## Rheumatoid arthritis (chronic polyarthritis)

Rheumatoid arthritis is a chronic inflammatory disease that attacks the joints. It is characterized by synovial inflammation, which leads to the formation of new blood vessels and the growth of new cartilage. This process can lead to the destruction of the joint and the formation of bony growths called osteophytes. The disease is most common in the hands and feet, but it can affect any joint in the body. The disease is more common in women than in men, and it is more common in people who are over 40 years old.
