Rodolfo Machado and Jorge Silvetti Rowe, 1989 *Unprecedented Realism* K. Michael Hays, Rodolfo Machado, Jorge Silvetti, 1995 For almost two decades the work of Rodolfo Machado and Jorge Silvetti has remained at the forefront of theoretical production Their rigorously detailed and exquisitely drawn projects characterize an attitude of aesthetic realism towards materials construction function and the cultural role of architecture Yet the conditions they address and the effects they produce are unprecedented Their projects synthesize seemingly incompatible images uses and typologies *Unprecedented Realism* is not an illustration of theory Rather what emerges is a constructive theory of architecture that understands the process of design itself as a distinct mode of knowledge as theoretical research that is still irreducibly architectural *Unprecedented Realism* presents both buildings and urban infrastructures Steps of Providence RI Entrance for Cranbrook Bloomfield Hills Mich Carnegie Mellon University Center Pittsburgh Pershing Square Los Angeles and Times Square New York City Along with the analytic text of K Michael Hays the volume includes critical essays by Alan Colquhoun George Baird Fars el Dahdah and Rodolphe el Khoury please see the Table of Contents **Making the Metropolitan Landscape** Jacqueline Tatom, Jennifer Stauber, 2009-05-07 The American landscape is an extremely complex terrain born from a history of collective and individual experiences These created environments which all may be called metropolitan landscapes constantly challenge students and professionals in the fields of architecture design and planning to consider new ways of making lively public places This book brings together varied voices in urban design theory and practice to explore new ways of understanding place and our position in it **Civic Realism** Peter G. Rowe, 1999 Topics covered in the book include the role of the state and civil society in the construction of civic spaces aesthetic and architectural dimensions of realism individual and collective uses of urban space and how civic places constitute as well as represent the civic aspects of our lives The examples mostly from the modern period include recent public spaces in Barcelona several of the Grand Projects in Paris neorealist projects in postwar Rome contemporary transformations of the Manhattan grid and Plecnik's water axis in prewar Ljubljana **Campbell Hall**, 2000 Carlos Jimenez: Buildings Carlos Jimenez, 1996-11 This is the first monograph published in the United States on Carlos Jimenez whose work has been linked to the new wave of Spanish architects as well as to Latin American architects such as Luis Barragan Jimenez's buildings are known for their purity of form use of bold color and sophisticated ordering of spaces His simple geometries allow light to define and animate his otherwise tranquil interiors This monograph presents eight of the architect's most stunning projects including the headquarters for the Houston Fine Arts Press the new Spencer Studio Art Building at Williams College in Massachusetts the Central Administration Building of the Museum of Fine Arts Houston and Jimenez's own house and studio complex Richly

illustrated throughout with photographs plans and drawings the book includes an introduction by Rafael Moneo an essay by historian Stephen Fox and a postscript by Lars Lerup as well as complete project documentation **Addition and Renovations to Campbell Hall, University of Virginia** Machado and Silvetti Associates, Inc,1995
