The Lutheran Cyclopedia (Classic Reprint) Henry Eyster Jacobs, 2016-06-22

Excerpt from The Lutheran Cyclopedia: The aim of this volume is to present a summary of the chief topics comprised in the doctrine, the life, the customs, the history, and the statistics of the Luth Church. It has been prepared almost entirely in America from the standpoint of Lutherans who either by nativity or adoption are Americans and who are interested in the growth of their church and the maintenance of its influence in this its new home. The most notable fact in the progress of our Church in this land has been not so much its rapid increase as the union within it of representatives of the hitherto separated Luth churches of Europe. At the Reformation, Germany, the birthplace and centre of Lutheranism, was not a compact government but a loose organization of numerous and chiefly small principalities and cities, in each of which the great religious movement of the time had its peculiar history. Upon the basis of a common confession of faith, the doctrinal, educational, liturgical, and governmental elements assumed in each province or territory a peculiar form, as each ruler selected his own theologians and jurists to aid in the reform, and by their co-operation published his own Church Order. In constitutions, liturgies, catechisms, hymn books, instructions to pastors, and customs, there was the greatest diversity. There was fixity of type with many varieties. To a still greater degree the same principle was exhibited as the Luth faith penetrated other lands. The results of the German Reformation were adapted to the circumstances, characteristics, and precedents of the national life. In this country, these various streams, after having followed almost entirely separate courses since the Reformation, have at last met. Here are brought together in the same synods Lutherans from diverse parts of Germany with a common faith but accustomed to different modes of administering that faith. Here too they meet with those having an equal claim to the same name from Norway and Sweden, Denmark and Iceland, Holland and Finland. These elements, however separated for one or more generations by national lines, must inevitably coalesce. If the Luth Church, like a number of denominations, were based upon a peculiar polity or form of worship or mode of administering a sacrament, its people would soon be absorbed by churches of English origin. Mere reverence for ancestors is too weak a foundation for any permanence. When a few generations at most separate men from the land of their fathers, the attractions of their immediate surroundings overcome the resistance of such remote ties. But standing for a positive, clearly defined type of doctrine, which has been enriched by the labors of the profoundest theologians from whose treasures all scholars of other Protestant communions

have freely drawn possessing riches of devotional literature in song and prayer that have moulded the hymnody and liturgies of those around them the heirs of a long line of noble witnesses with voice and pen often amidst the fires of persecution having the nearest access to various forms of practical activity introduced by their fathers and brethren in the faith and now widely appropriated in almost all parts of the Protestant denominations above all as the representatives of the weak and yet strong man selected by God to lay the foundations of modern Christianity and whose words are recalled and still arouse to life and action wherever the history of the Church is earnestly read and the Bible studied it is impossible for Lutherans to continue for centuries or even decades to continue to surrender their heritage with their native lands and languages They are called upon to defend and maintain the same faith in the same languages to the same people and under the same circumstances and in so doing will soon share in each others efforts Nor can they isolate themselves from their historical antecedents or the cotemporaneous

Lutheran churches in the United States have included multiple ethnic cultures since the colonial era and continue to wrestle with increasing internal variety as one component of their identity By combining the concerns of social history with an awareness for theological themes this volume explores the history of this family of Lutheran churches and traces the development from the colonial era through the formation of the Evangelical Lutheran Church in America in 1988 An introduction details the origins of Lutheranism in the European Reformation and the practices significant to the group s life in the United States Organized chronologically subsequent chapters follow the churches maturation as they form institutions provide themselves with leaders and expand their membership and geographic range Attention is given throughout to the contributions of the laity and women within the context of the Lutherans continued individual and corporate effort to be both authentically Lutheran and genuinely American Offering a rich portrayal of the Lutherans lives and their churches the social historical approach of this study brings the Lutheran people to the foreground The dynamic relationship between pietist orthodox and critical expressions of the tradition has remained among Lutherans even though they have divided themselves by several factors including ethnicity and confessional stance Of interest to scholars and researchers of Lutheran history and religion in America this engaging multifaceted work balances narrative history with brief biographical essays A chronological listing of important dates in the development of the Lutheran church is especially helpful *A History of the Lutheran Church in Pennsylvania, 1638-1820* Theodore Emanuel Schmauk,1903 *Learning to Pray in the Lutheran Sunday School 1942-1952* , **The United States Catalog** ,1900
