Revolutionary Ideology and Islamic Militancy Najibullah Lafraie,2009-02-28 The war on terror tends to circumscribe crucial developments in the Islamic world within a narrow definition of Islamic terrorism This partial and incomplete perspective fails to comprehend the links between today s scenario and the Iranian revolution of 1979 a revolution fought in the name of God and spearheaded by religious scholars It is vital to examine the relationship between religious and revolutionary ideologies and the revolutionary potentials of Islamic teachings In a penetrating new study Najibullha Lafraie examines how revolutionary ideologies function and applies these insights to the Quran and its interpreters in the vanguard of the Iranian revolution By unpacking these discourses Lafraie develops and refines the concept of a Quranic revolutionary ideology The Ideology of the Islamic Revolution delineates the different ways in which the Quran was used to mobilise action in 1979 and in so doing provides a context for understanding today s Islamist movements

In the history of international relations, few events command as much attention as revolution and war. Over the centuries, revolutionary transformations have produced some of the most ruinous and bloody wars. Nevertheless, the breakdown of peace in time of revolution is poorly understood. Patrick Conge offers a groundbreaking study of the relationship between war and revolution. How can we best understand the effect of revolutionary transformations on the politics of war and peace? Conge argues that it is only by bringing in first the organizational capacity of revolutionary regimes to extract resources and convert them into military strength, and second the power of transformative ideas to transcend national boundaries and undermine the ability of opposing regimes to compromise, that we are best able to understand the effect of revolution on the origins and persistence of war. By incorporating such key elements, this book provides a new, more comprehensive explanation of the relationship between revolution, war, and peace. Conditions that lead to and sustain wars in general are identified and placed in the light of revolutionary transformations. Once the argument is presented, historical case studies are used to test its plausibility. Conge demonstrates the importance of the effect of revolutionary organization and ideas on the outcome of conflicts. Political scientists, historians, sociologists, and the general reader interested in the politics of war and peace in revolutionary times are given new perspectives on the relationship between revolution and war, as well as on the implications of political organization for military power and the process of consolidation of new regimes. Patrick J. Conge is Assistant Professor of Political Science, University of Arkansas. *Social Origins of the Iranian Revolution* Misagh Parsa, 1989 Misagh Parsa develops a structural theory of the causes and outcomes of revolution, applying the theory in particular to Iran. He focuses on the ends and means of various groups of Iranians before, during, and after the revolution. For Parsa, revolution is not a direct result of ideologies, which may be less important than structural factors such as the nature of the state and the economy, as well as each group's interests, capacity for mobilization, autonomy, and solidarity structures. Existing theories of revolution explain earlier revolutions better than the Iranian revolution. In Iran, most of the protest was in urban areas; the peasants never played a major role, and power was transferred to the clergy, not to an intelligentsia. In the 1970s, oil revenues increased, the economy developed rapidly but unevenly, and the state's expanded intervention undermined market forces and politicized capital accumulation. Systematic repression of workers' aid to the upper class and attacks on secular and religious opposition showed

that the state was serving the interests of particular groups When the state tried to check high inflation by imposing price controls on bazaaris merchants shopkeepers artisans their protests forced the state to introduce reforms providing an opportunity for industrial workers white collar workers intellectuals and the clergy to mobilize against the state Thus structural features rendered the state vulnerable to challenge and attack Parsa s thorough explanation of the collective actions of each major group in Iran in the three decades prior to the revolution shows how a coalition of classes and groups using mosques as safe gathering places and led by a segment of the clergy brought down the monarch of 1979 In the years since the revolution the conflicts that existed before the revolution seem to be reemerging in slightly altered form The clergy now has control and the state has become centrally and powerfully involved in the economy of the country

Islam Jacques Waardenburg, 2008-08-22 This book presents some twenty essays on different aspects of Islam in history and the present. These essays are grouped into eight larger sections. The first, *The Beginnings*, deals with the transition from pre-Islamic understandings and reasons to an essential part of the Quranic message. The next two sections deal with Islam specifically as a religion with its particular signs and symbols. The question of rules of interpretation in Islam and its structural features is discussed here. Sections four and five deal with ethics in Islam, including Muslim identity and human rights and certain social functions of Islam. Section six introduces some 19th and 20th century reform movements with special attention given to developments in Saudi Arabia and the puritan characteristics of present day Islamic revival movements. The final two sections discuss contemporary issues: Islamization processes and policies, Islamic ideologies, the ideologization of Islam, and the political uses of religion. Throughout the book, the author shows the links between the religious and other interpretations and uses made of Islam and the contexts in which they are made. The Introduction signals some important developments in Islamic studies since World War II.

The Psychology of Genocide and Violent Oppression Richard Morrock, 2014-01-10 The twentieth century was one of the most violent in all of human history with more than 100 million people killed in acts of war and persecution ranging from the Herero and Namaqua genocide in present day Namibia during the early 1900s to the ongoing conflict in Darfur. This book explores the root causes of genocide, looking into the underlying psychology of violence and oppression. Genocide does not simply occur at the hands of tyrannical despots but rather at the hands of ordinary citizens whose unresolved pain and oppression forces them to follow a leader whose demagoguery best expresses their own long developed prejudices and fears. The book explains how birth trauma, childhood trauma, and authoritarian education can be seen as the true causes of genocidal periods in recent history.

Modern Iran Ali Ansari, 2014-07-22 Today's Iran is rarely out of the headlines. Labelled by George W. Bush as a part of his axis of evil and perceived as a real nuclear threat by some, Iran is increasingly seen as an enemy of the West. And yet for many, Iran remains shrouded in mystery and incomprehensible to Western analysis. *Modern Iran* offers a comprehensive analysis and explanation of political, social, and economic developments in Iran during the 20th century. Since it first published in 2003, *Modern Iran* has become a staple for students and lecturers wishing to gain a clear understanding of the history of this strategically important Middle Eastern country. The new edition will bring us up to date and will include an analysis of the successes and failures of the Khatami Presidency, an examination of the effect of 9/11, the rise of the Reform Movement, and the efforts to promote Islamic Democracy, the resistance to democratisation among the hardline elites.

After Khomeini Anoushiravan Ehteshami, 2002-03-11 For Iran, the years since Ayatollah Khomeini's death have been dominated by the need for political

consolidation and economic reconstruction The book assesses the critical dilemmas of the regime both previous to and since the demise of its first spiritual leader The vital issues of political succession and constitutional reform are addressed contributing to an analysis of the structures and politics of power How these have reflected upon economic policy is considered with close attention being given to the reform policies of Rafsanjani Foreign policy and security issues are discussed in both regional and global terms and include a study of Iranian defence strategy and its controversial re armament drive The final chapter examines the direction and context of all of these major policy areas providing an analysis of whether the Islamic Republic truly represents a revolutionary alternative for the Third World or whether in fact it has developed in time to fall within a similar mould to other notable revolutions casting by the wayside any uniquely Islamic agenda and alternatives At the heart of this study is the belief that the Islamic regime has since the cease fire with Iraq but more specifically since Ayatollah Khomeini's death passed into a new stage of development referred to in the book as the Second Republic

Literary Subterfuge and Contemporary Persian Fiction Mohammad Khorrami, 2014-09-25 The main focus of *Literary Subterfuge and Contemporary Persian Fiction* is to identify components and elements which define Persian modernist fiction placing an emphasis on literary concepts and devices which provide the dynamics of the evolutionary trajectory of this modernism The question of who writes Iran refers to a contested area which goes beyond the discipline of literary criticism Non literary discourses have made every effort to impose their committed readings on literary texts they have even managed to exert influence on the process of literary creation In this process inevitably many works or segments of them and many concepts which do not lend themselves to such readings have been ignored at the same time many of them have been appropriated by these discourses Yet components and elements of Persian literary tradition have persistently engaged in this discursive confrontation mainly by insisting on literature's relative autonomy so that at least concepts such as conformity and subterfuge essential in terms of defining modern and modernist Persian fiction could be defined in a literary manner Proffering an alternative in terms of literary historiography this book supports a methodological approach that considers literary narratives which occur in the margins of dominant discourses and indeed promote non discursivity as the main writers of Persian modernist fiction It is an essential resource for scholars and researchers interested in Persian and comparative literature as well as Middle Eastern Studies more broadly
