Jr., 2015-07-23 Czech it Out Czech American Biography Sourcebook provides a wealth of information on a variety of sources relating to biographical information on notable Americans with Czech roots Besides the national figures also included are information sources on significant individuals at the state regional and local levels Beyond that we saw it fit to also incorporate ethnic information sources which frequently contain a wealth of information on pioneer settlers and individuals active at the community level Having in mind the interests of genealogists in individual families and their descendents a listing has also been provided on family histories and genealogies Even though Czechs have been living in the US practically since colonial times no composite biographical dictionary exists about the accomplished Czech Americans Biographical

information about them is scattered in a plethora of sources which are difficult to find and some are not readily accessible. The present author who literally devoted several decades of his life to the study of Czech American history has canvassed hundreds of sources at national and local levels to identify not only notable individuals but also pioneer settlers who played a significant role in the growth and development of the US. This publication should fill a great void in literature until a comprehensive biographical compendium about Czech Americans has been written. *Rethinking Technology* William W. Braham, Jonathan A. Hale, 2006-12-05. This essential reference for all students of architecture design and the built environment provides a convenient single source for all the key texts in the recent literature on architecture and technology. The book contains over fifty carefully selected essays, manifestoes, reflections and theories by architects and architectural writers from 1900 to 2004. This mapping out of a century of architectural technology reveals the discipline's long and close attention to the experience and effects of new technologies and provides a broad picture of the shift from the age of tools to the age of systems. Chronological arrangement and cross referencing of the articles enable both a thematic and historically contextual understanding of the topic and highlight important thematic connections across time. With the ever increasing pace of technological change, this Reader presents a clear understanding of the context in which it has and does affect architecture.
