This large format volume collecting images from 2009 to 2018 is the latest in Steidl's series publishing the life's work of Massimo Vitali. Following the first two volumes published together as *Landscape with Figures Natural Habitats 1994-2009* in 2011 and now out of print, *Entering a New World* presents Vitali's large scale color images of humans interacting en masse both consciously and unconsciously with their environments. Whether relaxing beachside, exploring the ruins of the Roman Forum, or navigating a crowded shopping promenade, the scenes in these photographs are topographical celebrations and subtle critiques of our changing habits of leisure. The book furthermore traces an important shift in Vitali's practice: his move from large format film to medium format digital. Born in Como in 1944, Massimo Vitali studied photography at the London College of Printing. Beginning in the 1960s, Vitali worked as a photojournalist, collaborating with magazines and agencies throughout Europe, before turning to cinematography for television and cinema in the early 1980s. He eventually returned to still photography as an artist, taking up large format photography in 1993 and beginning his famous Beach Series in 1995. Steidl has published Vitali's *Landscape with Figures* 2004 and *Landscape with Figures Natural Habitats 1994-2009* 2011.

This new edition of *The Routledge Companion to Landscape Studies* contains an updated and expanded selection of original chapters which explore research directions in an array of disciplines sharing a concern for landscape, a term which has many uses and meanings. It features 33 revised and/or updated chapters and 14 entirely new chapters on topics such as the Anthropocene, Indigenous landscapes, challenging landscape, Eurocentrism's photography, and green infrastructure planning. The volume is divided into four parts: Experiencing landscape, Landscape heritage and culture, Landscape society and justice, and Design and planning for landscape. Collectively, the book provides a critical review of the various fields related to the study of landscapes, including the future development of conceptual and theoretical approaches as well as current empirical knowledge and understanding. It encourages dialogue across disciplinary barriers and between academics and practitioners.
