Intellectual Property Management Klaus Jennewein, 2006-03-30 Innovation is a source of competitive advantage In other words firms may leverage innovation to generate rents at least temporarily And this is intended to be a self sustained business model part of the rent extracted from the market may be re invested into new technological developments which in turn permit additional innovations thus regenerating the sources of rents This is the positive loop of innovation In this sense business would be a permanent hunt for innovations in search of rents Yet innovations need to be protected if firms want to benefit from rents over long periods of time However the strategic management literature tends to suggests that patents are a weak protection against aggressive imitators Secrecy may help but we also know that technology ends up leaking in most cases Speed in new developments to cut time to market may be another way of protecting the technological advance of the firm But again this may not be enough as start ups may out compete the established firm in the race for innovation This is where Dr Klaus Jennewein s key idea comes into the picture The core of his thesis is that brand equity may be combined to technological protections such as patents to build a multi layer complex intricate shield to protect the sources of rents against competitors and imitators

contradictions que renferme ce nouvel ordre mondial. Parmi les conséquences les plus drastiques on s'attachera à montrer qu'à travers l'encartement de nos pratiques quotidiennes s'opère un lent délitement de la réciprocité de l'échange. Le paiement se faisant de manière difficile et comme indolore, l'ancien schéma constitutif de nos pratiques sociales est sur le point d'être remplacé par d'étranges procédures caractéristiques d'une technique n'engageant plus notre réflexivité mais une simple posture réactive. Ainsi se profile une nouvelle synthèse sociale dont l'argent invisible serait l'instrument privilégié. Responsabilité civile du fait des bases de données Etienne Montero, 1998 L'essor des bases de données automatisées imprime l'activité d'information une logique nouvelle de production de masse et de diffusion grande échelle. Les solutions élaborées par la jurisprudence relative à la transmission de renseignements inexacts sont elles-mêmes mentalement transposables au domaine des bases de données. Dans quelle mesure les principes de la responsabilité civile s'appliquent-ils à la fourniture d'une information dont les conditions de collecte, de traitement et de diffusion sont transformées ? *Réussir l'entrepreneuriat culturel* Henri Tedongmo Teko, 2016-12-02 Ce livre est une contribution sociologique à l'analyse du phénomène entrepreneurial dans le secteur culturel. Suivant une démarche scientifique rigoureuse, l'auteur analyse en profondeur la notion d'entrepreneuriat culturel et met au jour les modalités d'émergence du secteur culturel dans une perspective entrepreneuriale. Les expériences camerounaises présentées et analysées dans ce livre rendent compte des logiques d'action qui sont à l'œuvre dans la construction sociale de l'entrepreneuriat culturel dans ce pays aux normes potentiels culturels inexploités. Sans des infrastructures adéquates, sans une politique culturelle pensée et efficace, le secteur culturel au Cameroun demeure dans une dynamique archaïque peu propice à la croissance de l'entrepreneuriat culturel. Or, la maîtrise du présent et de l'avenir de ce pays passe sans doute par la prise en compte du capital culturel en tant que source d'exploration du passé, d'immortalisation du présent et de projection vers l'avenir. Les cas de réussite présentés dans ce livre sont des success stories qui devraient inspirer tous ceux qui s'investissent et investiront dans l'entrepreneuriat culturel.
