Role Of The Academic Reference Librarian:

The Role of the Academic Reference Librarian Jo Bell Whitlatch, 1990-04-09 This volume examining key factors related to successful reference service practices provides librarians with an important and significantly different perspective on the reference process Author Jo Bell Whitlatch describes the major factors that need to be considered to obtain a comprehensive view of the reference process in academic libraries arguing that the understanding of the reference process can be enhanced by borrowing from current research in other disciplines that place an increasing emphasis on service organizations rather than on manufacturing organizations The book identifies major studies and theories related to how people who are served participate in organizations Further Whitlatch discusses how such studies can contribute to an understanding of the academic reference librarian's role In addition the study that constitutes a central part of *The Role of the Academic Reference Librarian* reports on the results of testing parts of a model of the reference process The material presented here is drawn from four principal sources the literature on reference service broader literature on service organizations from the disciplines of business psychology and sociology the author's professional experience and a detailed study of reference encounters in five academic libraries that assesses reference service effectiveness by focusing on the librarian's perception of the quality of service the library users perception of the quality of service and whether or not the information sought was located Included are tables and figures that graphically enhance the text For academic librarians and library researchers the volume will serve as a guide to designing studies of reference services that will add to the present understanding of the subject Graduate students in library and information science will find this handbook indispensable for the successful practice of reference services

Reading and the Reference Librarian Juris Dilevko, Lisa Gottlieb, 2003-11-26 Reference librarians are no longer expected to know much about the information they find they are merely expected to find it Technological competency rather than knowledge has become the order of the day In many respects reference service has become a matter of typing search terms into a library's online catalog or a web search engine and providing the patron with the results of the search Calling for a re intellectualization of reference librarianship this book suggests another approach to providing quality reference service reading The authors surveyed both academic reference librarians and public library reference personnel in the United States and Canada about their reading habits From the 950 responses the authors present findings about the extent to which librarians read newspapers periodicals fiction and nonfiction and recount and analyze stories about how reading has made them better librarians The authors also report that North American professors in the humanities and social sciences believe that the best reference librarians are those who have wide ranging subject based knowledge as opposed to the type of process based functional knowledge that is increasingly dominating the curricula of many Library and Information Science programs

The Reference Librarian and Implications of Mediation M. Keith Ewing, Robert Hauptman, 2019-12-05 This book first published in 1992 examines the reference librarian's role as a connecting

link between information seekers and the resources they need. It provides the best approaches to providing resolutions or guidance to the appropriate resources. It analyses librarians' reference skills, communication abilities, accuracy in responding to specific inquiries, and sensitivity to various groups such as paraprofessionals and non-traditional patrons. This provocative book encourages librarians to go beyond merely providing an answer or resource to helping clients better understand the physical surroundings, the social or educational context, and the ethical, political, and economic climate in which the process takes place.

The Image and Role of the Librarian Linda S Katz, 2003-06-27. Get a unique insight into the image problems librarians face. The Image and Role of the Librarian addresses all aspects of professional identity for librarians, including professional roles, cultural images, popular perceptions, and future trends. The book examines historical representations, stereotypes, and popular culture icons, and the r

Reading and the Reference Librarian Juris Dilevko, Lisa Gottlieb, 2014-10-16. Reference librarians are no longer expected to know much about the information they find; they are merely expected to find it. Technological competency rather than knowledge has become the order of the day. In many respects, reference service has become a matter of typing search terms into a library's online catalog or a web search engine and providing the patron with the results of the search. Calling for a re-intellectualization of reference librarianship, this book suggests another approach to providing quality reference service: reading. The authors surveyed both academic reference librarians and public library reference personnel in the United States and Canada about their reading habits. From the 950 responses, the authors present findings about the extent to which librarians read newspapers, periodicals, fiction, and nonfiction, and recount and analyze stories about how reading has made them better librarians. The authors also report that North American professors in the humanities and social sciences believe that the best reference librarians are those who have wide-ranging subject-based knowledge, as opposed to the type of process-based functional knowledge that is increasingly dominating the curricula of many Library and Information Science programs.

The Role of the Academic Librarian Anne Langley, Edward Gray, K T L Vaughan, 2003-10-31. This book covers the practical side of being an academic librarian, a role that has undergone a large degree of change in recent years. It outlines and describes the skills necessary to succeed in these large and often complex organisations. The book includes tools and techniques for an academic librarian for managing time, meetings, projects, publishing, and research communications, paper and electronic, the basics of supervision, and how to work in a large organisation. The impact of the growth of electronic formats on the role of the academic librarian is discussed in detail. Explains how, in practical terms, to stay organised, communicate successfully, network, and navigate through an often politicised environment. Applies business practices to the field of librarianship. Shows how to use organisational behaviour techniques to manage yourself and your work.
