Rhodesia Racial Conflict Or Coexistence:

Rhodesia Patrick O'Meara, 2019-05-15 Rhodesia Racial Conflict or Coexistence examines the contemporary racial struggle in Rhodesia a struggle between a controlling white minority and an African majority with little political power or influence After providing background information on the development of racial attitudes from 1890 onward Professor O Meara offers a detailed treatment of current Rhodesian political parties and movements With precision and objectivity he explains why some Africans have accepted the ground rules of the Rhodesian political system including laws elections and the parliamentary structure while others have rejected them and seek to destroy the system **Rhodesia** ,1975 The Urban Roots of Democracy and Political Violence in Zimbabwe Timothy Scarnecchia, 2008 The author further proposes that this recourse to political violence top down nationalism and the abandonment of urban democratic traditions are all hallmarks of a particular type of nationalism equally unsustainable in Zimbabwe then as it is now BOOK JACKET

Struggles for Self-Determination Josiah Brownell, 2021-12-02 Katanga Rhodesia Transkei and Bophuthatswana four African countries that though existing in a literal sense were in each case considered by the international community to be a component part of a larger sovereign state through which all official communications and interactions were still conducted This book is concerned with the intertwined histories of these four right wing secessionist states in Southern Africa as they fought for but ultimately failed to win sovereign recognition Along the way Katanga Rhodesia Transkei and Bophuthatswana each invented new national symbols and traditions created all the trappings of independent statehood and each proclaimed that their movements were legitimate expressions of national self determination Josiah Brownell provides a unique comparison between these states viewed together as a common reaction to decolonization and the triumph of anticolonial African nationalism Describing the ideological stakes of their struggles for sovereignty Brownell explores the international political controversies that their drives for independence initiated inside and outside Africa By combining their stories this book draws out the relationships between the emergence of these four pseudo states and the fragility of the entire postcolonial African state structure **The Changing Racial Regime** Matthew Holden, 2017-11-30 The National Political Science Review is the official publication of the National Conference of Black Political Scientists The Review s purpose as described by Matthew Holden in his introduction is to lead to new information insights and findings into the social and political status of African Americans The volume is not exclusionist or narrow It integrates essays that could stand alone as they initially were written according to the method and theory of the author in question As presented here however they also lend themselves to a broader treatment of race and the political order The present volume combines essays expressly focused on African Americans Africa and the African diaspora At the same tune it contains essays about broad generic subjects such as budgeting and interest groups written with no explicit racial relevance Holden integrates these essays under the theme of the changing racial regime The integrating concept is the old word regime which political scientists have used in many

situations before to define such more or less persistent though not necessarily permanent orders of precedence If no significant benefits and no significant burdens could be forecast by knowledge of the social identity called race then the regime could be seen as non racial In American experience the regime was at one time purposeful and sustained white advantage The white race and its preferential standing was central to virtually all institutional practice public and private The significant contemporary question is the degree of change in the racial regime Some proceed with the assumption that a large degree of change has occurred in the American political system The view of other contributors is that the system still sustains racial stratification In its very internal dialogue this volume presents a panorama of current work by political scientists African American and other on the character of the American political system Contributors include Cedric Robinson Charles Henry Edward J Muller Marjorie Lewis Katherine A Hinckley and Bette S Hill Nancy Haggard Gilson and Vernon Johnson The Changing Racial Regime is an essential resource for political scientists black studies specialists and scholars and policy analysts of race relations in the United States

Antiliberal Internationalism in the Twentieth Century

Matthijs Lok, Marjet Brolsma, Robin de Bruin, Stefan Couperus, Rachel McElroy White, 2025-05-21 This book shows how antiliberal discourse thought and mobilization have in defiance of nationalist aims been significantly shaped and determined in the international sphere as new collaborations position themselves against the liberal order established after the fall of the Berlin Wall Despite often drawing inspiration from nationalist movements and ideologies antiliberalism is a phenomenon that transcends domestic contexts and settings in important ways This collection of essays charts the many sided aspects of twentieth century internationalism and its contemporary developments across the globe Without excluding well known European sources of antiliberal internationalism it decentres the European experience by exploring specific case studies from South and East Asia the Middle East the Americas Africa and Oceania Moreover the volume abundantly demonstrates that liberalism and anti liberalism cannot be considered as fixed entities as anti liberalism was and is as much defined by its enemies as by its advocates This book is intended for scholars and students of International Studies Intellectual History Political History Political Science European Studies and Global Studies as well as for journalists and policymakers interested

in contemporary Europe cosmopolitanism political polarization and the traditions of the right and far right

Pan-Africanism Versus Partnership Brooks Marmon, 2023-04-29 This book takes the transnational history of southern Africa's liberation struggles in an innovative direction. It provides one of the first targeted studies of the manner in which the wider process of African decolonisation shaped the political struggle for control of Southern Rhodesia colonial Zimbabwe. It offers an in-depth survey of the repercussions of pan-African developments on national level political thought amidst one of the most seminal moments of the continent's history. The book draws on over a year of fieldwork in southern Africa as well as archival collections in the USA and UK to explore the seismic re-alignments that occurred in the white settler dominated territory in southern Africa as self-determination became a widely accepted international principle virtually overnight. In particular, it focuses on the impact of decolonisation struggles and/or independence in Ghana, Nigeria, the Democratic Republic of the Congo and Malawi on Zimbabwe's liberation struggle. In so doing, it also offers new context on the roots of contemporary repression in Zimbabwe.

The Last British Liberals in Africa Dickson Mungazi, 1999-05-30 A study of the clash of two traditions: British liberalism and African nationalism and an examination of how Michael Blundell in Kenya and Garfield Todd in Zimbabwe used their liberal backgrounds to further the future of their adopted countries despite threats and detention. Both Blundell and Todd believed that political leaders had a responsibility to serve the needs of the people as a condition of national development. By the time each came to power, European colonization had had a profoundly negative effect on the lives of Africans. Blundell and Todd sought to correct this by putting their positive views of Africans into practice. While colonial governments designed strategies for controlling Africans to serve political and economic interests at home, in Europe Africans themselves established their own effective strategy not only to ensure their survival in the colonial setting but also to initiate a process for the restoration of their sense of self. Michael Blundell and Garfield Todd, with their liberal beliefs, served as excellent allies in this period of a rising African consciousness. Using sources obtained in Kenya and Zimbabwe over the past 15 years, this work examines democratic traditions that have survived tumultuous times in recent years.

Conflict and Conflict Management Joseph S. Himes, 2008-06-01 The scope and content of Conflict and Conflict Management derive from some of the most frequently asked questions about the subject. What is social conflict? What are its prominent characteristics and most common forms? Is conflict inevitable? How do social structure and unequal distribution of power affect the prevalence and nature of conflict? Are there positive consequences of conflict? What actions can be taken to prevent conflict? Can conflict be predicted and forestalled? Joseph S. Himes effectively demonstrates that contemporary social science can provide answers to most of these questions. His responses to the questions are drawn from social science literature, theory and research and are organized around two central issues: the effort to understand social conflict and the task of managing it. Conflict and Conflict Management is divided into two sections.

each covering one of these two central issues The importance of Himes s overview is threefold In the first place it unites recent theory and research in a systematic synthesis Secondly it grounds the strategies of conflict management in a theory of conflict causation thus providing a rationale for the strategies discussed And finally his work illuminates the study of social conflict by differentiating legitimate from nonlegitimate expressions and thus clarifies both the task of analysis and the business of management

Transforming Settler States Ronald Weitzer,2023-11-15 In the past two decades several settler regimes have collapsed and others seem increasingly vulnerable This study examines the rise and demise of two settler states with particular emphasis on the role of repressive institutions of law and order Drawing on field research in Northern Ireland and Zimbabwe Ronald Weitzer traces developments in internal security structures before and after major political transitions He concludes that thoroughgoing transformation of a repressive security apparatus seems to be an essential but often overlooked precondition for genuine democracy In an instructive comparative analysis Weitzer points out the divergent development of initially similar governmental systems For instance since independence in 1980 the government of Zimbabwe has retained and fortified basic features of the legal and organizational machinery of control inherited from the white Rhodesian state and has used this apparatus to neutralize obstacles to the installation of a one party state In contrast though liberalization is far from complete The British government has succeeded in reforming important features of the old security system since the abrupt termination of Protestant Unionist rule in Northern Ireland in 1972 The study makes a novel contribution to the scholarly literature on transitions from authoritarianism to democracy in its fresh emphasis on the pivotal role of police military and intelligence agencies in shaping political developments This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990
