Handbook of Revolutions in the 21st Century Jack A. Goldstone,Leonid Grinin,Andrey Korotayev,2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department

of International Relations Australian National University Canberra      *Revolution and World Politics* Fred Halliday, 1999  
 Reassesses the role of revolution as a force that has shaped the development of world politics      *Language and State* Xing Yu, 2024-07-17 This book is a study of the growth of human society from the perspective of language It argues that when humans begin to use language for communication they develop and use media Media extend the distance of communication allowing humans to interact with one another on a large scale and form a large society Language leads to the dissolution of primitive society and the formation of civilized society From the formation of civilisation humans began to group themselves by way of ethnicity or nationality They have made themselves a people a community a nation and a state They then govern their state through various types of linguistic presentations appellation constitution election and representation all linguistic mechanisms that contribute to the building of the state and its system of governance The spirit of the state is then built through the development of history philosophy literature and art religion and law Language has preset the whole process of the growth of the state This book can be a reference book of political science political linguistics or political philosophy to be read by university students and professors      *Revolution in China and Russia* Luyang Zhou, 2025-06-17 Most scholars believe that China's nationality policy like that of other socialist states imitated the Soviet nationality model a system which has been termed an affirmative action empire This book offers two contributions to the literature which run counter to this convention First it argues that the People's Republic of China PRC and the Soviet Union USSR were different while the PRC was aimed to build an ideal typical nation state the USSR was an open union of nation states that was only temporarily confined to a physical territory Second while scholars who have noted this difference attribute it to contextual factors such as ethnic structure geopolitical status and Russia's intervention into the Chinese Revolution this book contends that context shaped the Sino Soviet difference yet it did not determine it Rather there was significant leeway between the implications of the contextual factors and what the policy designers ultimately established This book probes who held agency and how these individuals bridged this gap      **Revolutions in Sorrow** Peter N. Stearns, 2015-12-03 Huge changes have occurred in both the physical facts of death and in the cultural modes that guide our reactions to it These changes also affect policy issues ranging from punishments for crimes to birth control to the conduct of war This book explores the impacts of these changes upon both personal experience and social policy and places developments in the United States in an international comparative context The book opens with an overview of traditional patterns of death and related cultural practices in agricultural civilizations along with changes brought by Christianity Attitudes and practices in colonial America are traced and compared to other societies After setting this historical context the book examines the immense changes that occurred in the nineteenth century new cultural reactions to death expressed in changing death rituals and cemetery design the unprecedented reduction later in the century of infant mortality the relocation of death from home to hospital the redefinition of death as a taboo subject The book's final segment relates changes in death culture and experience to the contentious

debates of the twentieth century over the death penalty abortion and the practice of war The book is designed to use historical and comparative perspectives to stimulate debate about the strengths and weaknesses of cultural practices and policies related to death

**Words and Worlds** Veena Das, Didier Fassin, 2021-05-10 Born in a time of anxiety Words and Worlds examines some of the disquieting challenges that societies now face Through an inquiry into a political lexicon of commonsense words ranging from democracy and revolution to knowledge and authority from inequality and toleration to war and power the contributors to this book trouble the self evidence of these terms bringing into view the hidden transcripts and unexpected trajectories of many settled ideas such as the human sense of belonging or the call for openness and transparency in research and public life The case studies conducted over five continents with the tools of eight different disciplines challenge the ethnocentric assumptions false moralism and cultural prejudices that underlie much discussion on corruption or even the virtue invested in resilience The critique of the ubiquitous use of crisis to characterize our times shows how this framing obscures the unjust conditions of existence and the violence of everyday life Together the essays in this volume offer a fresh look at the deeply connected worlds we inhabit in solidarity and in discord Contributors Banu Bargu Veena Das Alex de Waal Didier Fassin Peter Geschiere Behrooz Ghamari Tabrizi Caroline Humphrey Ravi Kanbur Julieta Lemaitre Uday S Mehta Jan Werner Müller Jonathan Pugh Elizabeth F Sanders Todd Sanders

**Religion, Space, and the Atlantic World** John Corrigan, 2017-11-30 An interdisciplinary exploration of the influence of physical space in the study of religion While the concept of an Atlantic world has been central to the work of historians for decades the full implications of that spatial setting for the lives of religious people have received far less attention In Religion Space and the Atlantic World John Corrigan brings together research from geographers anthropologists literature scholars historians and religious studies specialists to explore some of the possibilities for and benefits of taking physical space more seriously in the study of religion Focusing on four domains that most readily reflect the importance of Atlantic world spaces for the shape and practice of religion texts design distance and civics these essays explore subjects as varied as the siting of churches on the Peruvian Camino Real the evolution of Hispanic cathedrals Methodist identity in nineteenth century Canada and Lutherans in early eighteenth century America Such essays illustrate both how the organization of space was driven by religious interests and how religion adapted to spatial ordering and reordering initiated by other cultural authorities The case studies include the erasure of Native American sacred spaces by missionaries serving as cartographers which contributed to a view of North America as a vast expanse of unmarked territory ripe for settlement Spanish explorers and missionaries reorganized indigenous built space to impress materially on people the surveillance power of Crown and Church The new environment and culture often transformed old institutions as in the reconception of the European cloister into a distinctly American space that offered autonomy and solidarity for religious women and served as a point of reference for social stability as convents assumed larger public roles in the outside community Ultimately even the ocean was reconceptualized as space itself rather

than as a connector defined by the land masses that it touched requiring certain kinds of religious orientations to both space and time that differed markedly from those on land Collectively the contributors examine the locations and movement of people ideas texts institutions rituals power and status in and through space They argue that just as the mental organization of our activity in the world and our recall of events have much to do with our experience of space we should take seriously the degree to which that experience more broadly influences how we make sense of our lives

**The Greek Revolution in the Age of Revolutions (1776-1848)** Paschalis M. Kitromilides, 2021-09-09 The Greek Revolution in the Age of Revolutions 1776 1848 brings together twenty one scholars and a host of original ideas revisionist arguments and new information to mark the bicentennial of the Greek Revolution of 1821 The purpose of this volume is to demonstrate the significance of the Greek liberation struggle to international history and to highlight how it was a turning point that signalled the revival of revolution in Europe after the defeat of the French Revolution in 1815 It argues that the sacrifices of rebellious Greeks paved the way for other resistance movements in European politics culminating in the spring of European peoples in 1848 Richly researched and innovative in approach this volume also considers the diplomatic and transnational aspects of the insurrection and examines hitherto unexplored dimensions of revolutionary change in the Greek world This book will appeal to scholars and students of the Age of Revolution as well as those interested in comparative and transnational history political theory and constitutional law

The Military Revolution and Revolutions in Military Affairs Mark Fissel, 2022-12-05 The Military Revolution and Revolutions in Military Affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both fields Only a handful of publications consider the military revolution and the RMA in tandem This book breaks new ground conceptually and appeals to an exceptionally large and diverse readership Comparative revisionist studies of the military revolution and RMA better enable us to comprehend the historical continuum and reveal the new RMA for what it is And for what it is shortly to become This book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively The connections with the Revolution in Military Affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems This is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence

*Radicals, Revolutionaries, and Society* R. G. Williams, 2025-04-17 This book is a study of radicals revolutionaries and society Specifically it tries to look at the historical social and political struggles of radicals in modern politics since the emergence of modern politics after the French Revolution of 1789 While the book is a political study the main focus is that of a socialist study as a Socialist argument for the vital political role of radicals and revolutionaries in creating modern society The main focus of the book is on how radicals and revolutionaries usually change modern society for the better through their

struggle for democracy freedom and socialism      **The Age of Revolutions** Nathan Perl-Rosenthal, 2024-02-20 A panoramic persuasive and inspiring New Yorker new history of the revolutionary decades between 1760 and 1825 from North America and Europe to Haiti and Spanish America showing how progress and reaction went hand in hand The revolutions that raged across Europe and the Americas over seven decades from 1760 to 1825 created the modern world Revolutionaries shattered empires toppled social hierarchies and birthed a world of republics But old injustices lingered on and the powerful engines of revolutionary change created new and insidious forms of inequality In The Age of Revolutions historian Nathan Perl Rosenthal offers the first narrative history of this entire era Through a kaleidoscope of lives both familiar and unknown from John Adams Toussaint Louverture and Napoleon to an ambitious French naturalist and a seditious Peruvian nun he retells the revolutionary epic as a generational story The first revolutionary generation fired by radical ideas struggled to slip the hierarchical bonds of the old order Their failures molded a second generation more adept at mass organizing but with an illiberal tint The sweeping political transformations they accomplished after 1800 etched social and racial inequalities into the foundations of modern democracy A breathtaking history spanning three continents The Age of Revolutions uncovers how the period's grand political transformations emerged across oceans and slowly and unevenly over generations

Luft, 2020-09-13 Since the 1970s I have pursued three separate but overlapping and sometimes simultaneous careers 1 philosopher writer teacher historian of the long nineteenth century 1789 1914 2 editor translator photographer publisher biographer encyclopedist 3 cataloging librarian rare books and special collections librarian historian of medicine Somehow these three vocations have garnered me some acclaim even an entry in Who's Who in America Each of them has resulted in some published or presented works Because these works have been scattered in a wide variety of venues some of which have gone out of print or have otherwise become generally unavailable and of course with the oral presentations being gone as soon as they are given I have thought it wise to select epitomize and bring them together in one place here Thus what follows in these volumes is what I consider to be the most important of my shorter works All translations are my own unless otherwise indicated
