**The Lvov-Warsaw School and Contemporary Philosophy** K. Kijania-Placek, Jan Wolenski, 2012-12-06 This collection celebrates the centenary of the Lvov Warsaw school established by Kazimierz Twardowski in Lvov in 1895 This school belongs to analytic philosophy and successfully worked in all branches of philosophy The Warsaw school of logic became perhaps the most important part of Twardowski's heritage Lesniewski Łukasiewicz and Tarski leading Polish logicians achieved results which essentially influenced the development of contemporary logic A close connection of logic and philosophy was a typical feature of the Lvov Warsaw school The papers

included in the collection deal with all directions of research undertaken by Polish analytic philosophers. Special attention is paid to logic and comparisons with other philosophical movements, particularly with Brentanism, which was one of the sources of the Lvov-Warsaw school.

**The Lvov-Warsaw School - the New Generation** Jacek Juliusz Jadacki, Jacek Paśniczek, 2006. The influence of Kazimierz Twardowski on modern philosophy in Poland is all pervasive. Twardowski instilled in his students a passion for clarity and seriousness. He taught them to regard philosophy as a collaborative effort, a matter of disciplined discussion and argument, and he encouraged them to train themselves thoroughly in at least one extra philosophical discipline and to work together with scientists from other fields, both inside Poland and internationally. This led, above all, to collaborations with mathematicians, so that the Lvov school of philosophy would gradually evolve into the Warsaw school of logic. Twardowski taught his students too to respect and to pursue serious research in the history of philosophy, an aspect of the tradition of philosophy on Polish territory, which is illustrated in such disparate works as Jan Łukasiewicz's ground-breaking monograph on the law of non-contradiction in Aristotle and Władysław Tatarkiewicz's highly influential multi-volume histories of philosophy and aesthetics. The term Polish philosophy is a misnomer for Polish philosophy is philosophy per se; it is part and parcel of the mainstream of world philosophy simply because it meets international standards of training, rigour, professionalism, and specialization.

Barry Smith, *Why Polish Philosophy Does Not Exist*.

**The History and Philosophy of Polish Logic** K. Mulligan, K. Kijania-Placek, T. Placek, 2016-01-26. The book presents the state of the art of research into the legacy of interwar Polish analytic philosophy and exemplifies different approaches to the history of philosophy. It contains discussions and reconstructions of aspects of Polish philosophy and logic, as well as reactions to and developments of this tradition.

*The Heritage of Kazimierz Ajdukiewicz* Jan Woleński, Vito Sinisi, 2023-03-13. This book presents Kazimierz Ajdukiewicz's philosophy. Ajdukiewicz was one of the most distinguished and important philosophers of the contemporary Poland. He produced important ideas in logic, epistemology, philosophy of language, and ontology. He influenced Polish analytic philosophy very much. The collection gives a general account of Ajdukiewicz's philosophy, and it is the only full presentation of his ideas available in Western languages. The volume is of interest for everybody working in analytic philosophy.

**Development Of Mathematics Between The World Wars, The: Case Studies, Examples And Analyses** Martina Becvarova, 2021-05-14 The Development of Mathematics Between the World Wars traces the transformation of scientific life within mathematical communities during the interwar period in Central and Eastern Europe specifically in Germany Russia Poland Hungary and Czechoslovakia Throughout the book in depth mathematical analyses and examples are included for the benefit of the reader World War I heavily affected academic life In European countries many talented researchers and students were killed in action and scientific activities were halted to resume only in the postwar years However this inhibition turned out to be a catalyst for the birth of a new generation of mathematicians for the emergence of new ideas and theories and for the surprising creation of new and outstanding scientific schools The final four chapters are not restricted to Central and Eastern Europe and deal with the development of mathematics between World War I and World War II After describing the general state of mathematics at the end of the 19th century and the first third of the 20th century three case studies dealing with selected mathematical disciplines are presented set theory potential theory combinatorics in a way accessible to a broad audience of mathematicians as well as historians of mathematics *Universities in Imperial Austria 1848-1918* Jan Surman, 2018-12-15 Combining history of science and a history of universities with the new imperial history *Universities in Imperial Austria 1848-1918* A Social History of a Multilingual Space by Jan Surman analyzes the practice of scholarly migration and its lasting influence on the intellectual output in the Austrian part of the Habsburg Empire The Habsburg Empire and its successor states were home to developments that shaped Central Europe's scholarship well into the

twentieth century Universities became centers of both state and nation building as well as of confessional resistance placing scholars if not in conflict then certainly at odds with the neutral international orientation of academe By going beyond national narratives Surman reveals the Empire as a state with institutions divided by language but united by legislation practices and other influences Such an approach allows readers a better view to how scholars turned gradually away from state centric discourse to form distinct language communities after 1867 these influences affected scholarship and by examining the scholarly record Surman tracks the turn Drawing on archives in Austria the Czech Republic Poland and Ukraine Surman analyzes the careers of several thousand scholars from the faculties of philosophy and medicine of a number of Habsburg universities thus covering various moments in the history of the Empire for the widest view Universities in Imperial Austria 1848 1918 focuses on the tension between the political and linguistic spaces scholars occupied and shows that this tension did not lead to a gradual dissolution of the monarchy s academia but rather to an ongoing development of new strategies to cope with the cultural and linguistic multitude
