Richard Meier Details:

Details Werner Blaser, Richard Meier, 1996 In this book Werner Blaser presents the most important buildings and projects that Richard Meier has produced and designed in recent years All the buildings and projects are presented from the same aspects situation program circulation structure texture layers This permits an effective comparison of the various buildings and brings out their aesthetic individuality and the guiding principles behind their construction By highlighting key details the monograph demonstrates the allegiance of Meier's latest works to the ideal of classical art combining the simple with the noble into a contemporary harmonious whole The Architectural Detail Edward R. Ford, 2012-08-10 The Architectural

Detail is author Edward R Ford's life's work and this may be his most important book to date Ford walks the reader through five widely accepted and wildly different definitions of detail in an attempt to find once and for all the quintessential definition of detail in architecture The Greenwood Encyclopedia of Homes through World History James M.

Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present *An Illustrated Guide to Furniture History* Joclyn M. Oats, 2021-07-20 An Illustrated Guide to Furniture History provides upper level students and instructors with an alternative visual analytical approach to learning about furniture history from Antiquity to Postmodernism Following an immersive teaching model it presents a Nine Step Methodology to help students strengthen their visual literacy and quickly acquire subject area knowledge Moving chronologically through key periods in furniture history and interior design such as the Renaissance the Arts and Crafts Movement and Modernism it traverses Europe to America to present a comprehensive foundational guide to the history of furniture design Part I addresses furniture within the context of the built environment with chapters exploring the historical perspective construction principles and the categorization of furniture In Part II the author visually depicts the structural organization of the methodological process a three category framework History Aesthetics and Visual Notes The chapters in this part prepare the reader for the visual analysis that will occur in the final section of the book The book is lavishly illustrated in full color with over 300 images to reinforce visual learning and notation A must have reference and study guide for students in industrial and product design interior design and architecture **Richard Meier: Daimler, Benz** Richard Meier, Thorwald Ewe, Ingeborg Flagge, 1994

Richard Meier Silvio Cassarà, 2004 *Richard Meier* Volker Fischer, 2003 **The Fractal Dimension of**

Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design

Artists' Impressions in Architectural Design Bob Giddings, Margaret Horne, 2003-09-02 Artists Impressions in Architectural Design analyses the ways in which architects have presented their designs for clients and the public both historically and contemporarily It spans a period from the fifteenth to the twenty first century Architects have become familiar with change The passage of time has brought with it new and revived styles of architecture as well as innovative tools and techniques for their representation The result is that while some methods show a view of the architect s concept for a building others offer an almost real experience of the intended architecture This book provides a rare and valuable study in which the exciting technological developments of today are placed in context with the rich heritage of the past It offers an opportunity to learn how architects have chosen to represent their ideas The authors dare to glimpse into the future and hopefully offer some reassurance for tomorrow

Richard Meier, Architect Richard Meier, Kenneth Frampton, Joseph Rykwert, 2004 Volume four comprehensively documents Meier s work since the publication of the previous volume in 1999 This extensively illustrated presentation vividly conveys the purity and power of Meier s unique and celebrated vision

The Details of Modern Architecture Edward R. Ford, 1990 Covering the period 1890 1932 this book focuses on various recognised masters explaining the detailing and construction techniques used in their buildings

Richard Meier , 2003 Richard Meier is one of our most acclaimed Modernist architects This book showcases his rarely seen work in sculpture collage furniture and personal accessories
