as a quality that unsettles the perception of home emerges as a symptom of modern and contemporary society and also as an aesthetic apparatus by which some key photographs critique the hegemony of capitalist and industrialist domains The book's historical scope is large beginning with William Henry Fox Talbot and closing with contemporary indigenous photographer Bear Allison and contemporary African American photographer Devin Allen Through close readings exegesis of individual photographs and careful deployment of contemporary political and aesthetic theory The Photographic Uncanny argues for a re envisioning of the political capacity of photography to expose the haunted homeless condition of modernity
