 of developments within democratic society and hence a vital ingredient of democracy itself Departing from the French  
 Revolution this study focuses upon a tradition of European criticism On the whole critics accepted that technological advance  
 was irreversible but they opposed the assumption that this implied general progress Instead they stressed the negatives class  
 conflict erosion of tradition mechanization of life fragmentation of society loss of cultural differentiation The approach is  
 exclusively text orientated The result is a multi coloured mosaic depicting an image of what has moved confused or dismayed  
 the European mind over a period of a century and a half The intensity of concern has shaped our contemporary thought
