Rhythms Bruce E. Arnold, 1997-05-01 Using the internet as a teaching tool this guide is aimed at any instrumentalist seeking to develop their understanding of rhythms This volume concentrates on eighth note rhythms and is a thesaurus of rhythmic patterns All examples use one pitch allowing the student to focus completely on time and rhythm Audio examples for all exercises in the form of midi files can be downloaded from the internet

Rhythm Primer Bruce E. Pitch and Rhythm - Treble Clef - Diatonic - Assorted Meters Nathan Petitpas, 2019-04-16 This collection presents its user with a series of notes on a treble staff in the context of increasingly complex rhythmic material The pitch material in this book is entirely diatonic with a space left at the beginning of each system in which one can write a key signature Early chapters use only notes on the staff while subsequent chapters begin to add notes on ledger lines above and below the staff Each chapter contains two exercises in each of the following time signatures 2 4 3 4 4 4 6 8 9 8 and 12 8 This gives exercises in 2 3 and 4 beats per bar in both simple and compound meters From chapter to chapter the conceptual difficulty of the rhythmic material increases The exercises in this collection are intentionally aimless wandering and difficult to internalize They resemble standard melodies on the surface but don t emphasize any particular tonal centre or harmonic movement They are designed this way for several reasons In keeping the melodic material as non specific as possible the door is left open for the materials to be used in conjunction with any number of exercises something that would be much more difficult with a composition that dictates the harmonic melodic and rhythmic phrasing It also allows the user to read the exercises in any key signature making this a great tool to help students learn to think in different keys The unpredictability of these exercises also forces the user to process every note and rhythm as its own event without relying on pattern recognition or melodic and harmonic tendencies to help in figuring out the notes and rhythms While I absolutely agree that the skill of predicting music s direction from harmonic and melodic cues is an essential skill for any musician to develop I think we will all agree that resources for this type of reading practice are already abundant This collection on the other hand is designed to develop the user s ability to process raw musical data Once this skill is strengthened and internalized it is my belief that the act of reading more predictable and typically melodic music will be made much easier as the processing of notes and rhythms will be second nature allowing the musician to focus on musicality This book is a supplement to practising sight reading using real music not a replacement I encourage you to use both If this material is being used to practice sight reading it is encouraged to cycle through the exercises quickly rather than dwelling on a particular exercise for a long period of time The goal in practising sight reading is not to learn the material but to develop the skill of reading new material Some suggestions for how to use this book include Read each

exercise in all 15 key signatures from 7 flats to 7 sharps Practice key changes by writing in a different key signature for each system Increase the challenge of the previous exercise by using a metronome on weak beats For example instead of putting the metronome click on each quarter note in 4/4 play the exercise with the metronome giving the second eighth note of each beat or the last sixteenth note or beats 2 and 4 Be creative with this one the possibilities are limitless Develop independence between hands by playing a repeating pattern in one hand while reading an exercise in the other Write in articulations dynamics bowing sticking or fingering for your students to practice As with any of the Dots and Beams books the uses for this particular collection are limited only by the imagination of the musician using it I highly encourage anybody using this book to find as many uses for these exercises as possible

Rhythm Only - Book 2 - Eighths and Sixteenths - Assorted

Meters Nathan Petitpas, This collection presents the user with a series of increasingly difficult rhythms on a single pitch The rhythmic material in this series is organized into 10 difficulty levels Each difficulty level contains four exercises in each of the following time signatures 2/4 3/4 4/4 6/8 9/8 and 12/8 This gives exercises in 2 3 and 4 beats per bar in both simple and compound meters The first two exercises of each time signature have no ties while the remaining two exercises in each time signature include ties In Book 1 of this series you will find difficulty levels 1 to 5 while Book 2 completes the set with levels 6 to 10 To curate the difficulty levels I looked at all of the possible ways we can use eighth notes and sixteenth notes to subdivide a single beat without the use of tuplets The lowest difficulty level is comprised of the easiest of these one beat rhythmic groupings Subsequent difficulty levels include more challenging groupings while continuing to use the easier ones from previous chapters In this way the difficulty levels are cumulative level 1 uses only the easiest groupings but by level 9 all of the possible rhythmic groupings have been introduced Level 10 increases the density of challenging groupings by omitting the easier ones The introductory page of each chapter introduces the rhythmic groupings that will be added or omitted in that chapter On some occasions rhythmic groupings are respelled however these new spellings are not formally introduced at the beginning of the chapter The exercises in this collection are intentionally random and difficult to internalize In keeping the rhythmic material as unpredictable as possible the door is left open for the materials to be used in many ways It also forces the user to process every rhythm as its own event without relying on pattern recognition for help Some suggestions for how to use this book include Practice sight reading The goal in practising sight reading is not to learn the material but to develop the skill of reading new material When practising sight reading I encourage you to cycle through exercises quickly rather than mastering each one Use a metronome The most important thing you can do with this material is learn how to read these rhythms and play them in time Advanced metronome work Placing the metronome click on non strong beats forces you to take responsibility for the time in a different way and trains you to hear how your rhythm relates to each subdivision of the beat For example instead of putting the metronome click on each quarter note in 4/4 play the exercise with the metronome giving the second eighth note of each beat or the last sixteenth note or beats 2 and 4 or every third sixteenth

note Be creative with this one the possibilities are limitless Develop independence between hands by playing a repeating pattern in one hand while reading an exercise in the other Expand on this by adding patterns in hands and feet while reading a rhythm with a remaining limb This is a great exercise for drummers and percussionists but any instrumentalist could benefit from coordination practice Use these rhythms to practice scales Instead of playing scales in straight sixteenth notes try playing them in the rhythms given in these exercises Write in sticking patterns dynamics accents phrase marks or other articulations for you or your students to practice If you re not happy with the ties I included feel free to add some of your own Combine the above exercises in any way that you think will be beneficial to your practice As with any of the Dots and Beams books the uses for this particular collection are limited only by the imagination of the musician using it I encourage anybody using this book to find as many uses for these exercises as possible

An Approach to Sight Reading Rhythm Carson

H Sharp, 2016-12-04 One of the most valuable skills musicians can acquire is that of being able to read at first sight all or most of the music they are asked to play Sight reading is a skill that enables the student to make the most out of the time available to sing or play an instrument The student can use the time otherwise spent on working out rhythm problems to increase musicality and will be able to cover more literature And every professional musician knows that the musician who reads gets the jobs It s also true that the better the members of any school or other musical group sight read the better that group will sound This is true for several reasons First more time can be spent on the development of other aspects of quality performing sound balance intonation and other general musicianship skills Second the time involved in reaching an acceptable performance level is less so the music will naturally be more interesting to the performer And this freshness will show up dramatically in the concert or festival Third the director will now be able to use more rehearsal time to teach some of the things theory music history conducting composition etc that he or she just didn t have time for previously The more each student understands about music as a whole the bigger their contribution will be to the group Of course the greatest benefit will go to the individual student The enjoyment of music will be enhanced considerably as a result of the skills gained in the reading of new music It s been my experience that students at a very young age at least by the sixth grade are capable of handling the concepts and skills required for effective sight reading There are of course several areas in which skills must be developed before a student will be able to sight read well The skill I ll focus on in this book is rhythm This book is an extremely effective method for helping students develop the ability to read simple and complex rhythms at first sight The most effective way of developing the skill of instantly analyzing complex rhythmic figures is pulse subdivision The difficulty most of us have had involves the material available to help us teach these concepts Once the student understands what to do practice material is needed that will help integrate each new concept into their bag of performance skills Material is needed that will allow focus on a particular new concept without the distraction of other playing problems Enough material is needed to avoid going over and over the same exercises The student can t learn to sight read if the material is familiar The manner in which this method solves this problem is with many lines of single pitch exercises These exercises allow the student to concentrate on developing particular skills without having to worry about changes in pitch etc There are also enough exercises so that by the time all of them are covered the previous exercises are forgotten and can be reused if necessary When used by instrumental organizations bands and orchestras or choral groups choose a single pitch or octaves Example Concert FPiano students who use their feet on pedals can vocalize the say down on each quarter note and rest Instrumentalists not using their mouths to generate sound can vocalize the pulse percussion strings etc If fingers are available to generate the pulse vocalists use them against your leg or lap to generate the pulse *Play at first sight* Lalo Davila, 2006 *Play at First Sight* is a unique and comprehensive approach to help improve sight reading skills It will strengthen your ability to recognize rhythms quickly and perform them as confidently as possible The more you practice the exercises
