Performance Drawing Maryclare Foá, Jane Grisewood, Birgitta Hosea, Carali McCall, 2020-09-03 What is performance drawing When does a drawing turn into a performance Is the act of drawing in itself a performative process whether a viewer is present or not Through conversation interviews and essays the authors illuminate these questions and what it might mean to perform and what it might mean to draw in a diverse and expressive contemporary practice since 1945 The term performance drawing first appeared in the subtitle of Catherine de Zegher's *Drawing Papers 20 Performance Drawings* in particular with reference to Alison Knowles and Elena del Rivero In this book it is used as a trope and a thread of thinking to describe a process dedicated to broadening the field of drawing through resourceful practices and cross disciplinary influence Featuring a wide range of international artists this book presents pioneering practitioners alongside current and emerging artists The combination of experiences and disciplines in the expanded field has established a vibrant art movement that has been progressively burgeoning in the last few years The Introduction contextualises the background and identifies contemporary approaches to performance drawing As a way to embrace the different voices and various lenses in producing this book the authors combine individual perspectives and critical methodology in the five chapters While embedded in ephemerality and immediacy the themes encompass body and energy time and motion light and space imagined and observed demonstrating how drawing can act as a performative tool The dynamic interaction leads to a collective understanding of the term performance drawing and addresses the key developments and future directions of this applied drawing process *Drawing Now* Laura J. Hoptman, 2002 Published to accompany the exhibition held at the Museum of Modern Art QNS New York 17 October 2002 6 January 2003 **Material Matters** Katie Lloyd Thomas, 2006-12-05 Bringing together texts and work by theorists and practitioners who are making material central to their work this book reflects the diverse areas of inquiry which are expanding current material discourse Focusing on the cultural political economic

technological and intellectual forces which shape material practices in architecture the contributors draw on disciplines ranging from philosophy history and pedagogy to art practice and digital and low tech fabrication By paying critical attention to material a wide range of issues emerge which are otherwise excluded from architectural discourse issues that shape and determine the buildings we make the processes we use and the ways we understand them Beautifully illustrated and designed this book is a unique collection which will be of great interest to architectural practitioners and theorists who want to consider the wider implications of material practice and to students who are developing their own approach to making buildings
