The Riddle of the Compass Amir D. Aczel, 2001 A narrative chronicle of the invention of the compass that discusses its development in both China and Europe

*The Riddle of the Compass* Amir D. Aczel, 2001 A bestselling science writer uncovers the fascinating story of the invention of the compass and its impact on the world Illustrations throughout

*Caviar* Inga Saffron, 2002-10-08 In the tradition of *Cod* and *Olives* a fascinating journey into the hidden history culture and commerce of caviar Once merely a substitute for meat during religious fasts today caviar is an icon of luxury and wealth In *Caviar* Inga Saffron tells for the first time the story of how the virgin eggs of the prehistoric looking bottom feeding sturgeon were transformed from a humble peasant food into a czar's delicacy and ultimately a coveted status symbol for a rising middle class She explores how the glistening black eggs became the epitome of culinary extravagance while taking us on a revealing excursion into the murky world of caviar on the banks of the Volga River and Caspian Sea in Russia the Elbe in Europe and the Hudson and Delaware Rivers in the United States At the same time Saffron describes the complex industry caviar has spawned illustrating the unfortunate consequences of mass marketing such a rare commodity The story of caviar has long been one of conflict crisis extravagant claims and colorful characters such as the Greek sea captain who first discovered the secret method of transporting the perishable delicacy to Europe the canny German businessmen who encountered a wealth of untapped sturgeon in American waters the Russian Communists who created a sophisticated cartel to market caviar to an affluent Western clientele the dirt poor poachers who eked out a living from sturgeon in the aftermath of the Soviet collapse and the caviar Mafia that has risen in their wake and the committed scientists who sacrificed their careers to keep caviar on our tables Filled with lore and intrigue *Caviar* is a captivating work of culinary natural and cultural history

*Sea Fortune* Burkhardt Wolf, 2020-10-12 *Sea fortune* has always been an issue of good faith and good navigation While in antiquity *fortuna gubernatrix* was praised for shielding the seaborne trade in the Renaissance *fortuna* symbolized the conquest of chance and danger Under such auspices while relying on risk technologies modern seafaring has never lost its adventurous dimension Understanding their origin remains a challenge for the history of science and the history of literature

Electricity and Magnetism, 2nd Edition Peter Fairley, 2013-01-01 Since prehistoric times people have been fascinated by electricity and magnetism Ancient people marveled at the auroras streaks of colored light that appear in the night sky near the poles They wondered about the ability of materials such as amber and magnetite rock to attract or repel other objects Many people believed magic was behind these phenomena Then in the 1600s scientists began to lift the fog of superstition Electricity and magnetism are behind some of life's greatest mysteries the auroras the beating of the human heart and even the twisting of time and space known as relativity This book tells the story of scientists and their discoveries to explain how the theory of electromagnetism came to be

on hold for a thousand years while forgetting most of what the pagans had achieved and discovered from an empirical anatomy physiology and brain science to an experimental physics of water gravity and air Thoroughly referenced and painstakingly researched this volume is a must for anyone who wants to learn how far we once got and why we took so long to get to where we are today      **Descartes's Secret Notebook** Amir D. Aczel, 2006-10-10 Ren Descartes 1596 1650 is one of the towering and central figures in Western philosophy and mathematics His apothegm Cogito ergo sum marked the birth of the mind body problem while his creation of so called Cartesian coordinates have made our physical and intellectual conquest of physical space possible But Descartes had a mysterious and mystical side as well Almost certainly a member of the occult brotherhood of the Rosicrucians he kept a secret notebook now lost most of which was written in code After Descartes's death Gottfried Leibniz inventor of calculus and one of the greatest mathematicians in history moved to Paris in search of this notebook and eventually found it in the possession of Claude Clerselier a friend of Descartes Leibniz called on Clerselier and was allowed to copy only a couple of pages which though written in code he amazingly deciphered there on the spot Leibniz's hastily scribbled notes are all we have today of Descartes's notebook which has disappeared Why did Descartes keep a secret notebook and what were its contents The answers to these questions lead Amir Aczel and the reader on an exciting swashbuckling journey and offer a fascinating look at one of the great figures of Western culture      [Ancient Transportation Technology](#) Mary B. Woods, Michael Woods, 2011-01-01 Did you know People first used skis more than 8 000 years ago The first wheels were used in pottery not for transportation Traffic jams often clogged the streets of ancient Rome Transportation technology is as old as human society itself The first humans on Earth used simple transportation tools They bundled logs together to make rafts They used long poles and flat boards to carry heavy loads Over the centuries ancient peoples learned more about transportation The ancient Indians trained elephants and horses for travel The ancient Chinese developed the first compasses The ancient Greeks built massive battleships So what kinds of tools and techniques did ancient people use How did maps of the world improve over time And how did ancient transportation set the stage for our own modern transportation technology Learn more in Ancient Transportation Technology      [Culture Making \(Volume 2 of 2\) \(EasyRead Super Large 24pt Edition\)](#) ,      *The Great Transformation of 2021* Norman Poiré, 2010-11-23 The decade of the 2020s promises to be as dynamic as any in recorded history Those ten years will be characterized by an unprecedented commingling of an extremely rare confluence of social cycles with the three ingredients of the looming Sustainability Crisis overpopulation peak oil and global climate change Out of the ashes will arise the Great Transformation of 2021 a cultural upheaval at least as significant as the Protestant Reformation of the sixteenth century It is unlikely that either capitalism or the nation state will survive it and quite likely that the United States will descend into permanent decline because of it The Great Transformation of 2021 will present mankind with challenges of historic proportions If global society makes the right choices the world could come out a better place on the other side If it chooses wrongly a nightmarish existence if not outright

human extinction will be the consequence      A World Perspective Through 21st Century Eyes R. K. Koslowsky, 2004 As a community of citizens in the twenty first century we are fortunate to have emerged from the biological evolution of the past million years and the cultural evolution of the past ten thousand years We have enjoyed an abundance of time and freedom to explore the why and how things work and continue to push the limits of the present technological evolution A World Perspective through 21st Century Eyes is not a history textbook or a science history book It is not a treatise on philosophy or theology Rather it is a book on the major themes in the evolution of man and the impact of science thereto It is a book with the major theme addressing the impact of science on society one in which the technical community has not had time to digest and reflect upon during the past fifty years With the time pressures of the day and in the specializations in which we operate there is precious little surplus energy available to us for leisure activity of our choosing I trust that this treatment will sketch a broad outline that the scientific and technological community has had on society over the past five thousand years and potential areas where further impacts will be made in the next one hundred years To this effort I believe the reader will find his or her surplus energy well spent An engineer to which my life s training was aimed is expected to have a complete and thorough knowledge of some subjects This is true for most of us in the technical community therefore it is also true that most of us choose not to write about many topics of which we are not master I feel this separation of subjects and isolation of scientists and technologists does a disservice to others in other disciplines who look for different views in order to maintain a balanced perspective on the myriad of issues confronting them each day Those of us who have grown up in the Western Culture without a technical education may find this discussion exciting in the different way it is broached Just as an engineer appreciates the beauty of the Golden Gate Bridge and the precision of the clock the inspiration from watching the setting sun reading a biblical passage or viewing a Bouguereau painting can motivate and enlighten that same engineer In this way I aim to provide the reader either technical or non technical with an appreciation of the evolving world from the viewpoint of one who has been technically trained I cannot reproduce the sunset paint or sing to inspire but I hope these insights motivate you to pause and consider your area of expertise with the aim for you to contribute that which has inspired and motivated you
