Review No. 26: American Fighting Vehicles: "" , M113: American Armoured Personnel Carrier Ben

Skipper,2021-03-23 The M113 has become as much a recognizable part of the US military machine at war as the Bell UH 1 Iroquois and M16 assault rifle Earning its stripes in the jungles and highlands of Vietnam it became the most widely armored vehicle of the campaign Such was its prowess that the Viet Cong gave it the nickname Green Dragon on account of its ability to go virtually anywhere Its groundbreaking aluminum hull gives the M113 a relatively low weight of 12ts this allows it to be easily transported by air and gives it an amphibious ability The design was also easy to modify and can carry a range of support and indirect fire weapons From mortars to ballistic missiles the M113 spawned a progeny of useful and innovative vehicles The base M113 is lightly armored and safe against only the lightest of small arms fire and shell splinter As a result a range of up armor packages have been used in the past from sandbags to complex applique armor 80 000 M113s of all types

have been produced and are in use with over 50 countries making it one of the most widely used armored fighting vehicles to be produced. Indeed, such was its popularity that the US bought their final M113s in as late as 2007. The M113 was designed and developed by the Food Machinery Corporation (FMC) to replace the heavier and less reliable steel-bodied M59 and M75 armored personnel carriers. It was specifically designed to be lighter, air portable, and have amphibious capability. Carrying a crew of two (driver and commander) who manned the M113's only weapon, a 50-cal machine gun, the M113 would transport 11 soldiers into combat before withdrawing to the rear. Powered initially by a V8 petrol engine, the M113 would be continuously up-engined throughout its frontline and subsequent rear support lifespan. Changes included improved suspension, smoke dischargers, and externally fitted fuel tanks. Other changes have included armored commander's turrets and slat armor. This LandCraft title looks at the M113's development where the FMC sought to utilize its chassis into as many roles as possible, from smoke generators to flamethrowers. The book also looks at how the M113 was adapted for use by numerous overseas customers and how these are upgraded to suit local conditions. Finally, the title looks at the M113's changing roles in the more sophisticated contemporary battlescape and how it's still providing service in theatres across the world in a variety of roles, both combat and support. For the modeler, there is nothing more important than the little things, and this image-rich section of LandCrafts' M113 title delivers the goods. Filled with crisp photos that show the M113's many details combined with helpful accompanying text, it forms an enviable visual guide for the enthusiast and modeler alike. **Military Review**

, 1972 Search and Destroy Keith W. Nolan, 2010-07-08 Using firsthand accounts from Vietnam soldiers, this book tells it like it is: war, and all. An honest account of a cavalry squadron's experience. **Military Review** The 1st Squadron, 1st Cavalry Regiment of the 1st Armored Division deployed to Vietnam from Fort Hood, Texas, in August 1967. Search and Destroy covers the 1st's harrowing first year and a half of combat in the war's toughest area of operations, I Corps. The book takes readers into the savage action at infamous places like Tam Ky, the Que Son Valley, the Pineapple Forest, Hill 34, and Cigar Island, chronicling General Westmoreland's search and destroy war of attrition against the Viet Cong and North Vietnamese Army. Exploring the gray areas of guerrilla war, military historian Keith Nolan details moments of great compassion toward the Vietnamese but also eruptions of My Lai-like violence, the grimmer aspects of the 1st's successes. Search and Destroy is a rare account of an exemplary fighting force in action, a dramatic close-up look at the Vietnam War. Nolan's research, his comprehension of the political as well as the military actions, his careful concern for those who were there, and most of all, his writing, are superb. Stephen Ambrose
