Comparative Criticism: Volume 7, Boundaries of Literature E. S. Shaffer,1986-04-17 *Comparative Criticism* is an annual journal of comparative literature and cultural studies that has gained an international reputation since its inception in 1979 It contains major articles on literary theory and criticism on a wide range of comparative topics and on interdisciplinary debates It includes translations of literary

scholarly and critical works substantial reviews of important books in the field and bibliographies on specialist themes for the year on individual writers and on comparative literary studies in Britain and Ireland **Medieval Rhetoric** James Jerome Murphy, University of Toronto. Centre for Medieval Studies, 1989-01-01 The history of medieval rhetoric can be understood only as part of medieval efforts to understand the manifold uses of language Music and the Renaissance Philippe Vendrix, 2017-07-05 This volume unites a collection of articles which illustrate brilliantly the complexity of European cultural history in the Renaissance On the one hand scholars of this period were inspired by classical narratives on the sublime effects of music and on the other hand were affected by the profound religious upheavals which destroyed the unity of Western Christianity and in so doing opened up new avenues in the world of music These articles offer as broad a vision as possible of the ways of thinking about music which developed in the fifteenth and sixteenth centuries **Music as Concept and Practice in the Late Middle Ages** Reinhard Strohm, Bonnie J. Blackburn, 2001 Music as Concept and Practice in the Late Middle Ages is an entirely new addition to the New Oxford History of Music series rather than a revision of the volume's predecessor published in 1960 It takes account not only of the developments in late medieval music scholarship during the latter decades of the twentieth century but also of the experience gained through significant changes in the performance practice of the late medieval repertory witnessed during this period All the chapters include areas of discussion whose coverage in the series hitherto has been either wholly lacking or at best marginal Muslim and Jewish musical traditions of the Middle Ages late medieval office chant medieval dance music musical instruments in society music in Central and Eastern Europe music theory of the fourteenth and fifteenth centuries music and early Renaissance humanism The first chapter and the last three present the conceptualization of music in speculative theory philosophy compositional and didactic practice and musical historiography Four chapters and part of the first illustrate important musical repertories and genres as they were developed within diverse societies The eight authors all of them with a long standing interest in their respective subjects have created through their collaboration a blend of mature scholarship and original investigation The volume's novelty of approach and content is complemented by a firm anchorage in the specialist literature and documentary source material Today no single view of the Middle Ages can be acceptable to the musician or to the historian The present volume which addresses itself to both provides solid information on formerly marginal themes and advocates further exploration of the other Middle Ages The Power of Eloquence and English Renaissance Literature Neil Rhodes, 1992-10-15 This book is an ambitious critical investigation of the idea of eloquence as it informs classical and Renaissance thinking about literature Medieval Virginites Ruth Evans, Sarah Salih, Anke Bernau, 2003-01-01 The variety of subjects and disciplines represented here testify both to the elusiveness of virginity and to its lasting appeal and importance Medieval Virginites shows how virginity's inherent ambiguity highlights the problems contradictions and discontinuities lurking within medieval ideologies Papers on Quintilian and Ancient Declamation Michael Winterbottom, 2019-04-04 Declamation the practice of training

young men to speak in public by setting them to compose and deliver speeches on fictional legal cases was central to the Greek and Roman educational systems over many centuries and has been the subject of a recent explosion of scholarly interest. The work of Michael Winterbottom has been seminal in this regard and the present volume brings together a broad selection of his scholarly articles and reviews published since 1964 creating an authoritative and accessible resource for this burgeoning field of study. The assembled papers focus on two related topics: the rhetorician Quintilian and ancient declamation in practice. Quintilian, who taught rhetoric at Rome in the second half of the first century AD, was the author of the *Institutio Oratoria*, a key text for Roman educational practice, rhetoric, and literary criticism. Subjects explored in the present collection range widely over not only the establishment and interpretation of the text and its literary and historical context but also Quintilian's views on inspiration, morality, philosophy, and declamation, of which he was a practitioner. While the volume also offers detailed examinations of the texts and interpretations of a wide range of Latin and Greek authors of declamations such as Seneca the Elder, Sopotros, and Ennodius, there is a particular focus on two collections wrongly attributed to Quintilian: the so-called Minor and Major Declamations. A major reassessment of the manuscript tradition of the latter collection is published here for the first time.
