Revolutionary Leaders Of Modern China:

Revolutionary Leaders of Modern China Jundu Xue, 1971 Twenty bibliographical essays dealing with the major modern leaders in the Taiping Rebellion the Republican Revolution and the Communist movement Revolutionary Leaders of Modern China Chün-tu Hsüeh, 1971 Revolutionary Leaders of Modern China Jundu Xue, 1971 Twenty bibliographical essays dealing with the major modern leaders in the Taiping Rebellion the Republican Revolution and the Communist movement Political Leaders of Modern China Edwin Leung, 2002-10-30 Through the individual characteristics of China's political leaders a nation building process began Chinese leaders fell into two categories of reformers conservative and liberal Conservative reformers saw a corruption of the moral order of society that needed to be eliminated in order to restore the country's moral integrity while liberal reformers attempted to embrace the flaws and lead China toward Socialism One hundred Chinese leaders from the Opium War to 2001 are profiled in this comprehensive biographical dictionary This book provides the most up to date coverage of modern Chinese political leadership during the Imperial Republican and Communist periods Political leaders throughout each period had a common desire for reform within the country while maintaining China's political and cultural legacy Leung invokes the uniqueness of those leaders in their struggle for personal gain and national improvement as they fought to preserve traditional values Written by 30 international scholars and experts in the field using both Western and Chinese sources this is the most authoritative dictionary on the subject **The Culture of Leadership in Contemporary China** Paul Michael Linehan, 2017-12-06 The resurgence of Confucianism Daoism and Buddhism in the context of Chinese leadership values has emerged as a foundation for a new generation of leaders The once in a decade transition of China's leadership witnessed the ascendancy of a consensus oriented fifth generation of leaders supporting a central authoritative figure whose priority will likely include the reconciliation of a waning communist ideology juxtaposed with its ostensible embrace of capitalism How will Chinese Communist Party authority ideology and control address the encroachment of Western values that are centered on Roman law Greek philosophy and Christian religion which prioritizes individual freedom and democracy This book examines the role of traditional Chinese values ideology and philosophy as a key determinant in modern China's leadership succession The author asserts that as communist ideology wanes Chinese leaders will turn to their own traditional values found in Confucianism Daoism and Buddhism to establish legitimacy to rule as they seek to promote Chinese prominence and greatness in the world The author's research assesses China's promotion of its own traditional values in rejecting foreign value influence Since the inception of modern China at the beginning of the 20th century China's leadership transition has evolved from an authoritarian cult like dictatorship to a consensus oriented process In researching this metamorphosis this book offers social political cultural and historical perspectives to demonstrate that Chinese human values and character factors have risen in prominence as key elements in the mandate of Chinese governance and leadership The author concludes that Chinese leadership values and its study and diffusion across sectors of

Chinese leadership including business organizations and government have become a means to accentuate Chinese values as a viable alternative to Western claims of absolute and universally accepted values Leadership and Authority in China Lawrence Sullivan, 2012-07-13 This volume presents elite conflicts and political controversies in China from 1895 to 1978 as rooted in two diametrically opposed visions of leadership and political authority a radical charismatic model that instills absolute authority in the single leader whose will guides the polity and whose word is the basis of policy formulation versus an institutional model in which authority inheres in organization and where collective leadership and decision making govern the political realm The former model in modern Chinese history entailed a leader principle and personality cult that began with Sun Yatsen and Chiang Kaishek in the Nationalist Party KMT and reached its peak with the leadership cult of Chinese Communist Party CCP Chairman Mao Zedong especially during the 1966 1976 Great Proletarian Cultural Revolution The latter model with its emphasis on collective leadership jiti lingdao and administrative rationalism began as a reaction among early members of the CCP against the promotion of the Sun and Chiang leadership cults and became a central governing principle in the Communist Party that served as official leadership doctrine beginning with the formation of the Party in 1921 While tensions over leadership issues were relatively muted in the pre 1949 period and early 1950s of CCP history as an apparent compromise was reached in which from 1943 onward a cult of the leader was promoted for propaganda purposes but with collegial decision making governing inner Party decision making the mid to late 1950s saw this compromise among the top leadership come under increasing strain and finally break down Devoted to a fundamentally different vision of a socialist China from other top leaders on a number of economic social and political fronts Mao Zedong pushed his domination of the policy process that ultimately provoked a wholesale assault on the CCP apparatus throughout the country while the leader cult reached mythic proportions during the Cultural Revolution Confronted by the possibility of civil war and generally opposed to the takeover of the polity by the radical Gang of Four led by his wife Jiang Qing by the mid 1970s the aging great leader acquiesced to the rebuilding of the CCP along traditional institutional lines Radicalism, Revolution, and Reform in Modern China Catherine Lynch, Robert B. Marks, Paul G. Pickowicz, 2011-03-31 This volume illuminates the relationship of China's radical past to its reformist present as China makes a way forward through very differently conceived and contested visions of the future In the context of early twenty first century problems and the failures of global capitalism is China's history of revolutionary socialism an aberration that is soon to be forgotten or can it serve as a resource for creating a more fully human and radically democratic China with implications for all of us Ranging from the early years of China's revolutionary twentieth century to the present the essays collected here look at the past and present of China with a view toward better understanding the ideas ideals and people who have dared to imagine radical transformation of their worlds and to assess the conceptual political and social limitations of these visions and their implementations The volume's chapters focus on these issues from a range of vantage points representing a spectrum of current scholarship The first half of the book

brings new insights to understanding how early twentieth century intellectuals interpreted ideas that allowed them to break with China's past and to envision new paths to a modern future. It treats of Chen Duxiu, a founder of the Communist party, Mao Zedong and Mao in relation to the non-Communist Liang Shuming and with the Dalai Lama. With continuing threads of nation and nationalities of peasants, utopias and dystopias linking the chapters, the book's second half looks broadly at the consequences of the implementations of radical ideas at the same time critiquing our accepted frameworks of analysis. Moving up to the present, the book investigates the effects of the reforms since the 1980s on long-term environmental degradation and on the emergence of a capitalist rural economy. It gives an unsparing view into contemporary rural China through independent films. The book concludes with an analysis of the unshakable persistence of the shibboleth, the rise of China in popul.

Modern China Bruce A. Elleman, S. C. M. Paine, 2019-02-18. Now in a fully updated edition, this accessible text provides a balanced history of modern China in a global context. Through years of living and research in China, Taiwan, Japan, and Russia, the authors are deeply qualified to understand China's internal dynamics as well as its foreign relations over centuries. Arguing that modern Chinese history cannot be understood without a deep appreciation of the outside factors that have influenced the country, the authors focus on China's near neighbors, especially Japan and Russia. They also emphasize the tragic role of almost endless warfare throughout Chinese history. Providing a unique comparative approach, the authors bridge the cultural divide separating Chinese history from Western readers trying to understand it. Specifically geared to the teaching requirements of the semester system, the book is divided into four parts and a total of twenty-eight chapters corresponding either to two chapters per week in a fourteen-week semester or one chapter per week in a two-semester course.

The History and Logic of Modern Chinese Politics Mingsheng Wang, 2021-08-24. This book explores the history and development of modern Chinese politics. Written by Dr. Mingsheng Wang, a renowned Chinese political scientist, it presents a truly groundbreaking and thought-provoking study of the sociopolitical forces behind China's gradual emergence as a new global power in the 20th century and its rapid rise as the world's second largest economy over the past 40 years. The author's argument is illuminated by comparative theoretical analyses based on meticulously detailed empirical research functions as a lens through which readers can better understand China's remarkable accomplishments as well as consider broader issues that have perplexed many. Is there a China Path to sociopolitical progress? What is socialism with Chinese characteristics? Can China redefine its niche and maintain its growing momentum in an increasingly multilateral world? And finally, what lessons can we draw from China's continuing progress in the post-COVID era? As the author argues eloquently and with persuasive evidence, China's ongoing progress has followed neither the mode of Russian-style socialism nor that of Western prototypical capitalism. Rather, it represents a distinctively different model of progress and a continuous search for a viable alternative route to modernity that is permeated with Chinese realities. By identifying an alternative system described as the China Path, the author demonstrates convincingly that there exist ample options for different types of modernity and

that economic growth means not only industrialization but also the development of political democratization and the realization of the rule of law In this sense this book significantly enriches our understanding of modern China The 33 carefully selected essays in the anthology provide a much needed opportunity for scholars policy makers and all interested readers to obtain an insider s view of the history and prospect of China s political development **Foreign Affairs**
