Coleridge's poetry following Coleridge's *Ancient Mariner* Palgrave 2016 and Coleridge's *Experimental Poetics* Palgrave 2013

*Dejection: An Ode* stands alone in Coleridge's oeuvre written at a time of personal crisis it reaches far back and deeply into his thinking in an attempt to find a poetic solution to ideas and problems he had mulled over for a long time Mays reveals how the poem also marks the opening of the second half of Coleridge's career as both poet and thinker In three central chapters Mays examines the new style that evolved in the process of writing the Ode the technical means of metrics rhyme and grammar language and allusion and symbol and structure He recounts the complex sometimes controversial critical history of the Ode and suggests an editorial solution to the problem created by the Letter to Sara Hutchinson re-evaluates the position of Wordsworth in the poem apropos the political statement it makes clarifies the distinction between the views on Imagination expressed and those contained in *Biographia Literaria* and traces the links of the concept dejection as it underpins Coleridge's late poems

*A Counter-History of Composition* Byron Hawk, 2007-11-25 *A Counter History of Composition* contests the foundational disciplinary assumption that vitalism and contemporary rhetoric represent opposing disconnected poles in the writing tradition Vitalism has been historically linked to expressivism and concurrently dismissed as innate intuitive and unteachable whereas rhetoric is seen as a rational teachable method for producing argumentative texts Counter to this Byron Hawk identifies vitalism as the ground for producing rhetorical texts the product of complex material relations rather than the product of chance Through insightful historical analysis ranging from classical Greek rhetoric to contemporary complexity theory Hawk defines three forms of vitalism oppositional investigative and complex and argues for their application in the environments where students write and think today Hawk proposes that complex vitalism will prove a useful tool in formulating post dialectical pedagogies most notably in the context of emerging digital media He relates two specific examples of applying complex vitalism in the classroom and calls for the reexamination and reinvention of current self-limiting pedagogies to incorporate vitalism and complexity theory

Kaufer, Suguru Ishizaki, Brian S. Butler, Jeff Collins, 2004-02-04 In 1888 Mark Twain reflected on the writer's special feel for words to his correspondent George Bainton noting that the difference between the almost right word and the right word is really a large matter We recognize differences between a politician who is willful and one who is willing even though the difference does not cross word stems or parts of speech We recognize that being held up evokes different experiences depending upon whether its direct object is a meeting a bank or an example Although we can notice hundreds of examples in the language where small differences in wording produce large reader effects the authors of *The Power of Words* argue that these examples are random glimpses of a hidden systematic knowledge that governs how we as writers or speakers learn to shape experience for other human beings Over the past several years David Kaufer and his colleagues have developed a software program for analyzing writing called DocuScope This book illustrates the concepts and rhetorical theory behind the software analysis examining patterns in writing and showing writers how their writing works in different categories to accomplish varying objectives Reflecting the range and variety of audience experience that contiguous words of surface English can prime the authors present a theory of language as an instrument of rhetorically priming

audiences and a catalog of English strings to implement the theory The project creates a comprehensive map of the speaker and writer s implicit knowledge about predisposing audience experience at the point of utterance The book begins with an explanation of why studying language from the standpoint of priming not just meaning is vital to non question begging theories of close reading and to language education in general The remaining chapters in Part I detail the steps taken to prepare a catalog study of English strings for their properties as priming instruments Part II describes in detail the catalog of priming categories including enough examples to help readers see how individual words and strings of English fit into the catalog The final part describes how the authors have applied the catalog of English strings as priming tools to conduct textual research
