#### Rice Biotechnology Improving Yield Stress Tolerance And Grain Quality:

Rice Biotechnology Jamie A. Goode, Derek J. Chadwick, 2008-04-30 Rice is the most important food crop for half the world s population Over the last three decades the imporvement in human nutrition and health in Asia has largely been attributable to a relatively stable and affordable rice supply The challenge to produce enough rice for the future however remains daunting as the current rate of population growth outpaces that of increases in rice production Science has a central role to play in raising rice productivity and this book highlights areas of plant science that are particularly relevant to solving the major constraints on rice production Examining molecular genetic and cellular techniques it considers recent advances in four research approaches for increasing yields and improving the nutritional quality of rice Plant genomics knowing the identity and location of each gene in the rice genome is of immense value in all aspects of rice science and cultivar improvement Molecular biological approaches to increase yield to produce more biomass by increasing photosynthetic rate and duration and by improving grain filling Enhancing tolerance to biotic and abiotic stresses with new DNA array technologies it is now possible to assess global genomic response to stresses Understanding the relationships among stress pathways may create new opportunities for gene manipulation to enhance tolerance to multiple biotic and abiotic stresses Improving nutritional quality in the grain knowledge of the biosynthesis of micronutrients in plants permits genetic engineering of metabolic pathways to enhance the availability of micronutrients **Improving Water and Nutrient-Use Efficiency in Food Production Systems** Zed Rengel, 2013-04-01 Improving Water and Nutrient Use Efficiency in Food Production Systems provides professionals students and policy makers with an in depth view of various aspects of water and nutrient us in crop production The book covers topics related to global economic political and social issues related to food production and distribution describes various strategies and mechanisms that increase water and nutrient use efficiency and review te curren situation and potential improvements in major food producing systems on each continent The book also deals with problems experienced by developed countries separtaely from problems facing developing countries Improving Water and Nutrient Use Efficiency emphasizes judicious water and nutrient management which is aimed at maximising water and nutrient utilisation in the agricultural landscape and minimising undesirable nutrient losses to the environment Crop Stress and its Management: Perspectives and Strategies B. Venkateswarlu, Arun K. Shanker, Chitra Shanker, M. Maheswari, 2011-11-22 Crops experience an assortment of environmental stresses which include abiotic viz drought water logging salinity extremes of temperature high variability in radiation subtle but perceptible changes in atmospheric gases and biotic viz insects birds other pests weeds pathogens viruses and other microbes The ability to tolerate or adapt and overwinter by effectively countering these stresses is a very multifaceted phenomenon In addition the inability to do so which renders the crops susceptible is again the result of various exogenous and endogenous interactions in the ecosystem Both biotic and abiotic stresses occur at various stages of plant development and frequently more than one stress concurrently

affects the crop Stresses result in both universal and definite effects on plant growth and development One of the imposing tasks for the crop researchers globally is to distinguish and to diminish effects of these stress factors on the performance of crop plants especially with respect to yield and quality of harvested products This is of special significance in view of the impending climate change with complex consequences for economically profitable and ecologically and environmentally sound global agriculture The challenge at the hands of the crop scientist in such a scenario is to promote a competitive and multifunctional agriculture leading to the production of highly nourishing healthy and secure food and animal feed as well as raw materials for a wide variety of industrial applications. In order to successfully meet this challenge researchers have to understand the various aspects of these stresses in view of the current development from molecules to ecosystems The book will focus on broad research areas in relation to these stresses which are in the forefront in contemporary crop stress Molecular Breeding for Rice Abiotic Stress Tolerance and Nutritional Quality Mohammad Anwar Hossain, Lutful Hassan, Khandakar Md. Iftekharuddaula, Arvind Kumar, Robert Henry, 2021-04-06 Presents the latest knowledge of improving the stress tolerance yield and quality of rice crops One of the most important cereal crops rice provides food to more than half of the world population Various abiotic stresses currently impacting an estimated 60% of crop yields are projected to increase in severity and frequency due to climate change In light of the threat of global food grain insecurity interest in molecular rice breeding has intensified in recent years Progress has been made but there remains an urgent need to develop stress tolerant bio fortified rice varieties that provide consistent and high quality yields under both stress and non stress conditions Molecular Breeding for Rice Abiotic Stress Tolerance and Nutritional Quality is the first book to provide comprehensive and up to date coverage of this critical topic containing the physiological biochemical and molecular information required to develop effective engineering strategies for enhancing rice yield Authoritative and in depth chapters examine the molecular and genetic bases of abiotic stress tolerance discuss yield and guality improvement of rice and explore new approaches to better utilize natural resources through modern breeding Topics Include rice adaptation to climate change enriching rice yields under low phosphorus and light intensity increasing iron zinc vitamin and antioxidant content and improving tolerance to salinity drought heat cold submergence heavy metals and Ultraviolet B radiation This important resource Contains the latest scientific information on a wide range of topics central to molecular breeding for rice Provides timely coverage molecular breeding for improving abiotic stress tolerance bioavailability of essential micronutrients and crop productivity through biotechnological methods Features detailed chapters written by internationally recognized experts in the field Discusses recent progress and future directions in molecular breeding strategies and research Molecular Breeding for Rice Abiotic Stress Tolerance and Nutritional Quality is required reading for rice researchers agriculturists and agribusiness professionals and the ideal text for instructors and students in molecular plant breeding abiotic stress tolerance environmental science and plant physiology biochemistry molecular biology and biotechnology Climate Change and Crop

The Role of Plant Pathology in Food Safety and Food Security R.N. Strange, Maria Lodovica Gullino, 2009-11-28 This collection of papers represents some of those given at the International Congress for Plant Pathology held in Turin in 2008 in the session with the title The Role of Plant Pathology in Food Safety and Food Security Although food safety in terms of Is this food safe to eat did not receive much direct attention it is never theless an important topic A crop may not be safe to eat because of its inh ent qualities Cassava for example is cyanogenic and must be carefully prepared if toxicosis is to be avoided Other crops may be safe to eat providing they are not infected or infested by microorganisms Mycotoxins are notorious examples of compounds which may contaminate a crop either pre or post harvest owing to the growth of fungi Two papers in this book deal with toxins one by Barbara Howlett and co workers and the other by Robert Proctor and co workers In the first of these the role of sirodesmin PL a compound produced by Leptosphaeria ma lans causal agent of blackleg disease of oilseed rape Brassica napus is discussed The authors conclude that the toxin plays a role in virulence of the fungus and may also be beneficial in protecting the pathogen from other competing micro organisms but there seem to be no reports of its mammalian toxicity

John Newbury, 2009-02-18 The last few years have seen an explosion of new information andresources in the areas of plant molecular genetics and genomics Asa result of developments such as high throughput sequencing we nowhave huge amounts of information available on plant genes But howdoes this help people charged with the task of improving cropspecies to create products with altered functions or improved characteristics. This volume considers ways in which the new information resources and technology can be exploited by the plant breeder Examples in current use will be quoted wherever possible Soil Constraints on Crop Production Yash Dang, Neal Menzies, Ram C Dalal,2022-08-19 Globally over two thirds of soils are affected by physical chemical or biological soil constraints These constraints cause significant yield loss and as such identifying appropriate management strategies is crucial to ensure future world food production In order to help agricultural researchers and practitioners better understand soil constraint management this book comprehensively outlines the occurrence of the major soil constraints and the most appropriate strategies to manage these for sustainable food production Importantly it brings together experts from major agricultural regions globally to highlight approaches with the most success in different environmental and socioeconomic regions Water Productivity in Agriculture J. W. Kijne, Randolph Barker, D. J. Molden, 2003 First title in a major new worldwide seriesAddresses improving water productivity to relieve problems of scarcity and competition to provide for food and environmental securityDraws from scientists having a multitude of disciplines to approach this important problemIn a large number of developing countries policy makers and researchers are increasingly aware of the conflicting demands on water and look at agriculture to be more effective in its use of water Focusing on both irrigated and rain fed agriculture this book gives a state of the art review of the limits and opportunities for improving water productivity in crop production It demonstrates how efficiency of water use can be enhanced to maximize yields The book represents the first in a new series of volumes resulting from the Comprehensive Assessment of Water Management in Agriculture a research program conducted by the CGIAR's Future Harvest Centres the Food and Agriculture Organization of the United Nations and partners worldwide It will be of significant interest to those working in areas of soil and crop science water management irrigation and development studies Reengineering Local Knowledge: Life, Science and Technology (Penerbit USM) Norizan Esa, Leela Rajamani, Zuraidah Mohd. Yusoff, This book presents local knowledge about issues on life science and technology It presents the related science and technology knowledge new applications or developments that have taken place based on local knowledge It consists of papers that illustrate the contribution of local knowledge to scientific investigation unearth unknown or little known significance of local plant and animal resources as well as their management and conservation The argument for the importance of modern techniques to increase the supply of natural resources through scientific manipulations is clear However traditional methods that ensure better quality and resilience is recommended Integration of the traditional with the modern is explored using disaster management strategies and integrative health care system as examples Another aspect explored in this book is the changing food culture among the three main ethnics groups in Malaysia due to their interactions within a multicultural society This book also highlights the contribution of local knowledge in developing animation technology Experimentation with GIS technology in the performing arts to map a dance performance is an example of trans disciplinary collaboration between technology and the arts This book serves to expand knowledge in science and technology
