Major problems in contemporary European philosophy, from Dilthey to Heidegger, Translated from the German by Kurt F. Reinhardt Ludwig Landgrebe, *Heidegger, Dilthey, and the Crisis of Historicism* Charles R. Bambach, 2018-09-05 The collapse of historicism was not merely the demise of an academic tradition but signified a shift in the understanding of hermeneutics and metaphysics Whereas earlier books have explored the rise and dominance of historicism within academic history this is the first to trace its collapse and to show how it was shaped by larger philosophical and scientific concerns Charles R Bambach's lucid account of the demise of historicism within the context of German metaphysics provides a rich new perspective on the development of the young Heidegger's concept of historicity and on the origins of postmodern thought Bambach reconstructs the methodological debates arising from a pervasive sense of crisis among German philosophers in the late nineteenth century He details the divergent attempts by the Neo Kantians Nietzsche and Dilthey to overcome the limitations of historical relativism Heidegger's view of historicity Bambach shows radically transforms the problematic of historicism into a discourse concerning the crisis of philosophical modernity Cultural Transitions in the Middle East Mardin, 2021-10-11 Cultural Transitions in the Middle East deals with the interlacing of themes constitutive of traditional cultures and world views in the Middle East with concepts and outlooks that have originated in the modern Western World A number of Muslim thinkers who are indigenous products of the Middle East cultural setting have now begun to use some of the forms of modern Western literature and social thought Conversely some intellectuals trained in modern secular schools have attempted to reevaluate their Islamic heritage The papers cover aspects of this subtle interpenetration which has not been explored to date *Heidegger and the Problem of Knowledge* Charles B. Guignon, 1983-01-01 What Guignon does very skillfully is to use the problem of knowledge as a focus for organizing a discussion of Heidegger's thought in its entirety Places him squarely within the philosophical tradition he struggled to overcome and provides an account of his development from Being and Time to the last writings *The Anthem Companion to Pierre Bourdieu* Derek Robbins, 2016-08-05 The Anthem Companion to Pierre Bourdieu provides an introduction to the French sociologist's thought and an evaluation of the international significance of his work from a range of national perspectives The contributions in the companion investigate the applicability of Bourdieu's theories and concepts in diverse sociopolitical contexts and consider the ways they can be said to possess universal validity In examining Bourdieu on his own philosophical terms this companion contributes to the general debate about the effects of the transnational and transcultural transfer of concepts generated in the West Iranian Intellectuals and the West Mehrzad Boroujerdi, 1996-12-01 These intellectuals both religious and secular appropriated Islam as the vehicle through which they could most effectively challenge

or accommodate modernity and Westernization Through such a fitting appropriation Boroujerdi asserts could modern Iranian thinkers lay the foundation for a nativist vision of an unsullied culture seemingly free of Western influence Habermas Stefan Müller-Doohm,2016-09-22 Jürgen Habermas wrote the American philosopher Ronald Dworkin on the occasion of the great European thinker's eightieth birthday is not only the world's most famous living philosopher Even his fame is famous Now after many years of intensive research and in depth conversations with contemporaries colleagues and Habermas himself Stefan Müller-Doohm presents the first comprehensive biography of one of the most important public intellectuals of our time From his political and philosophical awakening in West Germany to the formative relationships with Adorno and Horkheimer Müller-Doohm masterfully traces the major forces that shaped Habermas's intellectual development He shows how Habermas's life and work were conditioned by the possibilities offered to his generation in the unique circumstances of regained freedom that characterized postwar Germany And yet Habermas's career is fascinating precisely because it amounts to more than a corpus of scholarly work however original and influential that may be For here is someone who continually left the protective space of the university in order to assume the role of a participant in controversial public debates from the significance of the Holocaust to the future of Europe and in this way sought to influence the development of social and political life in an arena much broader than the academy The significance and virtuosity of Habermas's many writings over the years are also fully and expertly documented ranging from his early work on the public sphere to his more recent writings on communicative action cosmopolitanism and the postnational condition What emerges from this biography is a vivid portrait of one of the great public intellectuals of our time a unique thinker who has made an immense and lasting philosophical contribution but who when he perceives that society is not living up to its potential for creating free and just conditions for all becomes one of its most rigorous and persistent critics The Blackwell Dictionary of Modern Social Thought William Outhwaite,2008-04-15 Modern social thought ranges widely from the social sciences to philosophy political theories and doctrines cultural ideas and movements and the influence of the natural sciences Provides an authoritative overview of the main themes of social thought Long essays and entries give full coverage to each topic Covers major currents of thought philosophical and cultural trends and the individual social sciences from anthropology to welfare economics New edition updates about 200 entries and includes new entries suggestions for further reading and a bibliography of all sources cited within the text *Human Life is Radical Reality* Howard Nelson Tuttle,2005 The twenty first century needs a new paradigm for philosophy because both Anglo American and Continental philosophy have ended in analytic sterility and deconstructive nihilism They have ignored the radical reality of human life which all other realities must presuppose Three European philosophers in the twentieth century Dilthey Heidegger and Ortega y Gasset began to develop this idea but never before has it been systematically conceptualized and adequately expounded With reference to the works of these philosophers this book examines the major categories and essential properties of human life as it is lived for example in time

circumstance history and understanding **The Communicative Body** John O'Neill, 1989 This collection of essays on communicative theory and praxis from the eminent Merleau Ponty scholar and translator John O'Neill explores the thesis that the human body is the exemplary ground of all other communicative processes The Emergence of a UAW Local, 1936-1939 Peter Friedlander, 2010-11-23 Peter Friedlander documents the formation of a local United Automobile Workers union at a mid sized parts factory during the turbulent 1930s Blending oral history based on personal interviews with a keen analysis of the worker's class structure and widely varied cultural backgrounds Friedlander describes the transformation of a working class community by its own actions and the ensuing stratification and factionalizing within that union The result is a firsthand account of the experience of unionization in personal and social terms **Phenomenology World-Wide** Anna-Teresa Tymieniecka, 2014-11-14 Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names Narrative Medicine and Community-Based Health Care and Planning John W Murphy, Berkeley A. Dagenais,2012-12-06 This essay is first a theoretical and historical study of some classical scientific ways of studying human being in the world The more readily accessible and more commonly discussed models of being human were chosen for review here but structuralism is included because I believe it will have the same impact in America as it has had in France and I hope that American readers might be forewarned about what may be ideologically at stake before the technical and fruitful aspects of the movement become an academic fad in the United States The subjects included are mainline experimental psychology from Wundt to Skinner with its relatively shortlived functionalist and Watsonian behaviorist formulations holistic psychology from Brentano through Stumpf Husserl and Goldstein to Maslow Rogers and contemporary third force psychology and the psychoanalytic model for which the only paradigm is Freud himself Preeminence is given to psychological paradigms since their subject matter lies closest to the classical philosophical tradition from which philosophical anthropology emerged This book is in the final analysis a prolegomenon to an articulated philosophical anthropo logy Sociological models are also considered the classical tradition from Comte to the present and Marxist anthropology from the manu scripts of 1844 to the present The structuralist model from Durkheim to Chomsky is also considered since it cuts across and gives new dimensions to all the foregoing models The essay is second a phenomenological critique of these historico theoretical considerations
