Richard Serra Richard Serra, Hal Foster, 2005 Essays by Hal Foster and Carmen Gimenez **Richard Serra**, 2006

Richard Serra, 2006 **Richard Serra Sculpture** Kynaston McShine, Richard Serra, Lynne Cooke, Museum of Modern

Art (New York, N.Y.), 2007 This book offers a detailed presentation of Richard Serra's entire career from his early experiments with materials like rubber neon and lead to the environmentally scaled steel works of recent years including three monumental new sculptures created for the exhibition that this book accompanies BOOK JACKET **Richard Serra** Connaissance des arts (Périodique), 2006 Ce numéro hors série est consacré l'œuvre The Matter of Time de Richard Serra installée en permanence au Musée Guggenheim Bilbao Il se compose d'un entretien avec Juan Ignacio Vidarte directeur général du Musée Guggenheim Bilbao portant sur la commande de l'œuvre d'un repérage historique du parcours de l'artiste ainsi que d'un essai critique par Fabien Faure sur l'œuvre exposée **Going Feral: Speculative Approaches to Animism in**

the Arts Paula Chambers, Dawn Woolley, 2025-11-04 This edited volume presents critical analyses of animism in the arts with a focus on the boundary practices of going feral Reconsidering the question posed by Cecilia Alemani Venice Biennale 2022 curator authors explore what would life look like without us in a world activated by things and a post humanist animism These speculative discussions are developed in this volume in which we consider how the process and practices of going feral might materialise through and across creative investigations Going feral is a provocative call to untame queer and radicalize feminist thought and practice producing more than human multispecies entanglements and processes of dynamic resistance The chapters critically analyse processes of going feral in artworks and art practices ranging from fine art art history and performance to architecture video games and poetry They consider how going feral allows audiences to form meaningful relationships with spoiled landscapes develop human and non human communities and to reimagine the domestic and the everyday through the prism of new animism The creative practices discussed are geographically diverse including examples from South Africa Brazil Ukraine South Korea Mexico the Caribbean Europe and North America Through these wide ranging approaches and case studies the book asks what are potential futures materialised through artworks that rethink the present as a world populated by things a place where the sensibility of materials becomes carriers of agency This edited volume argues that animism and ferality are vital tools for artists and creative professionals to describe and critique the increasing inequalities and continuous states of emergency that characterise late stage capitalism The concept of going feral is a critical framework to frame contemporary issues such as environmentalism waste and discard studies and speculate ways of decentring anthropomorphism **Landscape Theory in Design** Susan Herrington, 2016-12-08 Phenomenology Materiality Cybernetics Palimpsest Cyborgs Landscape Urbanism Typology Semiotics Deconstruction the minefield of theoretical ideas that students must navigate today can be utterly confusing and how do these theories translate to the design studio Landscape Theory in Design introduces theoretical ideas to students without the use of jargon or an assumption of extensive

knowledge in other fields and in doing so links these ideas to the processes of design In five thematic chapters Susan Herrington explains the theoretic groundings of the theory of philosophy why it matters to design an example of the theory in a work of landscape architecture from the twentieth and twenty first centuries debates surrounding the theory particularly as they elaborate modern and postmodern thought and primary readings that can be read as companions to her text An extensive glossary of theoretical terms also adds a vital contribution to students comprehension of theories relevant to the design of landscapes and gardens Covering the design of over 40 landscape architects architects and designers in 111 distinct projects from 20 different countries Landscape Theory in Design is essential reading for any student of the landscape

Musée Guggenheim Bilbao ,2006 *On Not Looking* Frances Guerin,2015-01-09 *On Not Looking* The Paradox of Contemporary Visual Culture focuses on the image and our relationship to it as a site of not looking The collection demonstrates that even though we live in an image saturated culture many images do not look at what they claim viewers often do not look at the images and in other cases we are encouraged by the context of exhibition not to look at images Contributors discuss an array of images photographs films videos press images digital images paintings sculptures and drawings from everyday life museums and galleries and institutional contexts such as the press and political arena The themes discussed include politics of institutional exhibition and perception of images censored repressed and banned images transformations to practices of not looking as a result of new media interventions images in history and memory not looking at images of bodies and cultures on the margins responses to images of trauma and embodied vision **Josef Albers, Late Modernism, and Pedagogic Form** Jeffrey Saletnik,2022-10-13 An incisive analysis of the pedagogy of influential artist and teacher Josef Albers An extraordinary teacher whose influence continues today Josef Albers helped shape the Bauhaus school in Germany and established the art and design programs at Black Mountain College in North Carolina and Yale University His books about color theory have informed generations and his artworks are included in the canon of high modernist non representational art The pedagogy Albers developed was a dynamic approach to teaching that transcended the modernist agendas and cultivated a material way of thinking among his students With this book Jeffrey Saletnik explores the origins of Albers s teaching practices and their significance in conveying attitudes about form material and sensory understanding to artists Eva Hesse and Richard Serra He demonstrates how pedagogy is a framework that establishes the possibility for artistic discourse and how the methods through which artists learn are manifested in their individual practices Tracing through lines from Albers s training in German educational traditions to his influence on American postwar art Josef Albers *Late Modernism and Pedagogic Form* positions Albers s pedagogy as central to the life of modernism Res: Anthropology and Aesthetics, 53/54 Francesco Pellizzi,2008-12-15 Among other articles this double volume includes The value of forgery Jonathan Hay Affective operations of art and literature Ernst van Alphen Betty s Turn Stephen Melville Reflections on the Aesthetic Experience Gregorio Kohon,2015-08-20 Interest in the relationship between psychoanalysis and art and other

disciplines is growing In his new book *Reflections on the Aesthetic Psychoanalysis* and the uncanny Gregorio Kohon examines and reflects upon psychoanalytic understandings of estrangement the Freudian notions of the uncanny and *Nachträglichkeit* exploring how these are evoked in works of literature and art and are present in our response to such works Kohon provides close readings of and insights into the works of Franz Kafka Jorge Luis Borges Louise Bourgeois Juan Muñoz Anish Kapoor Richard Serra Edvard Munch Kurt Schwitters amongst others the book also includes a chapter on the Warsaw Ghetto Monument and the counter monument aesthetic movement in post war Germany Kohon shows how some works of art and literature represent something that otherwise eludes representation and how psychoanalysis and the aesthetic share the task of making a representation of the unrepresentable *Reflections on the Aesthetic* is not an exercise in applied psychoanalysis psychoanalysis and art are considered by the author in their own terms allowing a new understanding of the aesthetic to emerge Kohon's book makes compelling reading for psychoanalysts psychotherapists art therapists literary and art critics academics students and all those interested in the matter of the aesthetic

What Is Contemporary Art? Terry Smith, 2012-08-10 Who gets to say what counts as contemporary art Artists critics curators gallerists auctioneers collectors or the public Revealing how all of these groups have shaped today's multifaceted definition Terry Smith brilliantly shows that an historical approach offers the best answer to the question What is Contemporary Art Smith argues that the most recognizable kind is characterized by a return to mainstream modernism in the work of such artists as Richard Serra and Gerhard Richter as well as the retro sensationalism of figures like Damien Hirst and Takashi Murakami At the same time Smith reveals postcolonial artists are engaged in a different kind of practice one that builds on local concerns and tackles questions of identity history and globalization A younger generation embodies yet a third approach to contemporaneity by investigating time place mediation and ethics through small scale closely connective art making Inviting readers into these diverse yet overlapping art worlds Smith offers a behind the scenes introduction to the institutions the personalities the biennials and of course the works that together are defining the contemporary The resulting map of where art is now illuminates not only where it has been but also where it is going

Abstraction and the Holocaust Mark Godfrey, 2007-01-01 Mark Godfrey looks closely at a series of American art and architectural projects that respond to the memory of the Holocaust He investigates how abstract artists and architects have negotiated Holocaust memory without representing the Holocaust figuratively or symbolically

Dwell, 2005-10 At *Dwell* we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

Metal Sculptures

Everett Sinclair, 2025-03-21 What transforms raw unyielding metal into breathtaking works of art that capture our imaginations and define public spaces Metal Sculptures delves deep into the diverse and fascinating world of metal as a medium for artistic expression exploring its historical evolution technical applications and aesthetic possibilities This book examines how sculptors throughout history and in contemporary practice have harnessed the unique properties of various metals to create objects ranging from delicate filigree jewelry to monumental outdoor installations This comprehensive study is significant because it bridges the gap between artistic vision and material reality offering insights into the creative processes and technical skills required to manipulate metals into compelling sculptural forms Understanding the specific characteristics of different metals their strength malleability resistance to corrosion and aesthetic qualities is crucial for both artists and appreciators of art We will explore how these properties dictate the scale form and longevity of metal sculptures ultimately shaping their impact on viewers and their environments The historical context will be considered tracing the use of metals in sculpture from ancient civilizations to the modern era This historical overview will provide a foundation for understanding the technological advancements and artistic movements that have influenced metal sculpture A basic understanding of art history and materials science would enhance the reader's experience although the book will also include introductions to relevant concepts within these fields The central argument of Metal Sculptures is that the choice of metal is not merely a practical consideration but a fundamental aspect of the artistic statement Each metal carries its own symbolic weight and inherent aesthetic influencing the meaning and impact of the final sculpture This argument is essential for

appreciating the intentionality behind the artist's choices and for understanding how metal contributes to the overall narrative and emotional resonance of the artwork. The book's structure begins with an introduction to the fundamental properties of various metals commonly used in sculpture including bronze, steel, aluminum, copper, and precious metals like gold and silver. Following this, it will explore various metalworking techniques such as casting, welding, forging, and fabrication, highlighting their historical development and contemporary applications. Specific chapters will focus on case studies of significant metal sculptures and the artists who created them, analyzing their methods, materials, and artistic intentions. The book culminates in a discussion of the role of metal sculpture in public art, architecture, and design, examining its impact on urban landscapes and cultural identity. The analysis is supported by historical records, technical manuals, artist interviews, and photographic documentation of sculptures from around the world. The book will also include visual examples from art history, contemporary sculpture, and technical diagrams to illustrate processes. *Metal Sculptures* connects to several disciplines including materials science, engineering, architecture, and cultural studies. The exploration of material properties connects to material science; the use of metals in large structures relates to engineering and architecture; and the cultural significance of metalwork relates to cultural studies. These interdisciplinary connections deepen the understanding of metal sculpture as a complex and multifaceted art form. This book distinguishes itself by its comprehensive approach, integrating technical information with art historical analysis and contemporary artistic practices. It offers a user-friendly exploration of the interplay between material properties, technical processes, and artistic expression. The writing style will be informative and accessible, avoiding overly technical jargon while maintaining scholarly rigor. The book will rely on clear explanations supported by visual aids. The target audience includes art students, sculptors, architects, designers, art collectors, and anyone interested in the intersection of art, design, and technology. It would be valuable to those seeking a deeper understanding of the materials and processes behind metal sculpture. As a work of non-fiction in the genres of Design, Art, and Design General, it will adhere to the conventions of presenting factual information, providing evidence-based arguments, and offering a balanced perspective on the subject matter. The scope of *Metal Sculptures* is intentionally broad, encompassing a wide range of metals, techniques, and artistic styles. However, it will focus primarily on sculpture and will not delve deeply into other forms of metalwork such as functional objects or industrial design. The information presented in *Metal Sculptures* can be applied practically by artists seeking to expand their knowledge of metalworking techniques, designers looking to incorporate metal sculpture into architectural projects, and art enthusiasts hoping to deepen their appreciation of this versatile medium. The book will touch upon ongoing debates regarding the environmental impact of metal production and the ethics of using certain materials in sculpture, providing a balanced discussion of these important issues.
