Learning Motor Skills Jens Kober,Jan Peters,2013-11-23 This book presents the state of the art in reinforcement learning applied to robotics both in terms of novel algorithms and applications It discusses recent approaches that allow robots to learn motor skills and presents tasks that need to take into account the dynamic behavior of the robot and its environment where a kinematic movement plan is not sufficient The book illustrates a method that learns to generalize parameterized motor plans which is obtained by imitation or reinforcement learning by adapting a small set of global parameters and appropriate kernel based reinforcement learning algorithms The presented applications explore highly dynamic tasks and exhibit a very efficient learning process All proposed approaches have been extensively validated with benchmarks tasks in simulation and on real robots These tasks correspond to sports and games but the presented techniques are also applicable to more mundane household tasks The book is based on the first author s doctoral thesis which won the 2013 EURON Georges Giralt PhD Award

Pay for Performance in Health Care Jerry Cromwell,Michael G. Trisolini,Gregory C. Pope,Janet B. Mitchell,Leslie M. Greenwald,2011-02-28 This book provides a balanced assessment of pay for performance P4P addressing both its promise and its shortcomings P4P programs

have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators despite limited evidence of their effectiveness. On a positive note, this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care. The current interest in P4P echoes earlier enthusiasms in health policy such as those for capitation and managed care in the 1990s that failed to live up to their early promise. The fate of P4P is not yet certain, but we can learn a number of lessons from experiences with P4P to date and ways to improve the designs of P4P programs are becoming apparent. We anticipate that a second generation of P4P programs can now be developed that can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs.
