Celebrity Advocacy and International Development Dan Brockington, 2014-04-03 Celebrity advocacy is a curious phenomenon It occupies a significant proportion of the public domain but does so without engaging particularly well with much of the public Yet this may not matter very much Many people at the core of advocacy and in political and business elites simply do not notice any lack of engagement In these circles celebrity advocacy can be remarkably effective Celebrity Advocacy and International Development examines the work of celebrity advocacy and lobbying in international development Its purpose is to understand the alliances resulting their history consequences wider contexts and implications It argues that celebrity advocacy signals a new aspect of elite rule For populist celebrity advocacy can mark ironically a disengagement between the public and politics and particularly the public and civil society Recognising this poses new challenges but also presents new opportunities for the development movement This book gives students and researchers in development studies and media studies a wealth of original empirical data including interviews across the NGO sector media and celebrity industries newspaper analysis large surveys of public opinion and focus group research

Shivji,2007-06-30 One of the most articulate critics of the destructive effects of neoliberal policies in Africa and in particular of the ways in which they have eroded the gains of independence Issa Shivji shows in two extensive essays in this book that the role of NGOs in Africa cannot be understood without placing them in their political and historical context As structural adjustment programs were imposed across Africa in the 1980s and 1990s the international financial institutions and development agencies began giving money to NGOs for programs to minimize the more glaring inequalities perpetuated by their policies As a result NGOs have flourished and played an unwitting role in consolidating the neoliberal hegemony in Africa Shivji argues that if social policy is to be determined by citizens rather than the donors African NGOs must become catalysts for change rather than the catechists of aid that they are today World Poverty for Dummies Lindsay Rae,Ashley Clements,Sarah Marland,Adam Valvasori,2012-03-08 Created especially for the Australian customer Uncover the global building blocks of poverty Ending world poverty is possible and you can help With World Poverty For Dummies you find out about the building blocks of poverty as well as its varying causes and manifestations in different regions around the world Most importantly you discover inspiring stories of change and actions you can take from changing your consumer and investment choices or lobbying your government to becoming an aid worker Discover The real situation of the global poor Life in the world s megacities Solutions that address poverty Ways to get your friends onboard How to become an aid worker

devouring time tested moral values causing chaos within the basic unit in society the family and relegating Man and his dignity to the level of animals and even manipulating his identity Therefore questions arise Is Moral law fading are political economic systems and institutions like UN failing in realizing the lofty goal of affording due dignity basic rights and social justice humanity deserves Can the bystanders be mere onlookers anymore This book seeks to dispassionately survey the yawning gap between the rhetoric and the ground reality in bringing about dignity and social justice for humanity from bystanders perspective in the light of these questions and underlines the imperative need for moral progress to go hand in hand to make Man assume his due role as the trustee on earth It also exhorts bystanders to close ranks as human dignity champions rights defenders identity protectors against onslaughts from power hungry politicians mighty powers and vested interests This is the need of the times and what our future progeny demands

Education and International Development, 2000-2020 Ian Wash,2024-08-22 Education and International Development 2000 2020 A Constructivist Critique of the One size fits all Liberal Model advances the claim that there exists a liberal theory of international education Ian Wash argues that the assumed harmony of this model is the main source of dispute in the field of education and international development The liberal thinking behind the aspirations for education the political levers necessary for its effective governance and the ideas behind the policies all have contributed towards growing tensions that prevented international education from achieving optimal functionality Through a qualitative discourse analysis of the key policy documents produced between 2000 and 2020 Wash reveals how the liberal model was discursively constructed as a grand narrative of three acts that chronicles the vision process and outcomes of international education Such a rendering brings an understanding of the hidden conflicts essential for finding a resolution to this policy puzzle thereby improving the prosperity and wellbeing of those in poorer countries
