Roebling's Delaware & Hudson Canal Aqueducts Robert M. Vogel, 1971 Historic Structure Report, Historical Data Section Harlan D. Unrau, 1983 **Historic American Buildings Survey/Historic American Engineering Record**, 1988

Canals Robert J. Kapsch, Robert James Kapsch, 2004 Accompanying CD ROM has images from the book in TIFF format which can be viewed with the Extensis Portfolio browser included on the disc or with a graphics program such as Adobe Photoshop as well as links to four Library of Congress websites *Engineering America* Richard Haw, 2020-02-12 Engineering America narrates how Johann August Roebling the third child of a provincial German tobaccoist became John A. Roebling world renowned American engineer wealthy manufacturer and designer of the Brooklyn Bridge and other great engineering feats of nineteenth century America *The Texture of Industry* Robert B. Gordon, Patrick M. Malone, 1997-02-06 While historians have given ample attention to stories of entrepreneurship invention and labor conflict they have told us little about actual work places and how people worked Workers seldom wrote about their daily employment However they did leave behind their tools products shops and factories as well as the surrounding industrial landscapes and communities In this book Gordon and Malone look at the industrialization of North America from the perspective of the industrial archaeologist Using material evidence from such varied sites as Indian steatite quarries automobile plants and coal mines they examine manufacturing technology transportation systems and the effects of industrialization on the land Their research greatly expands our understanding of industry and focuses attention on the contributions of anonymous artisans whose skills shaped our industrial heritage *Structural Iron 1750-1850* R.J.M. Sutherland, 2016-12-05 This book deals with the period when iron became the dominant high technology material increasingly taking over from timber and masonry It was necessary for the engines and machines of the new industries but equally vital for the vast civil engineering works which supported this industrialisation It was these works mills warehouses dockyards and above all bridges which so impressed the public in the early 19th century The papers selected here trace the evolving structural uses of cast and wrought iron in frames and roofs for buildings and look in particular at the development of bridge design and construction in America France and Russia as well as in Britain They cover the processes of design and testing and at the same time throw much light on the attitudes and careers of the engineers themselves **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Shu Cheng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of The Oxford Dictionary of Architecture has been extensively revised and expanded

with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader
