Sandra Meiri, Odeya Kohen-Raz, 2020-02-06 Traversing the Fantasy The Dialectic of Desire Fantasy proposes a new and comprehensive model of spectatorship at the heart of which it draws an analogy between the ethics of Lacanian psychoanalysis and the ethics of narrative film It demonstrates how spectators engage with narrative film undergoing unconscious processes that generate a shift in the adherence to fantasies that impede assuming responsibility for one's fate and well being The authors discuss the affinities that the ontology and aesthetics of narrative film share with subjective unconscious processes offering new insights into the popular appeal of narrative film through three film corpora analyzed at length body character breach films dreaming character films and gender crossing films With a range of case studies from the old Rebecca Vertigo Some Like it Hot to the new Being John Malkovich A Fantastic Woman Sandra Meiri and Odeya Kohen Raz build on psychoanalytic ideas about the cinema and take them in a completely new direction that promises to be the basis for further developments in the field **Reel Views 2** James Berardinelli, 2005 Thoroughly revised and updated for 2005 Includes a new chapter on the best special edition DVDs and a new chapter on finding hidden easter egg features

Queering Gay and Lesbian Studies Thomas Piontek, 2010-10-01 Queering Gay and Lesbian Studies is a broadly interdisciplinary study that considers a key dilemma in gay and lesbian studies through the prism of identity and its discontents the field studies has modeled itself on ethnic studies programs perhaps to be intelligible to the university community but certainly because the ethnic studies route to programs is well established Since this model requires a stable and identifiable community gay and lesbian studies have emphasized stable and knowable identities The problem of course is that sexuality is neither stable tidy nor developmental With the advent of queer theory there are now other perspectives available that frequently find themselves at odds with traditional gay and lesbian studies In this pioneering new study Thomas Piontek provides a critical analysis of the development of gay and lesbian studies alongside the development of queer theory the disputes between them and criticism of their activities from both in and outside of the gay academic community Examining disputes about transgenering gay male promiscuity popular culture gay history political activism and non normative sexual practices Piontek argues that it is vital to queer gay and lesbian studies opening this emerging discipline to queer critical interventions without however further institutionalizing queer theory **TLA Video & DVD Guide 2005**

The Organization of Information Daniel N. Joudrey, Arlene G. Taylor, 2017-11-27 This fourth edition provides an updated look at information organization featuring coverage of the Semantic Web, linked data and EAC/CPF new metadata models such as IFLA LRM and RiC and new perspectives on RDA and its implementation. This latest edition of *The Organization of Information* is a key resource for anyone in the beginning stages of their LIS career as well as longstanding professionals and paraprofessionals seeking accurate, clear and up to date guidance on information organization activities across the discipline. The book begins with a historical look at information organization methods covering libraries, archives, museums and online settings. It then addresses the types of retrieval tools used throughout the discipline: catalogs, finding aids, indexes, bibliographies and search engines, before describing the functionality of systems explaining the basic principles of system design and defining how they affect information organization. The principles and functionality of metadata is next with coverage of the types, functions, tools and models, particularly FRBR, IFLA LRM, RDF and how encoding works for use and sharing, for example MARC XML schemas and linked data approaches. The latter portion of the resource describes specific activities related to the creation of metadata for resources. These chapters offer an overview of the major issues, challenges and standards used in the information professions, addressing topics such as resource description including standards found in RDA, DACS and CCO, access points, authority control, subject analysis, controlled vocabularies, notably LCSH, MeSH, Sears and AAT and categorization systems such as DDC and LCC.
