

What's So Special About Rhetorical Deliberation?

Rhetorical Deliberation is *practical* argumentation, i.e., it is about actions/decisions—unlike, e.g., scientific argumentation, which is *epistemic*, i.e., about truth.

It is characteristic of practical argumentation that there are usually several relevant arguments on both sides of any issue.

They will usually belong to several different *dimensions* (economics ... ethics ... aesthetics ...) which cannot be reduced to one common denominator (they are *incommensurable*). In contrast, epistemic argumentation only recognizes one dimension: truth.

This means that in practical argumentation, consensus cannot be expected even if the disagreeing parties argue reasonably.

There will be “reasonable disagreement” (Rawls), “legitimate dissensus”.
