R. Stephen Sennott

Rogelio Salmona:

Feature: Rogelio Salmona Rogelio Salmona, Nobuyuki Yoshida, 2008 **Rogelio Salmona** Ricardo L. Castro, 2010-08
Complementing and advancing Ricardo L. Castro's first study of the famous Colombian architect Rogelio Salmona, this in-depth reference presents a dozen of the most significant pieces from the last decade. Capturing his characteristic use of red brick and the employment of natural shapes in his designs, this stunning tribute to an extraordinary man and architectural legacy includes information and analysis of each work as well as pictures, sketches, and layout plans. Such famed works as the Human Sciences Postgraduate Studies Building at the National University of Bogotá, the Virgilio Barco Library in Bogotá, the Gabriel García Márquez Cultural Center, and his vacation home in Riofrío are all highlighted. **Rogelio Salmona** Rogelio Salmona, Sociedad Colombiana de Arquitectos, 2006 **Bio-Architecture** Javier Senosiain, 2013-05-13
Bio Architecture studies the natural principles of animal and human constructions from several different perspectives and presents a great part of the knowledge that gives origin and shape to built form. Organic architecture offers a design approach arising from natural principles, bringing us back to local history, tradition, and cultural roots to give us built forms which are in harmony with nature. It also shows how architects can take advantage of the resources that contemporary technology has placed within our grasp. Bio Architecture is a unique book that studies the natural principles of animal and human constructions from several different perspectives and looks at what gives origin and shape to built form. The text gives an informative, inspiring overview of the drive toward organically informed design, both intrinsically and aesthetically, using a wide variety of international examples. Javier Senosiain is an architect and an historian. He has pursued his interest in Organic Architecture across the globe, drawing parallels between Buckminster Fuller's Geodesic dome and the spider's web, between Santiago Calatrava's Cathedral of St. John in NY and the roots of a tree. Where nature has inspired form, Senosiain has made a career of analyzing and applying the principles he sees in some very creative writing and architecture. **Colombia** Alexandra Rosen, 2012-12-19
The country of Colombia, emerging from the fog of its violent past, has been shedding its reputation as a dangerous place. For travel, it is still a little on the edge, with many of the country's sites as yet undiscovered by tourists. In this travelogue, author Alexandra Rosen shares her experiences journeying to Colombia, a place filled with superlatives and unquestionable charm. With her longtime travel partner Donald Cooney, Rosen provides a lively account of their adventures exploring Bogotá, the Coffee Zone, Cartagena, and Tayrona National Park. Colombia blends factual information and historical background with engaging anecdotes and descriptions of the country's people, cuisine, art, music, and natural and manmade surroundings. Including general tips culled from travel to eighty-nine countries, Rosen describes Colombia as a superb destination as well as a great place for a journey. This guide shares Rosen's and Cooney's excursion through Colombia's history and time, witnessing its past while experiencing its present. They arrived with a collection of facts and data and left with an appreciation of Colombia's diverse culture and a positive belief in its future. **A Gringa in Bogotá** June Carolyn

Erlick,2010-03-01 To many foreigners Colombia is a nightmare of drugs and violence Yet normal life goes on there and in Bogot it s even possible to forget that war still ravages the countryside This paradox of perceptions outsiders fears versus insiders realities drew June Carolyn Erlick back to Bogot for a year s stay in 2005 She wanted to understand how the city she first came to love in 1975 has made such strides toward building a peaceful civil society in the midst of ongoing violence The complex reality she found comes to life in this compelling memoir Erlick creates her portrait of Bogot through a series of vivid vignettes that cover many aspects of city life As an experienced journalist she lets the things she observes lead her to larger conclusions The courtesy of people on buses the absence of packs of stray dogs and street trash and the willingness of strangers to help her cross an overpass when vertigo overwhelms her all become signs of convivencia the desire of Bogotanos to live together in harmony despite decades of war But as Erlick settles further into city life she finds that war in the city is invisible but constantly present in subtle ways almost like the constant mist that used to drip down from the Bogot skies so many years ago Shattering stereotypes with its lively reporting *A Gringa in Bogot* is must reading for going beyond the headlines about the drug war and bloody conflict

Transculturation ,2016-08-01 *Transculturation Cities Spaces and Architectures in Latin America* explores the critical potential inherent in the notion of transculturation in order to understand contemporary architectural practices and their cultural realities in Latin America Despite its enormous theoretical potential and its importance within Latin American cultural theory the term transculturation had never permeated into architectural debates In fact none of the main architectural theories produced in and about Latin America during the second half of the twentieth century engaged seriously with this notion as a way to analyze the complex social cultural and political circumstances that affect the development of the continent s cities its urban spaces and its architectures Therefore this book demonstrates for the first time that the term transculturation is an invaluable tool in dismantling the essentialist genealogical and hierarchical perspectives from which Latin American architectural practices have been viewed *Transculturation Cities Spaces and Architectures in Latin America* introduces new readings and interpretations of the work of well known architects new analyses regarding the use of architectural materials and languages new questions to do with minority architectures gender and travel and from beginning to end it engages with important political and theoretical debates that have rarely been broached within Latin American architectural circles
