terms where complex terms are taken to have the same syntax as statements Whereas standard logic requires extensive translation from natural language to symbolic language term logic requires only transcription into the symbolic language Its naturalness is the result of its ability to stay close to the forms of sentences usually found in every day discourse Written by the founders of the term logic approach An Invitation to Formal Reasoning is a unique introduction and exploration of this new system offering numerous exercises and examples throughout the text Summarising the standard system of mathematical logic to set term logic in context and showing how the two systems compare this book presents an alternative approach to standard modern logic for those studying formal logic philosophy of language or computer theory Fred Sommers is Professor Emeritus Brandeis University USA George Englebretsen is Professor of Philosophy Bishop s University Canada
