Phillips, 1991 Gerald M Phillips draws on his twenty five year five thousand client experience with the Pennsylvania State University Reticence Program to present a new theory of modification of inept communication behavior That experience has convinced Phillips that communication is arbitrary and rulebound rather than a process of inspiration He demonstrates that communication problems can be described as errors that can be detected and classified in order to fit a remediation pattern Regardless of the source of error the remedy is to train the individual to avoid or eliminate errors thus orderly procedure will result in competent performance Inept communicators must be made aware of the obligations and constraints imposed by deep structures that require us to achieve a degree of formal order in our language without which our discourse becomes incomprehensible *Helping People Help Themselves* David Ellerman, 2009-04-15 David Ellerman relates a deep theoretical groundwork for a philosophy of development while offering a descriptive practical suggestion of how goals of development can be better set and met Beginning with the assertion that development assistance agencies are inherently structured to provide help that is ultimately unhelpful by overriding or undercutting the capacity of people to help themselves David Ellerman argues that the best strategy for development is a drastic reduction in development assistance The locus of initiative can then shift from the would be helpers to the doers recipients of development Ellerman presents various methods for shifting initiative that are indirect enabling and autonomy respecting Eight representative figures in the fields of education community organization economic development psychotherapy and management theory including Albert Hirschman Paulo Freire John Dewey and S ren Kierkegaard demonstrate how the major themes of assisting autonomy among people are essentially the same David Ellerman is currently a Visiting Scholar in the Economics Department at the University of California at Riverside **Darwin's Worms** Adam Phillips, 2009-06-16 Adam Phillips has been called the psychotherapist of the floating world and the closest thing we have to a philosopher of happiness His style is epigrammatic his intelligence electric His new book Darwin s Worms uses the biographical details of Darwin s and Freud s lives to examine endings suffering mortality extinction and death Both Freud and Darwin were interested in how destruction conserves life They took their inspiration from fossils or from half remembered dreams Each told a story that has altered our perception of our lives For Darwin Phillips explains the story to tell was how species can drift towards extinction for Freud the story was how the individual tended to and tended towards his own death In each case it is a death story that uniquely illuminates the life story
