What Color is Your Parody? Charlie Haas,1984 [net.wars](#)

Wendy Grossman,2019-09-01 Assesses the battles over Internet regulation that will define the venue s future Who will rule cyberspace And why should people care Recently stories have appeared in a variety of news media from the sensational to the staid that portray the Internet as full of pornography pedophilia recipes for making bombs lewd and lawless behavior and copyright violators And for politicians eager for votes or to people who have never strolled the electronic byways regulating the Net seems as logical and sensible as making your kids wear seat belts Forget freedom of speech children can read this stuff From the point of view of those on the Net mass media s representation of pornography on the Internet grossly overestimates the amount that is actually available and these stories are based on studies that are at best flawed and at worst fraudulent To netizens the panic over the electronic availability of bomb making recipes and other potentially dangerous material is groundless the same material is readily available in public libraries Out on the Net it seems outrageous that people who have never really experienced it are in a position to regulate it How then should the lines be drawn in the grey area between cyberspace and the physical world In *net wars* Wendy Grossman a journalist who has covered the Net since 1992 for major publications such as *Wired* *The Guardian* and *The Telegraph* assesses the battles that will define the future of this new venue From the Church of Scientology s raids on Net users to netizens attempts to overthrow both the Communications Decency Act and the restrictions on the export of strong encryption *net wars* explains the issues and the

background behind the headlines Among the issues covered are net scams class divisions on the net privacy issues the Communications Decency Act women online pornography hackers and the computer underground net criminals and sociopaths and more Full text online version at www.nyupress.org/networks

The Porcelain Child Dianna Aubin, 2025-08-06 Nine year old Ellie Harlow vanished without a trace from the quiet woods behind her family's home The only clue left behind A broken porcelain doll ancient cracked and impossibly alive For Marla and Michael Harlow grief turns into a nightmare when the doll begins to move whisper and change taking on the eerie likeness of their missing daughter As the line between hope and horror blurs their home becomes a prison of shadows and secrets Neighbors grow suspicious strange voices echo through the walls and the doll's sinister presence creeps into every corner of their lives Is Ellie trapped inside the doll begging for rescue Or is something older darker and far more malevolent using her voice to lure them deeper into the woods ancient grip In this chilling tale of loss and terror nothing is what it seems And the woods are watching Sometimes the things we love most refuse to let go and sometimes they never come back at all

Glow Kids Nicholas Kardaras, 2016-08-09 We've all seen them kids hypnotically staring at glowing screens in restaurants in playgrounds and in friends houses and the numbers are growing Like a virtual scourge the illuminated glowing faces the Glow Kids are multiplying But at what cost Is this just a harmless indulgence or fad like some sort of digital hula hoop Some say that glowing screens might even be good for kids a form of interactive educational tool Don't believe it In Glow Kids Dr Nicholas Kardaras will examine how technology more specifically age inappropriate screen tech with all of its glowing ubiquity has profoundly affected the brains of an entire generation Brain imaging research is showing that stimulating glowing screens are as dopaminergic dopamine activating to the brain's pleasure center as sex And a growing mountain of clinical research correlates screen tech with disorders like ADHD addiction anxiety depression increased aggression and even psychosis Most shocking of all recent brain imaging studies conclusively show that excessive screen exposure can neurologically damage a young person's developing brain in the same way that cocaine addiction can Kardaras will dive into the sociological

psychological cultural and economic factors involved in the global tech epidemic with one major goal to explore the effect all of our wonderful shiny new technology is having on kids Glow Kids also includes an opt out letter and a quiz for parents in the back of the book *Dear Illusion* Kingsley Amis,2015-08-04 With Lucky Jim Kingsley Amis established himself as the bad boy of twentieth century British letters Later he became famous as another kind of bad boy an inveterate boozier a red faced scourge of political correctness He was consistent throughout in being a committed enemy of any form of right thinking which helped to make him one of the most consistently unconventional and exploratory writers of his day a master of classical English prose who was unafraid to apply himself to literary genres all too often dismissed as low Science fiction the spy story the ghost story were all grist for Amis s mill and nowhere is the experimental spirit in which he worked his will to test both reality and the reader s imagination more apparent than in his short stories These woodchips from his workshop as he called them are anything but throwaway work They are instead the essence of Amis a brew that is as tonic as it is intoxicating
