Rhythm And Metre Towards A Systematic Description Of Greek Stichic Verse:

Towards a Typology of Poetic Forms Jean-Louis Aroui, Andy Arleo, 2009 Metrics is often defined as a discipline that concerns itself with the study of meters In this volume the term is used in a broader sense that more or less coincides with the traditional notion of versification Understood this way metrics is an eminently complex object that displays variation over time and in space that concerns forms of a great variety and with different statuses meters rhymes stanzas prescribed forms syllabification rules nursery rhymes slogans musical textsetting ablaut reduplication etc and that as a cultural manifestation is performed in a variety of ways sung chanted spoken read that can have direct consequences on how it is structured This profusion of forms is thought to correspond at the level of perception to a limited number of cognitive mechanisms that allow us to perceive and to represent regularly iterating forms This volume proposes a relatively coherent overall vision by distinguishing four main families of metrical forms each clearly independent of the others and amenable to separate typologies

Attractive Performances Frits Naerebout, 2023-07-17 This book is not another history of the dance in ancient Greece but wants to lay the groundwork on which such a history should properly be build The three preliminary studies offered here are first an extensive historiography of the subject which seeks to illuminate where we stand at present in reference to the large amount of work done on ancient Greek dance for the past 500 years Secondly an exercise in source criticism embracing both texts and imagery in order to establish the limits to which we can push any investigation and thirdly an attempt at model building to provide an explicit theoretical framework for future research This is the first time that some of the approaches of the new dance scholarship which has arisen during the past few decades have been systematically applied to the dancing of the ancient world

The Greek rhetorician Dionysius of Halicarnassus was active in Augustan Rome For a long time modern scholars have regarded him as a rather mediocre critic whose works were only interesting because of the references to earlier scholars and the citations of literary fragments By interpreting Dionysius views within the context of his rhetorical programme this book shows that Dionysius was in fact an intelligent scholar who combined theories and methods from various language disciplines and used them for his own practical purposes His rhetorical writings not only inform us about the linguistic knowledge of intellectuals at the end of the first century BC but also demonstrate the close connections between philology technical grammar philosophy music studies and rhetoric **FrC 16.6 Nausikrates - Nikostratos** Anna Lamari,2023-06-12

This book is a fully fledged commentary on the fragments of the Greek comic poets Nausikrates and Nicostratus By reconstructing the text and providing metrical linguistic and detailed philological analysis it makes the work of these neglected authors accessible to all those interested in Greek drama and classical literature at large **Pseudo-Manetho, Apotelesmatica**

,2023-04-12 The corpus of astrological material ascribed to the Egyptian priest Manetho consists of six books of poetry This book serves as the companion to the one published by OUP in 2020 which was the first commentary in any language on the earliest three books of Manetho s poetry two three and six as they appear in the manuscript This volume supplies the remainder books four one and five Manetho was credited with a series of didactic poems which list outcomes for planetary set ups in a birth chart The books covered in this volume are not as easily dated as those in the first volume but the most recent is probably no later than the fourth century and they are still Egyptian As in the first volume their descriptions of the kinds of person who are born under happy and unhappy configurations of stars speak to the lived realities aspirations and fears of the astrologer s clientele Unlike in the first volume however the individual books treated here have different authors and there is more emphasis on profiling individual poets in terms of style metre and mannerisms As in the first volume there is a Greek text with English translation and an apparatus with parallel material to enable comparison with related works But this volume pays more attention to the transmission of traditional material from one author to another and to the special approach required of an editor of material which being in practical use circulated in unstable and minutely varying textual forms
