Rich Nation Strong Army National Security And The Technological Transformation Of Japan:

"Rich Nation, Strong Army" Richard J. Samuels, 1994 From 1868 until 1945 the Japanese economy was fired by the development of technology to enhance national security the rallying cry Rich Nation Strong Army accompanied the expanded military spending and aggressive foreign policy that led to the disasters of the War in the Pacific Postwar economic planners reversed the assumptions that had driven Japan's industrialization Samuels shows promoting instead the development of commercial technology and infrastructure By valuing process improvements as much as product innovation the modern Japanese system has built up the national capacity to innovate while ensuring that technological advances have been diffused broadly through industries such as aerospace that have both civilian and military applications **In Defense of Japan**

Saadia Pekkanen, Paul Kallender-Umezu, 2010-08-12 In Defense of Japan provides the first complete up to date English language account of the history politics and policy of Japan's strategic space development The dual use nature of space technologies meaning that they cut across both market and military applications has had two important consequences for Japan First Japan has developed space technologies for the market in its civilian space program that have yet to be commercially competitive Second faced with rising geopolitical uncertainties and in the interest of their own economics the makers of such technologies have been critical players in the shift from the market to the military in Japan's space capabilities and policy This book shows how the sum total of market to military moves across space launch vehicles satellites and spacecraft and emerging related technologies already mark Japan as an advanced military space power

Innovation in Energy Law and Technology Donald Zillman, Lee Godden, LeRoy Paddock, Martha Roggenkamp, 2018-03-09 There are few existential challenges more serious in the twenty first century than energy transition As current trends in energy production prove unsustainable for the environment energy security and economic development innovation becomes imperative Yet with technological challenges come legal challenges Zillman Godden Paddock and Roggenkamp assemble a team of experts in their field to debate how the law may have to adapt to changes in the area What regulatory approach should be used How do we deal with longer term investment horizons and so called stranded assets such as coal fired power stations And can a form of energy justice be achieved which encompasses human rights sustainable development goals and the eradication of energy poverty With a concept as unwieldy as energy innovation it is high time for a text tackling changes which are dynamic and diverse across different communities and which provides a thorough examination of the legal ramifications of the most recent technological changes This book which be of vital importance to lawyers policy makers economists and the general reader

Human Rights Constitutionalism in Japan and Asia Lawrence W. Beer, 2009-05-01 Less noticed in the West than wars terrorism and economic trends has been the historic development since World War II of constitutional government and law in Asia Lawrence W Beer has been a close observer of Asian linkages among law politics culture and national security issues for over fifty years His perspectives have been refined during long residence in Asia especially Japan by substantial friendly interactions with Asian legal scholars judges and attorneys involved in the world of human rights constitutional law This volume which will be widely welcomed by students and researchers brings together a selection of Beer s many works previously published in diverse venue but no longer easily accessible The collection opens with a review

of constitutionalism in Asia and the United States and concludes with a recent examination of Japan's rejection of war Japan's Constitutional Discourse and Performance By way of Afterword the author offers an in depth review of Globalization of Human Rights in the 21st Century **The Far East and Australasia 2003** Europa Publications,2002 A unique survey of each country in the region It includes an extensive collection of facts statistics analysis and directory information in one accessible volume Crisis and Innovation in Asian Technology William W. Keller,Richard J. Samuels,2003-02-03 In mid May 1997 a financial crisis erupted in Asia after an attack by private investors on the baht the Thai currency The crisis spread quickly across the region where investor confidence plummeted resulting in massive capital outflows stock market collapses high unemployment and even insurrection The Asian economic miracle that had stimulated so much awe and even dread now invoked pity and apprehension in greater measure The contributors to this volume investigated change in the innovation and production systems of Asian states in response to economic and political upheaval They conducted empirical studies of several regional industries autos semiconductors and hard disk drives and seven different national economies China Malaysia Japan Singapore South Korea Thailand and Taiwan In the face of crisis and global competition the Asian states superimposed change at the margins seeking unique technohybrid solutions to build capabilities to compete in local regional and even global markets **Governing Ideas** J. Nicholas Ziegler,1997 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany's strengths stem directly from what Ziegler calls an ethos of competence whereas France's strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups *Japan's Politics and Economy* Marie Söderberg,Patricia Nelson,2009-12-16 This book focuses on the processes of change taking place in Japan's politics and economy The contributors look at a number of different areas including political leadership the defence industry security and diplomatic policy peace building official development assistance the economic and business areas and education policy The Japan Handbook Patrick Heenan,2014-01-27 The Regional Handbooks of Economic Development series provides accessible

Japan and the Security of Asia Louis D. Hayes, 2001-01-01 In *Japan and the Security of Asia* Louis Hayes studies modern Japan s frustrated search for national security The book charts Japan s attempts to fashion its own place in the sun in the face of Great Power interventionism and national demands for regional hegemony first through nascent internationalism and later disastrous totalitarianism that culminated in war in the Pacific Hayes expertly tracks Japan s shifting foreign policy goals up to the present day moving from the preservation of the nation state by force to the drive for economic self aggrandizement as a Cold War client of the United States The book reveals to the student of modern Asian history a twenty first century Japan that has rejected unarmed neutrality and is reasserting its security independence in post Cold War Asia

Fortifying China Tai Ming Cheung, 2013-04-15 *Fortifying China* explores the titanic struggle to turn China into an aspiring world class military technological power The defense economy is leveraging the country s vibrant civilian economy and gaining access to foreign sources of technology and know how Drawing on extensive Chinese language sources Tai Ming Cheung explains that this transformation has two key dimensions The defense economy is being reengineered to break down bureaucratic barriers and reduce the role of the state fostering a more competitive and entrepreneurial culture to facilitate the rapid diffusion and absorption of technology and knowledge At the same time the civilian and defense economies are being integrated to form a dual use technological and industrial base In Cheung s view the Chinese authorities believe this strategy will play a key role in supporting long term defense modernization For China s neighbors and the United States understanding China s technological industrial and military capabilities is critical to the formulation of economic and security policies *Fortifying China* provides crucial insight into the impact of China s dual use technology strategy Cheung s systems of innovation framework considers the structure dynamics and performance of the defense economy from a systems level perspective

and national security processes Saadia M Pekkanen and P J Blount have gathered a group of key scholars who bring a range of analytical and theoretical perspectives to take an analytically eclectic approach to assessing space security from an international relations IR theory perspective Bringing together scholarship from a group of leading experts this volume explains how these contemporary changes will affect future security in from and through space *Japan's War Economy* Erich Pauer, 2002-01-31 This book explores the substantial and dynamic innovations of the wartime era identifying this period as the most influential for Japan's post war economic structure Erich Pauer and a team of leading Japanese and German scholars discuss important aspects of the Japanese wartime economy including ideological background the Japanese planned economy technical mobilization women and the war economy socio economic change food shortages the black market and economic crime national policy companies financial reforms *Japan's Arduous Rejuvenation as a Global Power* Victor Teo, 2019-04-08 This open access book assesses the profound impact of Japan's aspirations to become a great power on Japanese security democracy and foreign relations Rather than viewing the process of normalization and rejuvenation as two decades of remilitarization in face of rapidly changing strategic environment and domestic political circumstances this volume contextualizes Japan's contemporary international relations against the longer grain of Japanese historical interactions It demonstrates that policies and statecraft in the Prime Minister Shinzo Abe's era are a continuation of a long unbroken and arduous effort by successive generations of leaders to preserve Japanese autonomy enhance security and advance Japanese national interests Arguing against the notion that Japan cannot work with China as long as the US Japan alliance is in place the book suggests that Tokyo could forge constructive relations with Beijing by engaging China in joint projects in and outside of the Asia Pacific in issue areas such as infrastructure development or in the provision of international public goods It also submits that an improvement in Japan China relations would enhance rather than detract Japan US relations and that Tokyo will find that her new found autonomy in the US Japan alliance would not only accord her more political respect and strategic latitude but also allow her to ameliorate the excesses of American foreign policy adventurism paving for her to become a truly normal great power *Ulysses S. Grant and Meiji Japan, 1869-1885* Ian Patrick Austin, 2019-06-05 Ulysses S Grant besides being the General in Chief of the Union armies at the time of the Union victory in the American Civil War was also President 1869-1878 at a time when the United States was undergoing significant transformations both economically and strategically and growing in confidence as a world power At the same time Japan following the Meiji Restoration of 1868 was seeking to join the ranks of the developed read exclusively Western states This book explores the interaction of Grant with Meiji Japan compares and contrasts developments in the two countries and assesses the impact each country had on the other It discusses the travels of the Iwakura Mission in the United States considers Grant's 1879 visit to Japan and examines the personal relationship between Grant the Meiji emperor and the other leaders of the Meiji government The book argues that Grant's thoughtful consideration of the key issues of the day issues

common to many countries at the time and his suggested policy responses had a huge impact on Meiji Japan
